MAGININIL SOUNTFILL

SUGGESTIONS FOR ORDERING

All varieties of Flower and Vegetable seeds are numbered. Our order sheet is arranged to save you the time and trouble of writing the names of the seeds in full.

If you send your order early the benefit will be mutual. You will have your seed on hand when the planting season arrives and it will enable us to get it out before the "please rush" time arrives.

REMITTANCES can be made by any of the following methods: Post Office Money Order, Express Co. Money Order, Registered Letter, New York or Chicago Exchange or for small amounts postage stamps. PERSONAL CHECKS on local banks cost us extra for collection but will be accepted if the customer desires.

ALL PRICES on VEGETABLE SEEDS are net, but on PACKETS and OZS., WE PREPAY POSTAGE.

Write your Name and Address distinctly and in full; please use the order sheet and envelope inserted in this catalog.

SEEDS BY MAIL, ETC.

PARCEL POST CHARGES have greatly lowered the cost of sending packages by mail. Most customers are no doubt familiar with charges from Cincinnati and that it depends on the weight of the package and the zone. We have estimated as a general average the following rates and these are to be added to prices of bulk seeds if they be sent by mail. Lb., 7c. Pt., 7c. Qt., 10c. Larger size packages, especially in the 1st, 2nd and 3rd zones will not average quite these prices.

	DOMESTIC PARCEL POST RATES	First Pound (over 8 oz. rates 1 lb.)	Each Additional Pound or fraction
First Zone within	50 Miles	7c	1c
Second Zone within	50 to 150 Miles	.7c	1c
Third Zone within	150 to 300 Miles	8c	2c
Fourth Zone within	300 to 600 Miles	8c_	4c
Fifth Zone within	600 to 1000 Miles	9c	6c
Sixth Zone within	1000 to 1400 Miles	10c	8c
Seventh Zone within	1400 to 1800 Miles	12c	10c
Eighth Zone all over	1800 Miles	-13c	12c

WEIGHTS OF BULK SEEDS in measured quantities are approximately as follows:

Quarts of Peas and Beans approximately 30 ounces.

Corn, Sugar, approximately, quarts 24 ounces, pints 12 ounces.

Corn, Early and Field, quarts 28 ounces, pints 14 ounces.

Onion Sets, quarts 16 and pints 8 ounces.

The above tables will enable customers to remit the proper amount of postage.

EXPRESS AND FREIGHT CHARGES on large quantities are cheaper than Parcel Post. We charge no cartage to depots or the Express Company Offices, nor do we charge for boxes, packing or for small muslin bags.

When seamless cotton bags are required they must be remitted for 40c each.

WE DO NOT SHIP ANY GOODS, C. O. D. Our prices are plainly printed and if we cannot supply at the prices quoted, we will promptly notify customers. There is no reasonable doubt that vegetable seeds will be supplied at these prices, but we reserve the right to advance or decline with the market.

ABOUT WARRANTING SEEDS

We have often been asked if we "guarantee or warrant our Seeds." We beg to state plainly, we do not, for the reason that practical experience has assured us of the fact that crops may fail, no matter how fresh or pure the seed sown may be. We trust that our customers will fully realize that it is to our interest to send none but the best quality of seeds.

To secure success, however, it is necessary that the customer should do his part well, or our good seeds will be ruined. With the best of management and good seeds there will be an occasional unaccountable failure. The best of gardeners sometimes fail, and try again with seeds from the same lot with good results.

The J. Chas. McCullough Seed Co. give no warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds, bulbs or plants they send out and will not be in any way responsible for the crop. Purity and germination tests are for information only and without guarantee.

THE J. CHAS. McCULLOUGH SEED CO.

TO OUR FRIENDS AND CUSTOMERS

JE BUILDING-SEED CLEANING PLANT - EGGLESTON AVE., THIRD & FOURTH STS. OFFICE: 720-728 EAST THIRD ST NEAR PENN'A STATION

QUALITY :: SERVICE CONFIDENCE

The use of our seeds has steadily increased because of quality. No one can tell the difference by inspection between good and bad seeds. The planter must have confidence in his seedsman. Our seeds are held at a very high standard to merit this confidence. For 64 years we have been growing and with every move into larger quarters.

Our location in the heart of the seed producing areas, combined with unlimited buying facilities, enables us to give first class quality at a reasonable price. All of our seeds are the result of scientific research. We clean practically every lot of seed we sell, on our own modern seed cleaning machinery. We maintain one of the finest equipped seed testing laboratories to be found anywhere, for your benefit.

OUR RETAIL GARDEN STORE-

In creating our retail garden store, we desire to make a real shopping center for everything which has to do with gardens and their furnishings. Necessary and desirable articles have been added to give year round practical interest to the store and help you to make your garden your home, in the pleasant months of the year and to make your home your garden throughout the winter.

Whether you call at our store for your seeds and garden supplies or order them by phone or mail, we can assure you of the same prompt and courteous attention and the same helpful interest in your garden success.

Buyers of Seeds will find it worth while to devote some of their time to this catalogue. In it you will find reliable information as to varieties of seeds, bulbs, plants, etc. We hope it will be of use to all who are interested in making their vegetable gardens profitable and flower beds and lawns more attractive.

Garden Seed and Sales Department-228-230-232 East Fourth Street

"EMERALD" LAWN SEED

Tested for Purity and Growing Qualities in Our Own Laboratory, FOR YOUR PROTECTION

THERE IS NONE BETTER

"Emerald" Lawn Seed is composed of Kentucky Blue Grass, Red Top, English Rye Grass, White Clover and other fine grasses. (It does not contain any timothy or better known as hay seed.) We combine these grasses because they grow quickly and protect the blue grass, which is slower to germinate, thereby giving not only a permanent lawn but a good sod in six weeks. For 64 years we have made a study of lawns and our experiments have shown us that for quick and permanent results our "Emerald" Lawn Grass Seed has never been excelled. We know that "Emerald" Lawn Seed will give satisfaction wherever a fine velvety turf is wanted, except in dense shade.

OUANTITIES

For New Lawns—1 lb. sows 250 sq. ft. (10 x 25). An acre requires 80 to 100 lbs.

For Old Lawns—It will take about half as much seed as for a new lawn, depending on how thick a stand of grass there is, usually requiring 35 to 50 lbs. per acre for renovating.

MAKING LAWNS

Preparation—The soil should be deeply spaded or plowed, thoroughly pulverized and raked fine and smooth, removing all roots, stones, clods, trash, etc. If not properly graded it should be done now, allowing for water to drain off and not stand in pools. If the lawn is made of clay from recent excavations, it should be covered with 3 or 4 inches of good rich garden soil before the seed is sown.

Fertilizers—Sacco Plant Food, Loma or Pulverized Sheep Manure are thoroughly satisfactory for lawns.

Unless stable manure is well decomposed it contains weed seeds. Work the fertilizer into the soil at time of sowing seed.

Sowing—Seed can be sown in the spring from February to May or in the fall from August to October. To get it evenly distributed half the seed should be sown one way then cross and sow balance at right angles. The seed should be covered by raking or harrowing and then well rolled.

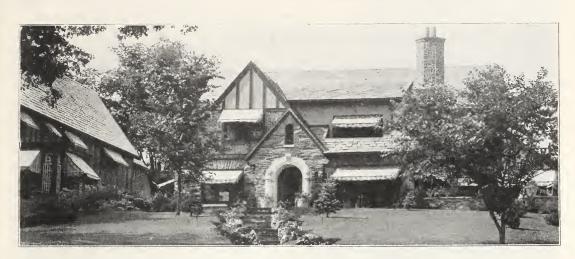

Mowing—Cut the young grass for the first time when it is about 1½ to 2 inches high with either a sharp scythe or a free running machine set high. It is most important to keep grass cut quite short from the very start, otherwise it will grow long and thin, instead of tillering out and covering the ground.

Never allow the grass, whether it be young or old, to grow long and ragged. Two inches may be considered the extreme length to which it should attain at any time of the year. It is not advisable to keep grass too closely cut during hot and dry weather.

Renovating—If the grass is thin it is not necessary in most cases to plow up the entire lawn and reseed, though if it is choked with weeds and there is very little grass left it is decidedly preferable to plow up or spade up the entire lawn and seed over. Unless this is the case, however, raking over roughly with a sharp tooth rake and sowing more seed, will improve the lawn wonderfully. Grass usually dies out from lack of plant food, hence it is a good plan to apply Sacco Plant Food, Loma or Sheep Manure in March, April or May, after the growing season has started.

PRICES-1/2 lb., 30c; 1 lb., 50c; 5 lbs., \$2.35; 10 lbs., \$4.40; 20 lbs., \$8.40.

GRASS SEEDS PRESCRIBED FOR ALL SOILS AND PURPOSES

For Lawns, Shaded Lawns, Golf Courses, Airports and Landing Fields, Bowling Greens, Football, Baseball and Polo Fields.

We supply in this vicinity nearly all of the cemeteries, public parks, golf courses and other places where considerable quantities of grass seed are used and are prepared at all times to furnish the highest quality seeds for all purposes.

We put up special mixtures for all purposes and will be very glad to estimate on any special mixture that may be required.

We offer the following splendid mixtures which can be relied on to be the very highest quality.

"SHADY NOOK" LAWN SEED

For sowing on the north side of buildings, between houses, and for securing a lawn under large shade trees. In many lawns there are places where it seems as though nothing can be grown; some are shaded by large trees and others by buildings. For these locations we recommend our Shady Nook Lawn Seed. It is always advisable for those who are seeding down the shady places to supply new soil, if possible, especially if large trees are producing the shade, as their roots spread so fast as to exhaust the nourishment in the soil. When unable to supply new soil, the ground should be well dug over, and if the tree roots predominate, these should be taken out. In most shady places the soil has a tendency to be sour, and we strongly recommend the use of lawn lime (about 50 lbs. per 1,000 sq. ft.).

Per ½ 1b., 35c; 1 1b., 55c; 5 1bs., \$2.60; 10 1bs., \$4.90; 20 1bs., \$9.40.

HILL SIDE OR TERRACE LAWN GRASS

For high, dry situations where moisture and poor soil are conditions to be contended with. It is composed

of grasses that will succeed fairly well under these conditions and produces short green turf of fair quality.

Per ½ 1b., 25c; 1 lb., 45c; 5 lbs., \$2.15; 10 lbs., \$4.20; 20 lbs., \$8.20.

"BENT LAWN" GRASS MIXTURE

This is composed of Agrostis varieties only, a mixture of the wonderful Bent Grasses with a proportion of high-quality Red Top. In rich soil it will produce a turf much finer in texture than a lawn of the ordinary type, and the creeping character of these grasses causes them to mat together and produce the soft, luxuriant feel of an expensive rug. The turf is a deep, rich green color. For this mixture the soil should be exceptionally good and should have additional rotted manure worked into it. Several times during the growing season Wedo, the special fertilizer for lawns only, at the rate of 11/2 pounds per 100 square feet, should be applied to the turf. Sow the seed at the rate of one pound per 250 square feet. This is particularly heavy seed, one bushel weighing 30 pounds.

Per lb., 85c; 5 lbs., \$4.15; 10 lbs., \$8.20; 20 lbs., \$16.00; 50 lbs., \$38.75; 100 lbs., \$75.00.

GOLF COURSE MIXTURES

It is most important that the best seeds be used for this and in proper proportions to produce desired results. New golf courses require somewhat different mixtures from that for old courses because it is imperative that quick sod should be obtained and one which will be lasting and produce good, green, smooth turf. From our long experience with grasses, we are well informed on the requirements for the average golf course whether it be for greens or fairways and will be glad to advise with you. The fact that we are among the largest importers of grass seeds and one of the largest cleaners of domestic sorts, enables us to offer at very reasonable figures.

=GENERAL LIST OF=

ME SELECT VEGETABLE SEEDS

Postage paid on Seeds at pkt., oz., $\frac{1}{4}$ lb., and $\frac{1}{2}$ pt. rates. On larger quantities add 7c per pt., 7c per lb., 10c per qt. to prices.

EXPRESS RATES on Seeds, Bulbs, etc., have been considerably reduced in the last few years.

ASPARAGUS

One ounce of seed sows 50 ft. producing about 500 plants: 10 lbs. sow one acre. One pound produces plants enough to set one acre.

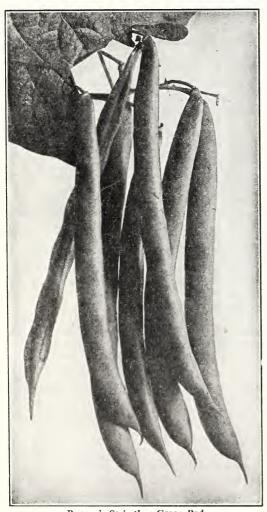

Roots can be set from February to May, or in the

fall, in October or November.

100 roots plant a bed 100 feet long and are sufficient for a medium garden. An acre requires 4000 to 7000

Culture Growing Roots—Asparagus seed is sown in March or April one inch deep, in rows 15 inches apart. Keep clean with hand tools and thin out the plants to four inches apart. When one or two years old, set in permanent beds.

Growing Asparagus—The size of asparagus depends more on high fertilization than on the variety. Well-drained, rich soil, where it will not be in the way when the rest of the garden is plowed is best. Two year old roots give quickest results. Plow or dig out a trench 18 inches wide, six to ten inches deep, making the trenches six to eight feet apart. In the bottom of the furrow use four to six inches

Burpee's Stringless Green Pod

of well-rotted manure, then cover with two or three inches of good soil. The roots are set twelve to fifteen inches apart, and should be spread out carefully and afterwards covered with about two inches of soil. Do not cover with too much soil the first year, but the following years they can be hilled up. If white asparagus is wanted the beds should be thrown higher than if wanted for green asparagus.

asparagus.

Do not cut asparagus too late in the spring, as it exhausts the plant. The most practical growers on the day they stop cutting, throw down the beds with a plow, then harrow the ground, leaving the plants to grow. In November the tops are cut off and a mulch of manure put on the top of the rows, which is afterwards worked into the soil, when the beds are thrown up in the spring.

For a small garden asparagus roots can be set in double rows instead of single.

Washington-This variety has proven as nearly rust-proof as is possible to produce Asparagus. It is much in demand on account of its heavy yield and fine flavor. The stalks are of rich, dark green color, tinted darker at tips.

Pkt., 10c; oz., 20c; $\frac{1}{4}$ lb., 60c.

2 Palmetto—An early maturing and very prolific variety, producing an abundance of very large deep green shoots of the best quality.

Pkt., 10c; oz., 15c; 1/4 lb., 30c.

Conover's Colossal—An old favorite, well-known sort, producing very large shoots; tips somewhat blunted and slightly tinged with purple.

Pkt., 10c; oz., 15c; $\frac{1}{4}$ 1b., 30c. Asparagus Roots-See Page 70 for Prices.

BEANS DWARF OR BUSH Sometimes called String Beans, Snap Beans, etc.

Always popular and easily grown. If planted every two or three weeks, commencing after all danger of frost has passed and continuing until about August 15, a supply will be kept up during the whole summer.

One pint plants about 100 feet. An acre requires 1 to $1\frac{1}{2}$ bushels. Half pint planted every 3 weeks is sufficient for a medium garden. They are ready for the table from 40 to 50 days after planting.

Culture—To produce the best results, Beans should have a good soil and deep or thorough tillage before planting and shallow cultiva-tion afterwards to prevent too much disturbing of the roots. Land which was planted in other crops is better than that freshly manured which was planted in other crops is better than that freshly manurea and sheep manure, one or two hundred pounds per acre, will give excellent results. For field culture plant in rows 2½ feet apart, dropping the beans 3 or 4 inches apart in the rows, covering about 2 inches with soil. In small gardens, rows may be 18 inches apart. Up to the time of blooming, cultivate often, but never while the vines are wet, and do not disturb the roots, especially after blooming, as they will blight and the crop will be reduced. Constant picking extends bearing.

Insect Remedies-For Mexican Bean Beetle, dust the under side of leaves with Magnesium Arsenate Dust Mixture. (See Page 74.)

For the Bean Aphis or Lice, spray with "Black Leaf 40." For Fungus diseases and rust, spray with Bordeaux Mixture.

Postage paid on pkts., and ½ pts. On pints remit 7c; on quarts 10c extra if to be sent by mail.

Inoculation for Beans—Excellent results will be obtained by treating the seeds of beans with Inoculation Bacteria before planting. It can be easily We have it put up in convenient size for small gardens. (See Page 56.)

BEANS-DWARF OR BUSH-Cont'd GREEN PODDED VARIETIES

4 Improved Earliest Red Valentine—A well-known very early sort. Pods of medium length about 4½ inches long of medium green color, curved, cylindrical, with crease in the back, very fleshy, crisp and tender. Vines medium to large, erect with dark green leaves. Seed long, purplish pink, splashed with light buff.

Pkt., 10c; ½ pt., 20c; pt., 35c; qt., 65c; 4 qts., \$2.40.

5 Burpee's Stringless Green Pod—A very handsome, long, cylindrical medium maturing green bean. Pods larger than those of the Valentine and straighter. Very fleshy and remain crisp and tender longer. Vines of vigorous growth and productiveness. Seeds oval, light brown in color. A very desirable sort for home gardens and largely grown for market.

Pkt., 10c; ½ pt., 25c; Pt., 40c; qt., 75c; 4 qts., \$2.75.

Giant Stringless Green Pod-A highly productive and very handsome sort. Vines vigorous, spreading. Pods large, round, averaging larger and straighter than the Stringless Green Pod, but a few days later. Seed long, slender, buff color.

Pkt., 10c; ½ pt., 25c; pt., 40c; qt., 75c; 4 qts., \$2.75.

Dwarf Horticultural—Very popular in most localities, especially for market, as they are valuable both for snap beans and shelling. become fit for use as shelled beans early, and in this condition the beans are large, easily shelled and equal to Lima Beans in quality. The vines are very productive, compact and upright in growth, with large leaves. The pods are 5 to 5½ in. long, broad, thick, curved and have splashes of bright red on yellowish green. Seeds large, oval, plump, pale buff splashed with red.

Pkt., 10c; ½ pt., 25c; pt., 40c; qt., 75c; 4 qts., \$2.75. 8 Full measure (Perfection Stringless)—A very desirable round-podded variety with pods 6 to 7 inches long, which are solid, meaty, brittle and stringless. It is a little later than Stringless Green Pod

and is a splendid Bean for home or market use.

Pkt., 10c; ½ pt., 25c; pt., 40c; qt., 75c; 4 qts., \$2.75. 9 Refugee (late or 1,000 to 1). One of the best sorts for late planting and especially desirable for canning and pickling. The vines are large, spreading, very hardy, with small, smooth light green leaves. The beans are borne in great profusion, pods being about 5 to 51/4 inches long; cylindrical, slightly curved, medium green, afterwards becoming light yellow, slightly splashed with purple. The seed is long, cylindrical, light drab thickly dotted and splashed with purple.

Pkt., 10c; ½ pt., 25c; pt., 40c; qt., 75c; 4 qts.,

\$2.75.

Bountiful—An improved long Yellow Six Weeks, in that it is earlier, very much larger and more tender. It is very hardy, extremely early, very prolific, and bears continuously for several weeks. Pods are flat, absolutely stringless, rich green, very large and handsome. The seed is yellow, long, resembling Six Weeks. For very early or very late planting is very desirable for both home garden and market.

Pkt., 10c; ½ pt., 25c; pt., 40c; qt., 75c; 4 qts., \$2.75.

Tennessee Green Pod-A dwarf, early, snap bean, which is very popular in Eastern Tennessee and Southern Kentucky. Seed is brown, a little larger than Kentucky Wonder, very hardy and more capable of withstanding inclement weather than most other sorts. The vines are large, somewhat spreading, prolific. The pods are very long (often 6 to 7 inches), flat, irregular in shape, dark vivid green color.

Pkt., 10c; ½ pt., 25c; pt., 40c; qt., 75c; 4 qts., \$2.75.

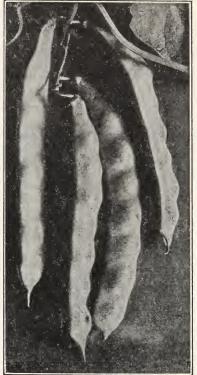

DWARF BEANS—For Shelling Only

Usually profitable as a farm crop especially in Northern sections.

Culture—Plant in rows about 2½ feet apart. The Navy requires about ½ bu. per acre. Other sorts about a bushel.

15 Dwarf White Navy—The well-known small oval white variety so largely used in all sections.

½ pt., 15c; pt., 20c; qt., 40c; 4 qts., \$1.25.

Tennessee Green Pod

16 Dwarf White Marrow—Beans oval about double as large as Navy. Vines vigorous and productive.

 $\frac{1}{2}$ pt., 15c; pt., 25c; qt., 40c; 4 qts., \$1.50.

17 Dwarf White Kidney-Large, white kidney shaped, slightly flattened. Pods about six inches long, large and coarse. Beans excellent quality either green

18 Dwarf Red Kidney-Similar to above, but dark pink color. Very salable.

 $\frac{1}{2}$ pt., 15c; pt., 25c; qt., 40c; 4 qts., \$1.50.

Inoculation for Beans—Excellent results will be obtained by treating the seeds of beans with Inoculation Bacteria before planting. It can be easily done. We have it put up in convenient size for small gardens. (See Page 56.)

WAX PODDED SORTS

These find ready sale in northern markets and are largely planted by southern growers for shipping. The pods vary from light to golden yellow color.

19 Round Pod Kidney Wax-Long, round, handsome, stringless pods of large size, very solid and full of meat, crisp, brittle and free from rust. Earliest and best Wax Bean.

Pkt., 10c; ½ pt., 25c; pt., 40c; qt., 75c; 4 qts., \$2.75.

20 Wardwell's Kidney Wax—A variety which matures a little later than the Golden Wax, yields large crops of long, nearly straight, broad pods of light golden yellow color. They are extremely showy, consequently are ready sale and most profitable for market gardeners and an excellent variety for growing for home gardens. The seed is large, flat, kidney shape, white with dark markings about the eye.

Pkt., 10c; ½ pt., 25c; pt., 40c; qt., 75c; 4 qts.,

\$2.75.

PARCEL POST RATES—To calculate Zone Rates. Beans can be taken at the following rates: A pint weighs approximately 15 oz., a quart approximately 30 oz.; or packed, a pint weighs about 1 lb., a qt. about 2 lbs.

WAX PODDED SORTS-Cont'd

21 Pencil Pod Black Wax—One of the most popular varieties for home use and market. The pods are about 4½ inches long, slightly curved, round, very brittle and tender. They are very fleshy, clear golden yellow color and remain tender a long time. Seed is long, round, medium size, shiny black.

Pkt., 10c; ½ pt., 25c; pt., 40c; qt., 75c; 4 qts., \$2.75.

22 Currie's Rust-proof Wax—A variety which is claimed to be rust-proof. The vines are very vigorous, hardy, productive. Pods, light yellow, similar in shape to Golden Wax, 5½ to 6 inches long. Matures early and is a splendid sort for market gardens and excellent for home use. The seed is long, oval, medium size, purplish black.

Pkt., 10c; ½ pt., 25c; pt., 40c; qt., 75c; 4 qts., \$2.75.

23 Dwarf Golden Wax—An early maturing variety, very productive. Vines erect, compact, bearing the pods well off the ground. Pods nearly straight, broad, flat, golden yellow, very fleshy and wax like, usually 4½ to 5 inches long. Seed medium size, oval, white blotched with purple. A good sort for home garden, either for table use or pickling.

Pkt., 10c; ½ pt., 25c; pt., 40c; qt., 75c; 4 qts.,

24 Davis White Wax-A very hardy productive variety which is popular with truckers growing for northern markets and market gardeners. The vines are very vigorous and productive. Pods straight, 6½ to 7 inches long, light yellow, and when young are very crisp and tender. The seed is kidney shape, clear white, excellent for baking.

Pkt., 10c; ½ pt., 25c; pt., 40c; qt., 75c; 4 qts.,

BEANS—POLE OR CORNFIELD

These are very profitable and usually command good prices on the markets and are more easily and economically gathered than the Dwarf Beans. Can be planted to run up good, strong poles and some varieties are desirable to use on strong growing corn.

Culture—Pole Beans are more sensitive to cold and wet than Dwarf varieties, hence should not be planted too early. Use poles from 6 to 8 feet long in rows 4 feet apart, placing the poles about 3 feet apart in the row. If the poles are slanted slightly to the north, the vines climb better and the pods are more easily seen. In home gardens three poles are usually placed wigwam style and tied at the top. Around each pole plant 4 to 6 beans from 1 to 2 inches deep. When ready to run, thin to four plants and see that they all climb the same way, as if trained wrong they will not climb. If to be planted in corn, this should be done after the corn is well started and has had two or three workings.

BLACK KENTUCKY WONDER

25 Introduced by the late J. Chas. McCullough. Plant of large growth, climbs well, very compact, and exceedingly productive. Snap pods very large, 7 to 9 inches long, 8 to 10 seeded, extremely fleshy and very brittle. Suitable for either snap or green shell pur-Undoubtedly the best late green podded sort for snap poses. purposes.

Pkt., 10c; ½ pt., 20c; pt., 35c; qt., 65c; 4 qts., \$2.40.

26 Improved Kentucky Wonder (or Old Homestead)—A well-known variety and one of the most popular of all Pole Beans, especially in the middle sections. The vines are very vigorous, heavy and very prolific, hence not desirable to use for planting in corn. Pods are of irregular shape, bright green, very long, often reaching 9 to 10 inches. They are very tender, crisp and stringless when young, but become irregular and spongy as the beans ripen. The seed is long, oval, slightly flattened and brown or dun colored.

Pkt., 10c; $\frac{1}{2}$ pt., 20c; pt., 30c; qt., 55c; 4 qts., \$2.00.

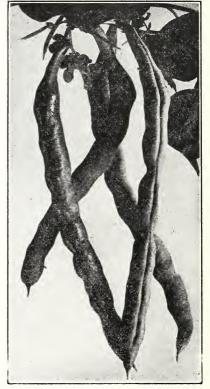

White Seeded Kentucky Wonder. (St. Louis Perfection White)—Similar to the above, excepting that the beans are different shape and solid white. It is early maturing, very desirable for snap beans and an excellent variety for green shelling and unsurpassed in quality as baked beans. Very profitable for market gardeners and highly praised in all sections.

Pkt., 10c; ½ pt., 25c; pt., 40c; qt., 75c; 4 qts.,

Missouri Wonder-An extremely prolific variety, maturing in the same season or a little later than Improved Kentucky Wonder. A green podded variety of high quality. The pods are nearly as long as those of Improved Kentucky Wonder, but slightly broader and flatter and lighter in color. When in condition for snap beans, the pods are nearly stringless.

Pkt., 10c; ½ pt., 20c; pt., 35c; qt., 65c; 4 qts.,

29 Red Speckled Cut-Short or Corn Hill—A very popular variety in Central and Southern States, especially for planting among corn. It will give a good crop without the use of poles. The vines are not as heavy as Kentucky Wonder, being medium size, vigorous, twining loosely, with dark colored leaves. Pods are 3 to $3\frac{1}{2}$ inches long, straight, flat, fleshy and of

Improved Kentucky Wonder Pole Bean

good quality. As they mature the pods become light yellow tinged with red, the beans showing distinctly through the pods. The seed is small, round, light greyish white, splotched with purplish brown.
Pkt., 10c; ½ pt., 20c; pt., 35c; qt., 65c; 4 qts.,

Horticultural Pole or Speckled Cranberry—A very popular variety for general purposes, either as a late green shelled bean or for snaps. The pods are of medium length 4½ to 5 inches long, broad; when young pale green, gradually changing to yellowish green striped or splashed with red. Vines are moderately vigorous, with large light colored leaves. Can be grown on corn or on short poles. As shelled beans they equal in flavor Limas and are excellent to use as dry beans for boiling or baking.

Pkt., 10c; ½ pt., 20c; pt., 35c; qt., 65c; 4 qts., \$2.40.

BEANS-POLE OR CORNFIELD-Cont'd

31 White Creaseback—An extremely early variety, which produces nearly all its pods at the same time. The vines are medium size and vigorous, and in rich soil wonderfully productive, bearing round, fleshy pods in clusters of from 4 to 12, which makes it extremely easy to gather. Pods are about 5 inches long, comparatively straight, attractive, light green, very fleshy, with a crease down the center. Beans are small, oblong, clear white.

Pkt., 10c; ½ pt., 20c; pt., 30c; qt., 55c; 4 qts., \$2.00.

32 Scotia or Striped Creaseback—A hardy and very productive green-podded cornfield bean. The vines are sturdy and of good climbing habit with small-medium deep green leaves. The pods are long, about 6 inches, very cylindrical or completely rounded, distinctly creasebacked, very fleshy and of excellent quality. The color, when in condition for use as snaps, is light, silvery green, becoming tinged with purple as the pods mature. This variety is especially suitable for growing in corn for snaps.

Pkt., 10c; ½ pt., 20c; pt., 30c; qt., 55c; 4 qts., \$2.00.

33 Tennessee Wonder, or Egg Harbor—Large green pods, curved, double barreled, tinged with purple and wrinkled, depressed between each of the eight or nine seeds. Considered one of the largest of all cultivated beans.

Pkt., 10c; ½ pt., 20c; pt., 35c; qt., 65c; 4 qts., \$2.40.

34 Lazy Wife—A somewhat late maturing variety, bearing medium green pods in large clusters. Pods are 5½ to 6½ inches long, broad, thick, fleshy and entirely stringless. When young they have a rich flavor which is retained until they are nearly ripe. An excellent sort for either snap green shelling, or using as dry beans. Seed white, medium size and generally round.

Pkt., 10c; ½ pt., 20c; pt., 35c; qt., 65c; 4 qts., \$2.40.

35 McCaslan—The pods, produced in great abundance, are a rich, dark green color, measuring about 10 inches long, rather flat and slightly curved. Fine for use as a snap sort, being entirely stringless when young. If pods are picked before maturing, vines bear till frost. If pods are allowed to mature, they produce a good sized white bean for winter use.

Pkt., 10c; $\frac{1}{2}$ pt., 25c; pt., 40c; qt., 75c; 4 qts., \$2.75.

36 Ohio Wax Pole—Pods usually 7 inches long, solidly meaty and entirely stringless; commences to bear when scarcely higher than bush variety, and keeps on producing until killed by frost.

Pkt., 10c; ½ pt., 25c; pt., 35c; qt., 65c; 4 qts., \$2.40.

37 Golden Cluster Wax—One of the best Wax podded pole snap beans. The vines are large, strong growing, vigorous and hardy. Pods 6 to 8 inches long, borne in clusters and vary in color from golden yellow to creamy white. The seed is medium size, flattened, oval, dull white.

Pkt., 10c; ½ pt., 25c; pt., 35c; qt., 65c; 4 qts., \$2.40.

LIMA BEANS DWARF OR BUSH VARIETIES

These are preferred in small gardens, as they can be grown like Dwarf Beans, and without the use of poles. They are not quite so prolific as the Pole Limas, but

are earlier and continuous bearers throughout the season. The beans can be gathered much easier than the Pole Limas and they can be grown closer together.

Culture—All Lima Beans are tender and the ground should be dry and the weather warm and settled before planting. They do best in good light soil, and if not rich, an application of sheep manure or other good fertilizer will be well repaid. Plant in drills, 1½ to 2 feet apart, dropping the beans 4 to 5 inches apart and covering about 2 inches deep. Cultivate often until they commence to flower, but only when the leaves are dry.

1 pint of Small Seeded Lima plants 100 to 125 feet and is sufficient for an ordinary garden. 1 quart of other sorts plants about the same space. For succession, make two plantings four weeks apart. Mature in 75 to 90 days from planting.

38 Burpee's Improved Bush Lima—Pods and beans are both larger and thicker than Burpee's Bush Lima, and fully eight days earlier. Plant is a vigorous grower with heavy foliage. Even when of full size the enormous beans are of the most luscious flavor.

Pkt., 10c; ½ pt., 25c; pt., 45c; qt., 85c; 4 qts., \$3.25.

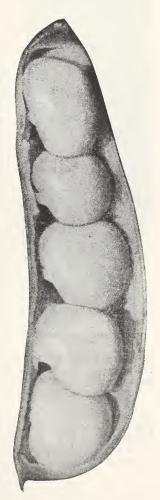

39 Fordhook Bush Lima — Avery vigorous and erect growing variety bearing its pods well above the ground in large clusters. Pods are medium green, about 5 inches long and contain 4 to 5 large thick beans of exceptionally fine Йe quality. V one of the best of the large seeded kinds.

Pkt., 10c; ½ pt., 30c; pt., 50c; qt., 95c; 4 qts., \$3.50.

40 Burpee's Bush Lima—A bush form of the Large White Lima type. Plants are somewhat dwarf but very productive. Pods are medium green, broad, containing 3 to 4 very large flat beans of the best quality. Seed large, flat, white, slightly greenish tinge.

Pkt.,10c; ½ pt., 25c; pt., 40c; qt., 75c; 4 qts., \$2.75.

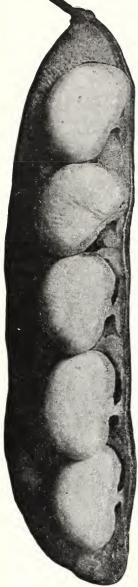

41 Henderson's Bush Lima—An exceedingly productive of dwarf variety Commences habit. bearing very early and continues to grow and set pods until stopped by frost. The vines are without runners. somewhat

Fordhook Bush Lima

Any crop that grows its seeds in pods will give two to five times the yield if inoculated with Acme Inoculation.

See page 56.

Ford's Mammoth Podded

DWARF OR BUSH VARIETIES —Cont'd

dwarf, very productive. Beans small, white and most excellent quality either for green shelling or as dry beans.

Pkt., 10c; ½ pt., 20c; pt., 35c; qt., 65c; 4 qts., \$2.40. POLE LIMA

Large seeded sorts require 1 quart to 100 poles, 34 bushels to an acre. Small Limas require about one-third the quantity.

BEANS

Culture—These are to be treated like other Pole Beans excepting they should be planted one or two weeks later. Where soil is very stiff, it is best to plant the beans with the eye downward, as they will come up more rapidly.

Ford's Mammoth Podded—The result of 20 years' selection by a market gardener near Philadelphia. It far surpasses in size and productiveness many other sorts and has become very popular throughout all sections. are very large, usually containing 4 to 6 beans. Vines vigorous, setting the beans early and very Beans productive. medium size, excellent quality.

Pkt., 10c; ½ pt., 20c; pt., 35c; qt., 60c; 4 qts., \$2.20. 43 K i n g of the Garden — A favorite sort on account of its large size and abundant yield. The beans are of greenish color, very tender and delicious.

Pkt., 10c; ½ pt., 20c; pt., 35c; qt., 60c; 4 qts., \$2.20.

44 Extra Large White Pole Lima—A choice variety of the Large Lima. Pods and beans of large size and a good cropper. Quality unsurpassed.

Pkt., 10c; ½ pt., 20c; pt., 35c; qt., 60c; 4 qts., \$2.20.

45—Small Lima or Sieva—Also called Butter or Carolina. Not as large as the other varieties but a good bearer and about 10 days earlier.

Pkt., 10c; ½ pt., 20c; pt., 35c; qt., 60c; 4 qts., \$2.20.

BEET TABLE VARIETIES

These are popular in all gardens and as a rule a very profitable crop for market gardeners. Beets fresh from the garden are always more tender and delicious than those that are shipped. They can be sown in succession for different seasons and if too many are produced for table use, make excellent food for poultry and stock.

Culture—A deep loamy or sandy soil is best suited to beets. If wanted very early they can be sown in hot beds and transplanted in the open ground when the weather has moderated, but the outer leaves should be trimmed off when transplanting is done. The earliest outdoor sowing is done in March or April, in rows 15 to 18 inches apart, thinning or transplanting the plants to 3 or 4 inches apart in the rows. For winter use, sow in June or July. Roots can be stored in pits or cellars covering with sand to keep from wilting.

One ounce sows 100 feet of drill. 7 lbs. one acre. Ready for use 60 to 75 days after sowing.

46 Crosby's Improved Egyptian—An improved sort which is very popular with market gardeners on account of its quick growth, extreme earliness and general good qualities. The tops are small, roots flattened but slightly globe shaped and very smooth. Exterior bright red and inside deep vermilion red zoned with a lighter shade. It is one of the very best, sweet and tender varieties, of excellent quality and popular both with the market gardener and for home use. It becomes fit to use earlier than any other variety and is much superior to some of the older sorts.

Pkt., 10c; oz., 15c; 1/4 lb., 30c; 1 lb., \$1.00.

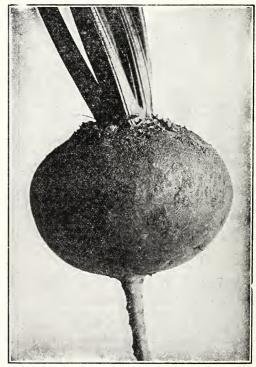

47 Detroit Dark Red—Very early and becomingly popular. Produces medium size globe-shaped roots which are very smooth and of dark blood red color. Very desirable for bunching. Comparison of this with other varieties proves that Detroit Dark Red is the most uniform beet in size and most attractive in color. It is splendid for market or home gardens on account of its uniform deep red color and most desirable for canning.

Pkt., 10c; oz., 15c; 1/4 lb., 35c; 1 lb., \$1.25.

48 Early Eclipse—This has long been a popular variety for home gardens and market growing. The tops are small, roots bright deep red, smooth, round or slightly top-shaped with a very small tap root. It is splendid for bunching; is very sweet, crisp and tender, especially when young.

Pkt., 10c; oz., 15c; $\frac{1}{4}$ lb., 35c; 1 lb., \$1.25.

49 Norwood Blood Turnip—A superb early maincrop Beet. Both for market and the home garden. The roots are of neat turnip shape, growing three or

Crosby's Improved Egyptian

BEET—TABLE VARIETIES—Cont'd

four inches in diameter, smooth, and entirely free from small rootlets. Flesh deep blood-red, tender, and of rich flavor. Foliage is small, of a rich bronze color.

Pkt., 10c; oz., 15c; 1/4 lb., 35c; 1 lb., \$1.25.

Extra Early Egyptian—An old well-known popular variety which has long been a favorite with market gardeners. It is the earliest sort and largely used for forcing. Has very small tops and produces flat, medium size roots which are very dark red, moderately thick and distinctly flat on the bottom. Flesh is dark, purplish red, firm, crisp and tender.

Pkt., 10c; oz., 15c; 1/4 lb., 30c; 1 lb., \$1.00.

Edmand's Early Blood Turnip-A dark red, nearly round variety which is slightly flattened. Exterior, dark red; interior, purplish red with a little zoning. Crisp, tender, sweet and one of the best for main crop, being an excellent keeper.

Pkt., 10c; oz., 15c; 1/4 lb., 30c; 1 lb., \$1.00.

Improved Early Blood Turnip—A selected stock of this old and very popular variety. It is deep red color, zoned with lighter shade; roots round, slightly flattened and excellent for summer and autumn use. Pkt., 10c; oz., 15c; 1/4 lb., 30c; 1 lb., \$1.00.

Dewing's Blood Turnip-A medium early sort which is very tender and sweet and a good keeper. Roots are dark purplish red, turnip shape with a medium size tap.

Pkt., 10c; oz., 15c; 1/4 lb., 30c; 1 lb., \$1.00.

55 Long Smooth Blood—A splendid late variety producing large, smooth, rather slender roots which grow largely under ground. It has few side roots and is good shape and color, exterior being dark purple, almost black, with delicate red flesh which is tender and sweet. It is an excellent sort for main crop or pickles. Produces very good crops so that it is a profitable grower for stock feeding.

Pkt., 10c; oz., 15c; 1/4 lb., 30c; 1 lb., \$1.00.

56 SWISS CHARD—This variety is grown for its tops only which are boiled like spinach. It does not make edible roots but produces white leaves; the stalks should be cooked and served like asparagus. Makes a splendid summer vegetable and is becoming popular. Known also as the Silver or Spinach Beet.

Pkt., 10c; oz., 15c; 1/4 lb., 30c; 1 lb., \$1.00.

BEETS—FOR STOCK FEEDING

Too little attention is paid to this important crop for winter feed for stock. They yield enormously, sometimes making fifteen tons to the acre; are very nutritious, not only improving the general condition of stock but greatly increase both the quantity and quality of milk in cows. A variety of feed is always beneficial to all animals and Mangel Wurzel and Sugar Beets afford one of the best crops for this purpose as they are superior in feeding qualities to turnips and are a much larger yielding crop. All farmers and especially stock raisers should grow them extensively.

Culture—Sow in the latter part of April, May or June at the rate of 6 lbs. to the acre, in rows 2½ to 3 ft. apart and thin to 8 inches apart. If seed is soaked 24 hours before sowing, it germinates more quickly but it should be put in when the ground is moist. The crop is harvested before frost and packed away in barns or cellars. They can also be put into piles or ridges five or six feet high and covered with straw or litter to keep from freezing too much. When the winter weather comes, throw on a layer of four to six inches of earth. A protection of boards to shed heavy rains is also descinable. desirable.

57 Mammoth Prize Red Mangel—Particularly suited to deep soils but succeeds on any medium or heavy soil. The roots are very large, uniform, and are enormously productive. Flesh is white, tinged with red. One of the best for general purposes.

1 oz., 15c; 1/4 lb., 25c; 1 lb., 75c.

Golden Tankard Mangel-A variety which produces very large roots, oval shaped, the bottom being larger than the top. It is light grey above ground; deep orange yellow below, flesh yellow zoned with white. A splendid sort for shallow soil and produces enormously on rich ground.

1 oz., 15c; 1/4 lb., 25c; 1 lb., 75c.

Lane's Imperial Sugar—A very popular variety for stock and one which will succeed well in this latitude. The roots grow to a large size and it is more like a Mangel Wurzel in character but the flesh is sweeter and more tender, being finer grained. Especially valuable for poultry.

1 oz., 15c; 1/4 lb., 25c; 1 lb., 75c.

BROCCOLI

60 Italian Green Sprouting. A distinct variety extensively cultivated by Italian gardeners. Plant forms a large, solid head which remains green. When the central head is cut, numerous sprouts develop from the leaf axes, each sprout terminating in small green heads, which are bunched for market.

Pkt., 15c; oz., \$1.25.

BRUSSELS SPROUTS

A vegetable of the Cabbage family, which is largely used in the fall. It produces stalks about 2 feet high, which are covered with small, miniature heads, re-sembling small Cabbage. These are cooked and served like Cabbage and are very tender and delicious.

Culture—Same as for late Cabbage, but plants are set closer

together.

62 Perfection-A semi-dwarf variety and one of the best. Pkt., 10c; oz., 35c.

STIMUPLANT WONDER GARDEN

CABBAGE FINEST AMERICAN STOCKS

STIMUPLANT Makes a WONDER GARDEN

To raise the best crops of Cabbage, it is of the utmost importance that select seed stock be used. varieties we list are saved from the very best stocks and will give excellent satisfaction. We particularly call attention to Copenhagen Market and MC Late Flat Dutch, as being the leading sorts of the types. All home gardens should plant some Savoy Cabbage, as it is so much more delicious in flavor than the ordinary sorts. 1 oz. for 2,500 plants.

Culture—For earliest plants the seed is sown in hot beds from January to March. To make the best plants, sow early and transplant to cold frames. Then at the end of March or first of April, transplant to the garden. One ounce makes about fifteen hundred good plants. Six ounces makes plants enough for one acre. For

summer use, sow in the open ground in April and for late use, sow in May or June. There is no crop that repays so well, heavy fertilization and constant cultivation. When plants are planted in the field, apply sheep manure either in the drills or around the plant, mixing with the soil.

Yellows-Resistant Hollander—This is a strain of Hollander, or Danish Ballhead, which originated in Wisconsin. It is resistant to the Yellows or Wilt Disease, an infection frequently attributed to hot or dry weather. A heavy yielding, solid, round head type. Our stock seed is selected rigidly and continuously for type and resistance. We offer only first generation seed from such stock. Pkt., 10c; oz., 40c; ¼ lb., \$1.50.

CABBAGE

Golden Acre Cabbage

FIRST EARLY SORTS

64 Golden Acre—This is a new, early, round-headed Cabbage which closely resembles Copenhagen Market in type. As its name implies, it is a money-maker. It is 8 to 10 days earlier than Copenhagen Market but is smaller and can be planted closer. Because of its earliness and fine quality it commands a higher price than any round-headed Cabbage.

Pkt., 10c; oz., 60c; 1/4 lb., \$2.00.

65. Early Jersey Wakefield—One of the earliest and by far the surest heading of first early Cabbages. Most gardeners depend upon it entirely for their extra early crop. It is exceedingly hardy, resists cold and unfavorable conditions and is the most likely to yield satisfactory results. Plants are compact, with erect conical shaped heads and few outer leaves. Stems short; heads of medium size, very solid and of excellent quality.

Pkt., 10c; oz., 25c; 1/4 lb., 85c.

66 Early Winningstadt—One of the best conical or sharp heading sorts which is compact and of excellent quality. Quick maturing. It is the hardiest, not only as regards frost but will suffer less from excessive wet, drought, insects or disease than any other sort of its class.

Pkt., 10c; oz., 25c; 1/4 lb., 85c.

68 Copenhagen Market—The earliest round-head or flat Cabbage yet introduced. The heads are exceptionally large and it has a very short stem and few outer leaves—a most excellent sort for home gardens and market gardeners. On account of extreme earliness, it is destined to become one of the leading sorts grown, as a flat cabbage fills barrels or crates faster than sharp head cabbage and will yield the grower more returns. We predict for Copenhagen Market an extensive cultivation. Our stock of this is from one of the best Denmark growers.

Pkt., 10c; oz., 40c; 1/4 lb., \$1.50.

SECOND EARLY SORTS

72 All Seasons—One of the largest and a thoroughly satisfactory second early sort. Plants are vigorous, sure heading; leaves large and smooth. This is a first class sort both for early and late planting and is especially adapted for kraut. It is well adapted to stand the hot sun and adverse conditions.

Pkt., 10c; oz., 25c; 1/4 lb., 85c.

73 Early Dwarf Flat Dutch—A variety which has long been popular among growers, both for home use and markets. The heads are borne on short stems and are very large, solid and nearly flat on the top. Practically nearly every plant will form a good, solid head, which will mature earlier than Late Flat Dutch.

Pkt., 10c; oz., 25c; 1/4 lb., 85c.

74 Henderson's Early Summer—An excellent second early Cabbage, which is a vigorous, strong grower, producing moderately large heads. It has rather spreading outer leaves, which are somewhat frilled and the stem rather short. The heads are round, solid and a trifle earlier than other summer sorts, and in addition will stand longer without bursting than most others.

Pkt., 10c; oz., 25c; 1/4 lb., 85c.

75 Allhead Early—A popular sort which has been much planted in the East and produces good, round heads, similar to Early Summer. Its growth and characteristics are also about the same.

Pkt., 10c; oz., 25c; 1/4 lb., 85c.

CABBAGE—LATE SORTS

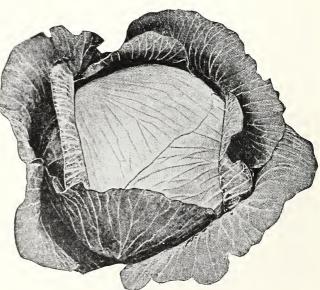

77 MC Late Flat Dutch—A very superior strain of this well-known popular Cabbage which is exceptionally reliable for main crop planting. It is short stemmed; has rather large early leaves, very showy heads and

produces uniformly large, flat, deep solid heads of splendid quality. It is an excellent keeper and can be relied upon as thoroughly satisfactory.

Pkt., 10c; oz., 25c; 1/4 lb., 85c.

78 Large Late Drumhead—One of the oldest and most popular of late sorts, producing large rounded heads. It has been grown for many years and our stock is an improved stock. The heads are somewhat more globe shaped than the Late Flat Dutch. Leaves large, loose, spreading. An excellent keeper.

Pkt., 10c; oz., 25c; 1/4 lb., 85c.

M Late Flat Dutch Cabbage

CABBAGE-Cont'd

CABBAGE-LATE SORTS-Cont'd

79 Danish Ballhead or Hollander—A variety though introduced but a comparatively short time has become one of the standard sorts in the Cabbage growing districts in the north. It produces very large, solid heads, which are globular in shape, has few but rather large, thick, bluish green leaves. Heads are borne on short stems, medium size, round, very solid and stands shipment better than any other late sorts. It is one of the very best keepers and is much desired for kraut. Our stock is Denmark grown and very select.

Pkt., 10c; oz., 30c; 1/4 lb., \$1.00.

81 American Perfection Drumhead Savoy—Too little attention is paid to the Savoy Cabbage in this locality, as for home gardens it is unquestionably the most desirable of all Cabbages. It is used almost entirely for late planting and attains its greatest per-

fection in flavor after frost, when it becomes as tender and even more delicious than Cauliflower. The heads are of medium size, borne on short stems and not as large as the ordinary late Cabbage, hence will stand closer planting. Our stock of this is American grown and will produce uniformly large heads for this variety. We strongly recommend it to be more extensively grown both for home use and market.

Pkt., 10c; oz., 30c; 1/4 lb., \$1.00.

82 Red—A variety used mainly for pickles and sauer-kraut. It is highly esteemed.

Pkt., 10c; oz., 30c; 1/4 lb., \$1.00.

CABBAGE PLANTS

We can supply nearby customers with Early and Late Cabbage Plants which we grow on our farms. We do not send these plants by mail.

CARROT—FINEST FRENCH STOCKS

An easily grown, useful and most healthful vegetable which should come into more extensive use. In Europe they are extremely popular, and as they add flavor to soups and meats, besides being healthful, delicious and to an extent ornamental, should be more largely used. In addition to their table uses, they make excellent pickles, and any that are left over are nutritious food for all kinds of stock and poultry.

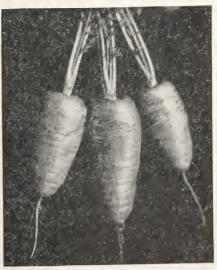

Culture—Carrots do best in rich, light loamy soil, and where the soil is shallow or stiff, select the short growing varieties, rather than the longest rooted sorts. For early crop sow in March; for main crop in April or May, in rows 18 inches apart, cultivating and weeding as soon as the plants are up. Continue in cultivation until maturity. Cover the seed half an inch deep and see that the soil is pressed firmly, thin 4 to 6 inches apart.

One ounce sows 200 feet of row. 3 or 4 lbs. per acre.

88 Oxheart (or Guerande)—A short, thick growing variety, especially adapted to stiff or hard soils. Roots four and a half to five inches long, very thick, ending abruptly in a small, tapering root. Flesh bright orange, finest quality, an excellent sort for market, home use and fine for stock feeding and poultry.

Pkt., 10c; oz., 15c; 1/4 lb., 40c.

89 Coreless Chantenay—An improved Chantenay having shorter tops and finer foliage, and a little earlier

Carrot Chantenay

in maturity than the regular Chantenay. Core and flesh rich orange color. The outstanding features of the strain are the smoothness and refinement of the roots, the excellent color of both the exterior and interior. The stock is very even, being uniform in size and appearance and the best variety for the market gardener and shipper.

Pkt., 10c; oz., 20c; 1/4 lb., 50c.

90 Chantenay—A medium early variety, orange red color, crisp and tender. Roots smooth, thick, five and a half to six inches long, uniformly stump rooted but tapering slightly. One of the best in quality and productiveness for either home garden or market and especially desirable for heavy soils, because it can be harvested easily.

Pkt., 10c; oz., 15c; 1/4 lb., 40c.

91 Half Long Danvers—A deep orange, tender variety, producing roots of medium length, six to eight inches long, tapering uniformly to a blunt point. They are very productive and well adapted to nearly all classes of soil for main crop planting.

Pkt., 10c; oz., 15c; 1/4 lb., 40c.

92 Nantes or Half Long Scarlet—A handsome variety, producing roots of medium size, slender with small necks. Roots usually five to six inches in length, sometimes longer. A good sort for moderately early planting.

Pkt., 10c; oz., 15c; 1/4 lb., 40c.

93 Improved Long Orange—A well-known popular sort, well adapted for loamy or deep soil, on which are produced very large crops. Roots deep orange color, usually about twelve inches long, three inches in diameter at the crown, tapering to a point. An excellent sort for table use, markets and particularly adapted for stock feeding. Roots tender and of good quality.

Pkt., 10c; oz., 15c; 1/4 lb., 40c.

CAULIFLOWER

One of the most delicious vegetables in cultivation but on account of its difficulty in growing, not so general in the average garden as it should be. Any one, however, can be reasonably sure of success if good seed is obtained and cultural instructions given below followed.

Culture—For early spring or summer crop sow the seed in January or February in hot beds. When the plants have four leaves, transplant to cold frames for development. Toward the end of March or early part of April, set in open field and cultivate the same as cabbage. If the soil gets very dry, water well when

CAULIFLOWER-Cont'd

possible. When the plants are set in the garden, the ground should be rich; if not so, a little sheep manure or well rotted manure should be worked into the soil before the plants are set out. The plants should be thoroughly worked during the growing season and when the heads commence to form, the leaves should be tied over the flowers to protect from the sun and make them white. For fall use, sow at the same time as for late cabbage and treat in the same manner. Cauliflower will not head in very hot weather—hence, for fall use, too early sowing is not desirable.

1/4 ounce produces about 500 plants. Three ounces will make enough plants to set one acre.

Cauliflower Plants Supplied in Season. Early Snowball and Early Dwarf Erfurt. We do not send these plants by mail.

96 Early Snowball—Unquestionably the earliest maturing strain of short leaf type of Cauliflower. It is

well adapted for forcing or winter use for early crop and is one of the most popular of all sorts both for the market gardener and home use. The plants are compact, leaves small, and can be adapted for close planting. Produces large size flowers pure white, of most excellent quality. Our strain of this is selected Denmark grown and can be relied on as one of the most satisfactory of all.

Pkt., 20c; oz., \$2.50.

97 Early Dwarf Erfurt—Similar in general characteristics to Early Snowball but not quite so early and somewhat larger in growth.

Pkt., 20c; oz., \$2.50.

CELERY

This is one of the most profitable crops for market gardeners where the acreage is small. It is popularly supposed to be a difficult crop to grow but this is not true if ordinary preparation and care are taken. It requires rich soil, heavy manuring, plenty of water and careful attention.

Culture—For earliest crop the seed should be sown in hot beds from the middle of February to the end of March. For main crop sow in open ground March or April, according to the weather, in rows 15 inches apart. The seed is sometimes slow to germinate, and in dry and hot weather water well. Careful weeding by hand will have to be done until the young plants get started. Seed sown in beds should be transplanted. When the plants are set in the open field, trim the tops off and put in rows about 5 feet apart, setting plants 6 to 8 inches apart. Cultivate constantly during the growing season, and as the crop matures it must be earthed up or blanched. Sometimes this is done by placing two boards upright, close to the plants and filling in dirt both on the sides and in between the plants. The stalks are handled by hand but the soil must not be allowed to get in the center. Sometimes, Celery is set in beds about 4 feet wide, 6 inches between plants, and 12 inches between rows, the earth being thrown out on each side of the bed. Then as it grows it is earthed in for blanching. A new method of growing Celery, which is sometimes used, is to plant a plot completely over, setting plants about 6 inches apart. This enormous growth shades the young stalks so that they turn white but it requires exceedingly rich, heavily manured soil, deep and well drained and plenty of water for irrigation. An ounce sown in about 100 feet produces 5 to 8,000 plants. 4 to 6 ounces produce plants to the kind and location.

100 Improved White Plume—An extra early and very handsome sort which is very popular with market gardeners, especially for very early crop. Leaves are light, bright green at the base, shading nearly white at the tip. As plants mature, the inner stem and leaves turn white and consequently require less earthing and blanching before they are in condition to use or market. While it is very attractive and the earliest sort, its quality is not nearly so good as that of most other

varieties, being somewhat stringy and not so tender Pkt., 10c; oz., 30c; ¼ lb., \$1.00.

101 Golden Self Blanching—This is not only a very early variety but one of the best for home use or market. It is not quite so early as White Plume but so much finer quality that it is generally preferred as a main crop sort. Plants are medium size, compact and stocky with yellowish green foliage. As they mature, the inner stem turns a beautiful yellow golden color and blanching is easily accomplished. Being of handsome color, very crisp, tender, free from stringiness and of fine flavor, it is the leading sort grown.

Pkt., 10c; oz., 35c; 1/4 lb., \$1.25.

102 Giant Pascal—A green leafed variety of the Golden Self Blanching type, from which it was developed, and one of the best for fall and early winter use. It blanches a beautiful yellowish white, is very solid and crisp and has a fine nutty flavor. Stalks of medium height, thick, solid, flattening towards the base and one of the best for main or late planting.

Pkt., 10c; oz., 25c; 1/4 lb., 85c.

105 Celeriac or Turnip Rooted Celery—Very popular with the French and Germans and is used for its roots only, which have a fine sweet, nutty celery taste. It is used either boiled or raw, has a delightful flavor and can be used in soups, salads or as a table vegetable. Culture about the same as for Celery.

Pkt., 10c; oz., 25c; 1/4 lb., 85c.

Celery Plants supplied in season. (June, July, August.) Varieties, White Plume, Golden Heart and Golden Self Blanching. We do not send these plants by mail.

COLLARDS

One of the most popular Southern vegetables; largely used in place of cabbage. It is hardier and easier to grow than cabbage, can be grown on poorer soil and withstand insect attacks better. Although often sown during the spring and summer, the principal sowings are made in June, July and August, transplanted 2 feet apart in the row and given frequent cultivation. A

most excellent vegetable for the late fall, winter and early spring. The flavor is improved by frost. Cultivate like late cabbage.

109 True Georgia or Southern—Stands cold weather and adverse conditions splendidly and grows on land too poor to make a crop of cabbage.

Pkt., 10c; oz., 15c; \(\frac{1}{4} \) lb., 30c.

CORN—GARDEN SORTS

Packets and half pints postage paid.

For pints remit 7c, for quarts 10c, if to be sent by mail.

One pint plants about 200 hills, six to eight quarts to an acre. For succession planting about every two weeks from April to end of July; ready for the table 60 to 90 days from planting.

Culture—Extra Early Dent Corn can be planted at the end of March or early in April. Sugar corns are more tender and should not be planted until warm weather is settled and ground becomes warm. Cultivate frequently and keep the ground free of weeds.

SEED CORN TREATMENT REDUCES DISEASE DAMAGE

Seed disinfection with Improved Semesan, Jr., will help greatly to prevent damages by diseases to the roots, stalks and ears of Field and Sweet Corn. It protects seed against rotting, permits earlier planting, increases germination, controls blight and increases crop yields. See page 75.

EARLY DENT GARDEN CORNS

These are not Sugar Corns but valuable for their hardiness as they can be planted earlier and will mature quicker than Sugar Corns—hence, usually very profitable for market gardeners.

110 Extra Early Adams—The earliest variety and extensively used for first early table corn in the South. Stalks about 4 ft. high with few leaves and without suckers. Ears short, very full, 12 to 14 rows, kernels white and smooth; an extremely hardy sort; can be planted close together and usually popular.

Pkt., 10c; ½ pt., 15c; pt., 20c; qt., 35c; 4 qts.,

\$1.15.

111 Early Adams-A little larger and later sort of about the same characteristics as Extra Early Adams. Stalks about 6 ft. high, ears 12 to 14 rows and a good variety for second early or very late planting. Pkt., 10c; ½ pt., 15c; pt., 20c; qt., 35c; 4 qts.,

\$1.15.

YELLOW SWEET CORN

112 FMC Selected Northern Grown Bantam-The most popular variety of yellow Sweet Corn ever offered; also one of the earliest and hardiest. It can be planted safely earlier than other varieties. The plants rarely grow over $3\frac{1}{2}$ feet in height, and usually bear at least two ears, 5 or 6 inches long, on each stalk. Many people assert that Golden Bantam is the sweetest of all Corns; its plump, rich, creamyellow kernels are tender, milky and delicious. All our Golden Bantam seed is Northern grown, making it especially valuable for early planting.

Pkt., 10c; ½ pt., 15c; pt., 25c; qt., 40c; 4 qts.,

\$1.40.

113 Wonder Bantam-There has been an ever increasing demand for an early Sweet Corn having all of the good qualities of Golden Bantam Sweet Corn, together with a larger ear and having about the same maturing season. To accomplish this, Wonder Bantam has been introduced by the crossing of Early Wonder and Golden Bantam Sweet Corn. The stalks grow from 5 to 6 feet in height and have ears 8 to 10 inches in length filled with 8 rows of rich golden colored kernels. It is a variety that will appeal to the critical market and home gardener.

Pkt., 10c; ½ pt., 20c; pt., 35c; qt., 65c; 4 qts.,

\$2.40.

Golden Sunshine-The earliest of the Golden Bantam type, maturing a week to ten days earlier than that variety. More dwarf in habit than Bantam, with ears 6½ inches long, containing 12 rows of broad, yellow, sweet grains. Especially desirable for its extreme earliness.

Pkt., 10c; ½ pt., 20c; pt., 35c; qt., 65c; 4 qts., \$2.40.

115 Bantam Evergreen—A cross between Golden Bantam and Stowell's Evergreen and is a most excellent sort of fine quality. The ears average 8 inches long and are 12-rowed, the grain is rather broad and deep and of a rich golden-vellow color.

Pkt., 10c; ½ pt., 20c; pt., 35c; qt., 65c; 4 qts.,

\$2.40.

Adams Extra Early Corn

EARLY SWEET CORN

Sweet or Sugar Corns are so much superior for table use to the ordinary dent or field varieties, that they should be planted exclusively for this purpose except for very earliest crops. They are very prolific, producing in many cases 3 to 4 good ears to the stalk. As a market crop, corn is very profitable, as an acre produces from 800 to a 1000 dozen ears which sell readily at good prices.

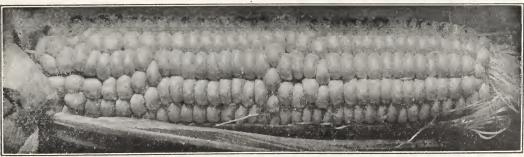

116 Whipple's Early-Of the narrow-grained Evergreen type, but ready for use much earlier. Ears 8 to 9 inches long, 16 to 18 rows of pearly white grains. The chief distinction of this variety is that it is by far the earliest of the narrow-grained Evergreen types and has

a larger sugar content.

Pkt., 10c; ½ pt., 20c; pt., 30c; qt., 55c; 4 qts., \$2.00.

117 Early Evergreen—An early strain of Evergreen of great value. This variety resembles the Stowell's Evergreen, but is ready for use much earlier, and remains in good condition equally as long. The ears grow to a good size, usually about 7 inches long, and contain from 16 to 18 rows of deep, sweet grains.

Pkt., 10c; ½ pt., 20c; pt., 35c; qt., 65c; 4 qts., \$2,40.

Golden Bantam

CORN—SWEET OR SUGAR

Black Mexican—For home use we consider this one of the best second-early sorts where tenderness and sweetness are the qualities most desired. The stalks grow about 6½ feet high, producing ears usually 8 inches long and 8-rowed. The dry grain is dark bluish black. The ripe corn on the cob is also bluish black but, if used young, this corn cooks remarkably white. This is an interesting variety

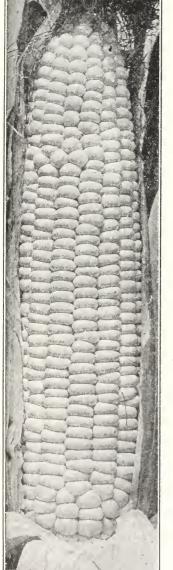

Pkt., 10c; ½ pt., 20c; pt., 30c; qt., 55c; 4 qts.,

\$2.00.

Mammoth White Cory-One of the best, extra 119 early corns producing very large ears for so early a variety. Stalks about 4 ft. high, generally bearing 2 large finely shaped ears which become fit for use very early. Grains large, broad, very white, of fine quality and usually 12 rows to the cob. A splendid sort for private gardens and probably the most profitable for early market gardens.

Pkt., 10c; ½ pt., 20c; pt., 30c; qt., 55c; 4 qts.,

\$2.00.

Stowell's Evergreen Corn

120 Early Mammoth-Resembling the well-known Late Mammoth in general characteristics but 10 days to two weeks earlier and slightly smaller in size.

Pkt., 10c; ½ pt., 20c; pt., 30c; qt., 55c; 4 qts., \$2.00.

121 Howling Mob—A variety a little later than Mammoth White Cory. Ears measure seven to nine inches in length, twelve to fourteen rows; white grains. Stalks strong, of vigorous growth, four and a half to five feet in height, have abundant foliage and usually produces 2 good ears to the stalk.

Pkt., 10c; ½ pt., 20c; pt., 30c; qt., 55c; 4 qts., \$2.00.

122 Kendel's Early Giant-A remarkably large eared second-early sort which is very popular in some sections. Ears are 8 to 9 inches long, 12-row; grains broad, rather shallow but the quality is good.

Pkt., 10c; ½ pt., 20c; pt., 30c; qt., 55c; 4 qts.,

\$2.00.

SWEET CORN—MAIN CROP

124 Country Gentleman-Probably the most popular of all sorts for home gardens on account of its sweetness, tenderness and delicious flavor. Ears 7 to 8 inches long, round, medium size. Grains zigzag or staggered, small in size but set close on the cob and very deep.

Pkt., 10c; ½ pt., 20c; pt., 35c; qt., 65c; 4 qts., \$2.40.

125 Stowell's Evergreen—One of the standard main crop sorts which has long been popular with commercial growers, canners and one of the best for home gardens. It is hardy, thrifty, productive, very tender and sugary and remains in edible state longer than most other sorts. Ears 7 to 8 inches long, having 14 to 20 rows of very deep grain. Stalks 8 to 9 ft. high, bearing 2 or 3 large ears

Pkt., 10c; ½ pt., 20c; pt., 35c; qt., 65c; 4 qts., \$2.40.

Zig-Zag 126 Evergreen—A development of the Stowell's Evergreen which has become very popular. The rows instead of being straight are irregular; the grains set very close on the cob. Ears are 8 inches long, large grains, very deep, sugary, tender and of fine flavor. This is becoming a very popular sort and in many sections is superseding the well-known Stowell's Evergreen.

Pkt., 10c; ½ pt., 20c; pt., 35c; qt., 65c; 4 qts., \$2.40.

Late Mammoth—The largest and latest of all Sugar Corns, producing ears which are about 11 inches long, 16 to 18-rowed. Grains are broad, somewhat short but of good flavor, sweet, tender and delicious. One of the best sorts for late crop, especially for market. Pkt., 10c; ½ pt., 20c; pt., 35c; qt., 65c; 4 qts.,

Club Zig-Zag Evergreen—A late variety of Zig-Zag Evergreen Corn, the ear generally being twice the size in diameter of any other sort and of a fine, sweet flavor.

Pkt., 10c; ½ pt., 25c; pt., 40c; qt., 75c; 4 qts., \$2.75.

POP CORN

A very profitable crop in many sections and grown in enormous quantities. It is popularly "the boys' crop" and all gardens should have a small quantity. 129 Rice—A well-known white sort with pointed grains; very highly prized for popping and most satisfactory. 1/4 lb., 10c; 1 lb., 20c.

White Pearl—A smooth grained sort making fair sized ears; grains pearly white reliable for popping. 1/4 lb., 10c; 1 lb., 20c.

CORN SALAD

An excellent salad for winter and spring. The seed is sown in August or September, in drills one foot apart. Press on the soil to make it firm and it will germinate better. As freezing weather approaches cover with straw or coarse litter. Seed can also be sown very early in the spring if on rich soil.

132 Large Seeded—Round leaved, the best variety.

Pkt., 10c; oz., 15c; 1/4 lb., 40c.

Corn Salad

CUCUMBER

Usually a profitable crop for market, as if not salable for table uses, finds a fair market with pickle factories. All home gardens should grow Cucumbers, as they are useful as a salad or for pickling. Cucumbers fresh from the garden are much superior to those purchased, which are often wilted.

One ounce plants 50 hills; two pounds to one acre. Plant in April or May for early crop; ready for the table 50 to 75 days from planting.

Culture—Rich soil or one containing plenty of well-rotted manure is best; hence hills are usually made about 4 feet apart using manure or sheep manure well mixed with the soil. For very earliest crop the seed may be started in hot beds, in pots, small paper boxes, or pieces of sod, grass side down, so that they can be readily transplanted to open ground without disturbing the roots. For earliest crop outdoors plant 8 to 10 seeds in hills or drills 4 feet apart. On cold nights or threatened frost they can be protected by pieces of paper weighted with earth; after danger of frost and destruction by insects, thin the plants to about 4 to the hill. For late crop plant from the end of May until July. Cultivate occasionally, keeping the grass and weeds out, and when the fruit is ready for use, pick whether wanted or not, as it will extend the life and productiveness of the vines.

134 Longfellow—The Longfellow is a White Spine type, developed so that it would have the slender, darkgreen appearance of a hothouse cucumber but which could be still be grown outdoors. Vines are vigorous and productive. Fruits 12 to 14 inches long and 2½ inches in diameter. Can be grown in the garden or greenhouse and stands shipping well.

Pkt., 10c; oz., 20c; 1/4 lb., 60c; 1 lb., \$2.00.

135 Improved Early White Spine—One of the best sorts for table use and probably the most popular sort grown by market gardeners and truckers. The vines are vigorous, producing fruit early and abundantly. Fruits are uniformly straight, about 8 inches long, vivid green color changing to and streaked a whitish green at the tip.

Pkt., 10c; oz., 15c; 1/4 lb., 40c; 1 lb., \$1.25.

136 Improved Long Green—One of the most popular sorts for home gardens and in country districts for home markets. Fruits are very long, often 12 inches, slender and uniformly dark green color. It is rather late maturing. The vines are very vigorous and fairly productive. The matured fruits are excellent and tender for table use and both large and small can be used for pickling.

Pkt., 10c; oz., 15c; 1/4 lb., 40c; 1 lb., \$1.25.

137 Davis Perfect—A development by crossing the Improved Long Green with an English Frame Variety. It is dark, rich green color, slightly tipped with white at the end; has very few seeds and excellent for slicing. Fruits are often 12 inches long, very slim and showy. Particularly fine for home gardens.

Pkt., 10c; oz., 15c; ½ 1b., 40c; 1 lb., \$1.25.

138 Early Frame—A well-known short, green variety, producing quite abundantly, uniformly straight moderate sized fruit. Valuable for very early planting or for late use for pickling as it is more prolific than the large fruited sorts.

Pkt., 10c; oz., 15c; 1/4 lb., 40c; 1 lb., \$1.25.

140 Early Fortune—The finest type of White Spine yet produced. Early and very productive; fruits grow 9 inches long, slightly tapering, flesh white, firm and crisp with very few seeds; color dark green. Quality is excellent, either when sliced for use at the table, or for making pickles.

Pkt., 10c; oz., 15c; \(\frac{1}{4} \) lb., 40c; 1 lb., \(\\$1.25. \)

141 Jersey Pickling—A variety shorter than Long Green, slender and produces very abundantly. Vines are vigorous and productive. A very popular main crop sort for market and commercial uses.

Pkt., 10c; oz., 15c; 1/4 lb., 40c; 1 lb., \$1.25.

Improved White Spine Cucumber

143 Nichol's Medium Green—A variety intermediate in length between the White Spine and Long Green, producing straight, medium sized cylindrical fruits of dark green color, which are most excellent for slicing and extremely popular for pickling. Vines, vigorous, productive. A very profitable variety for canners and commercial growers for late crop.

Pkt., 10c; oz., 15c; 1/4 lb., 40c; 1 lb., \$1.25.

144 Early Green Cluster—Short and prickly; bearing in clusters; prolific; fine for bottling.

Pkt., 10c; oz., 15c; 1/4 lb., 40c; 1 lb., \$1.25.

145 White Wonder—Fruit, produced in clusters, is symmetrical, short, blocky and rounded at both ends; color ivory-white from time of forming until maturity; moderately productive.

Pkt., 10c; oz., 15c; 1/4 lb., 40c; 1 lb., \$1.25.

147 Gherkin or Burr Cucumber—Grown exclusively for pickles and especially for mangoes and sweet pickles. The fruits are small, oval, prickly and produced abundantly. Vines are longer and more vigorous than cucumber vines—hence, requires a little more space. The seed is distinctly smaller than other cucumbers.

Pkt., 10c; oz., 15c; \(\frac{1}{4} \) lb., 50c; 1 lb., \(\\$1.50. \)

EGG PLANT

A well-known popular vegetable which produces large purple fruits. It is served mostly fried. Seed germinates slowly and should be started in hot bed.

One ounce produces 1500 plants. ounces will produce enough to set one acre. Ready for table in 120 days from sowing.

Culture-Sow in February or March in warm hot beds. When the plants have two rough leaves, transplant to 3 or 4 inches apart or into small pots; after all danger of frost is past, say about the middle or end of May, transplant to the garden, setting plants about three feet apart each way. It is desirable to protect the young plants from very hot sun at first.

Black Beauty—Ten days to two weeks earlier than New York Improved Purple. Fruits slightly longer and darker than this variety, being rich dark purple, large and symmetrical. It is very desirable for market as it holds its color a long time. It is entirely free from spines; splendid for early crop or very late planting.

Pkt., 10c; oz., 40c; ½ lb., \$1.50.

149 New York Improved Purple (Spineless)-This has long been a general favorite both for market gardeners and home use. It is the largest variety in cultivation and one of the best. The plant is robust, usually producing 4 to 6 large, oval fruits of splendid dark purple color.

Pkt., 10c; oz., 40c; 1/4 lb., \$1.50.

Plants—Ready in May. We do not send these plants by mail.

ENDIVE

One of the best salads for fall and winter use and sometimes used for greens, flavoring soups and stews. It may be grown at any season but is more generally planted for fall.

Culture—For early use, sow about April 15th; for late use, sow in August, in drills 18 inches apart, and when large enough thin out to about one foot apart. When nearly grown tie the outer leaves together over the center in order to blanch up the heart. By covering fresh plants every few days a succession may be kept up. ½-oz. to 100 ft. row.

Green Curled Endive

150 Green Curled—One of the hardiest and best varieties for general use. It has deep green leaves, beautifully cut and curled and is early blanched; is very crisp, tender and of fine flavor.

Pkt., 10c; oz., 15c; 1/4 lb., 45c.

151 Broaf Leaf Batavian (Escarolle)—A variety having broad, more or less twisted, waved, bright green leaves with thick white mid-ribs. It is much larger in growth than other sorts and has a flavor

all its own.

The inner leaves form a very solid, clustering head; are blanched a beautiful deep, creamy white; crisp; tender and of fine flavor. Very highly esteemed by the French and popular wherever used.

Pkt., 10c; oz., 15c; 1/4 lb., 45c.

152 Moss Curled—A compact growing variety forming large dense clusters, finely divided, medium green leaves. When properly blanched is rich creamy white and tender. An ornamental variety for salads.

Pkt., 10c; oz., 15c; 1/4 lb., 45c.

GARLIC

A bulbous rooted plant of the Onion family, with a strong penetrating odor; very desirable for flavoring both cooked vegetables, soups, etc., as well as salads. Garlic does not have seed and is planted from small bulbs only. Plant same as Onions in rows 8 to 12 inches apart; set bulbs 4 inches apart in the row, covering 2 inches deep. When the leaves turn yellow, take up the bulbs, dry in the shade and store in a dry loft as you would Onions.

Bulbs-1/4 lb., 20c; 1 lb., 50c.

HERBS

Most of these should be sown in April and can be transplanted when large enough. The seed is small and should be sown in drills and firmed down. clean of weeds. Most of them are to be cut when in bloom, wilted in the sun, and dried thoroughly in the shade.

Caraway Seed for Flavoring, ¼ lb., 10c; 1 lb., 20c.

Dill—A popular aromatic Annual Herb which is 157 largely used for seasoning pickles, sauces, soups, etc. Pkt., 10c; oz., 20c.

158 Fennel (Sweet)—A hardy perennial, the seeds of which are used for flavoring sauces, especially for fish; as well as confectionery and cakes. Fennel (Sweet) for Flavoring, per lb., 30c.

Sage—One of the most extensively used plants for seasoning. It is a hardy perennial growing about 15 to 18 inches high.

Pkt., 10c; oz., 40c.

Blue Poppy for Flavoring, per lb., 25c.

Yellow Mustard for Flavoring, per lb., 25c.

KALE

A popular crop for fall, winter and spring use as greens. In the South it is boiled with bacon. Excellent for garnishing. In addition to its table uses it is a splendid soil improver and very nutritious as a grazing crop for cattle, hogs or sheep.

Culture-In this section it is usually sown broadcast from

the middle of August to the middle of October at the rate of 3 or 4 the middle of August to the middle of October at the rate of 3 or 4 pounds to the acre. Scotch Kale is sown earlier and when very early is usually sown in drills. In the spring seed can be sown in February, March and April. Spring sown Kale requires 5 to 6 pounds to the acre and Smooth Kale should have 6 to 3 pounds to the acre. The ground should be prepared cleanly and harrowed as finely as possible. Seed can be covered with a smoothing harrow or roller but not covered too deep.

KALE—Cont'd

164 Dwarf Green Curled-An old standard winter variety in this section. Leaves are light green in color, tinged with purple, beautifully curled, and when properly cooked make a very palatable dish of greens. In this locality, will stand the winter.

Pkt., 10c; oz., 15c; \(\frac{1}{4}\) lb., 30c; 1 lb., 85c.

warf Green Curled Kale

165 Dwarf Curled Siberian—A vigorous growing sort of spreading habit, its green foliage having a distinctive bluish tinge or bloom. Very hardy and a favorite in many sections both for greens and extensively grown for forage.

Pkt., 10c; oz., 15c; 1/4 lb., 25c; 1 lb., 75c.

166 Dwarf Green Curled Scotch—A finely curled, spreading, low growing variety, which is very popular around many trucking centers, especially in the East. The leaves are attractive, bright green color and beautifully curled which make it excellent for garnishing. It must be sown earlier than other sorts; usually from July until end of August or can be sown in March. Can be sown either in drills or broadcast.

Pkt., 10c; oz., 15c; 1/4 lb., 40c; 1 lb., \$1.00. 167 Tall Curled Scotch—Leaves green, beautifully curled and wrinkled—grows about 2 feet in height; hardy, being improved by frost.

Pkt., 10c; oz., 15c; 1/4 lb., 40c; 1 lb., \$1.00.

White Vienna Kohl-Rabi

KOHL-RABI

A vegetable intermediate between a Cabbage and a Turnip which combines the flavor of both. It forms a turnip-shaped bulb above ground which is boiled and served like Turnips. If used when young is tender and a very desirable vegetable.

Culture-For early use sow in hot beds and transplant. of doors sow in open ground the first part of April in rows 18 inches apart; thin out or transplant to 6 inches apart in the row. Cultivate same as Cabbage. It can also be sown the latter part of June or in July for fall use. One ounce will sow 300 feet of drill.

168 Early Purple Vienna-Very early with small tops, bulbs good size. A variety of good quality. Pkt., 10c; oz., 25c; ¼ lb., 65c.

169 Early White Vienna—An excellent sort for general use, has white tender flesh of pleasant flavor. Pkt., 10c., oz., 25c; 1/4 lb., 65c.

LETTUCE

A popular crop in all small gardens and one of the most profitable for market gardeners, both for winter forcing and for summer growing providing the weather is seasonable or irrigation can be done.

Culture—For Winter Forcing—Sow from September to February, the curled varieties about every four weeks apart or the heading sorts about six weeks apart. As one crop is cut, another should be

ready for planting.

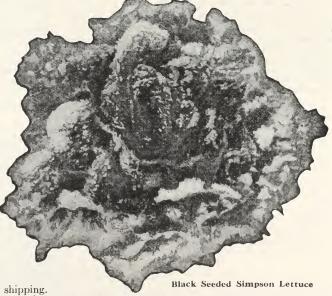

Out of Doors-For early spring crop, plants can be started in hot beds and transplanted to can be started in not ocus and transplanted to rows one foot apart, setting the plants 6 to 8 inches apart in the row. Later sow seed in rows 12 to 15 inches apart and thin out or transplant if desired leaving the heads to stand 6 to 8 inches apart in the row. A succession of varieties should be kept up from early summer until late fall.

One ounce sows 300 feet of drill. Three pounds one acre. One ounce produces about 4,000 plants; an acre requires about 50,000 plants set 8 x 15 inches.

CURLED OR LOOSE-HEAD VARIETIES

172 Grand Rapids—The most popular variety for green house forcing, especially for shipping. It is of quick growth, hardy and not liable to rot; remains in good condition several days after being fit to cut. Plants are upright and uniform; leaves finely crimpled at the edges. It is the heaviest loose-headed sort, will stand shipping better and is a very attractive variety.

Pkt., 10c; oz., 20c; 1/4 lb., 50c.

173 Black Seeded Simpson—The best sort for nearby markets and for home gardens on account of its superior quality. It forms a large, loose head, very bright green, nearly white and is exceedingly tender. Is largely used for forcing under glass and a superior sort for earlier crop. Pkt., 10c; oz., 20c; 1/4 lb., 50c.

LETTUCE—Cont'd

CURLED OR LOOSE-HEAD VARIETIES —Cont'd

174 Early Curled Simpson (White Seeded)—Makes a large, loose curled head similar to Black Seeded Simpson. Particularly adapted for sowing thickly and cutting when the plants are young. Leaves light green, slightly frilled, much blistered, crisp, sweet and tender.

Pkt., 10c; oz., 20c; 1/4 lb., 50c.

175 Early Curled Silesian—An old and very popular variety which is probably the earliest and quickest sort grown. Plants loose, not quite so large as Black Seeded Simpson. Popular for outside.

Pkt., 10c; oz., 20c; 1/4 lb., 50c.

176 Early Prize Head—A large clustering, non-heading sort, most excellent for home gardens as it is very early. It is too tender for shipping. Leaves are finely curled and crumpled, bright green tinged with brownish red; very crisp and tender.

Pkt., 10c; oz., 20c; ½ lb., 50c.

CABBAGE OR HEADING VARIETIES

178 Iceberg—A beautiful lettuce, with large curly leaves of a bright, light green, with a very slight reddish tint at the edges. Handsome heads, unusually solid because of the natural tendency of the large, strong leaves to turn in which also causes thorough blanching. Crisp, tender and fine flavor.

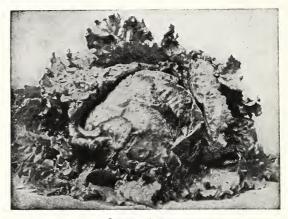

Pkt., 10c; oz., 20c; 1/4 lb., 50c.

179 Top Notch—A distinctly improved variety of Big Boston and one of the very best for forcing or out-of-door culture. Under favorable conditions the heads will measure 10 to 12 inches across; are bright, lively green color without the brownish marking of Big Boston. The heart and inner leaves are pure white. It is deliciously flavored, very tender, of splendid quality and highly recommended for extensive market growing or home use as it will be found thoroughly reliable in heading and the most profitable of this type.

Pkt., 10c; oz., 20c; 1/4 lb., 50c.

180 Big Boston—This has long been a favorite sort with market gardeners and truck growers and in some sections is planted almost exclusively. It forms a large compact head, forces well in frames and thoroughly satisfactory for outdoor crops in the spring or very late head crop in the fall. Leaves are broad, comparatively smooth, color bright light green. The heads slightly tinged with reddish brown.

Pkt., 10c; oz., 20c; 1/4 lb., 50c.

Improved Hanson

181 California Cream Butter—A splendid sort for second early crop which has glossy, deep green leaves, the outer ones slightly splashed with brown, it forms a large, very solid head, rich light yellow in color, very tender and buttery. A reliable sort for market or home gardens.

Pkt., 10c; oz., 20c; 1/4 lb., 50c.

182 Improved Hanson—A splendid summer heading sort and probably the most popular of its class in this section. The plant is compact, forming a large cabbage-like head which remains in good condition a long time. The outer leaves are yellowish-green, somewhat crumpled with a large distinctive mid-rib. The inner leaves white, sweet and tender. This variety is a little coarse in quality, but on account of its large size and general reliable summer heading qualities, is profitable and desirable for summer use.

Pkt., 10c; oz., 20c; 1/4 lb., 50c.

183 New York Lettuce—Blanches beautifully. Crisp, tender and free from bitterness.

It produces immense heads, often 15 and 16 inches across, and weighing enormously. The interior is beautifully blanched, creamy-white, crisp, tender and delicious, being absolutely free from any trace of bitterness. It is a very large, robust growing variety, rooting deeply, resisting hot, dry weather, very slow to run to seed and a sure header under most trying conditions.

Pkt., 10c; oz., 25c; 1/4 lb., 75c.

MUSK MELON OR CANTALOUPE

These can be successfully grown in nearly all gardens. If the soil is very rich and heavy, Salmon-fleshed sorts will produce the best. If light or loamy, greenfleshed sorts will succeed admirably. Among greenfleshed sorts the "Rocky Ford" is one of the best. In salmon flesh sorts, "Burrells' Gem", "Tip Top" are among the best.

One ounce plants 50 hills; two pounds to one

acre. Plant in May for early crop; in June for late crop.

Culture—Seed is planted in hills 6 ft. apart, putting 10 to 12 seeds to the hill and covering one inch deep. If land is not rich, use well-rotted manure or a little sheep manure mixed with the soil. When danger of insects is over, thin out to 4 plants to the hill.

Packets, ounces and $\frac{1}{4}$ lb., mailed free; for pound, 7c extra if to be sent by mail.

GREEN FLESHED VARIETIES

189 Honey Ball—This new melon is one of the most prolific and earliest grown, as it matures in approximately 105 days. It is round as a ball and the green meat is similar in texture to the Honey Dew, about $1\frac{1}{2}$ inches thick and covered by a smooth, thin rind, fairly well netted. Its color is greenish white until it is fully ripe, when it turns a creamy white or bright yellow. It has a high sugar content and a delicious flavor. It is a favorite among melon growers. Pkt., 10c; oz., 20c; $\frac{1}{2}$ 1b., 50c.

MUSK MELON OR CANTALOUPE-Cont'd

GREEN FLESHED VARIETIES-Cont'd

190 Honey Dew—Its name has been well chosen; as it is about as sweet as Honey. The average size is about 6 inches in diameter, and they weigh five to six pounds. The skin is smooth with little netting and of creamy yellow when ripe. The flesh is a beautiful green next to the outside rind shading to light green at the center. It is very thick, fine grained and can be eaten almost to the rind and the seed cavity is quite small.

Pkt., 10c; oz., 20c; 1/4 lb., 50c.

191 Rocky Ford—The flesh is green, thick, with small cavity, very sweet and has that spicy flavor that makes a cantaloupe so delicious. The melons are oval shaped, slightly ribbed, well covered with fine netting, and are uniform in size and shape.

Pkt., 10c; oz., 15c; 1/4 lb., 40c.

193 Green Nutmeg (or Jenny Lind)—Fruits small, somewhat flattened, deeply ribbed and netted. Flesh green, exceedingly sweet. An extra early variety and on account of its size, a desirable table melon. Vines vigorous and productive.

Pkt., 10c; oz., 15c; 1/4 lb., 40c.

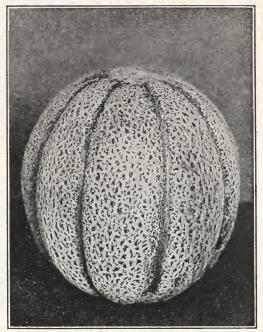

194 Acme or Baltimore Market—Similar in shape to Rocky Ford but larger. Flesh is thick, green, well flavored and sweet. Very productive and a sure cropper. One of the most desirable of the large or medium size melons.

Pkt., 10c; oz., 15c; 1/4 lb., 40c.

195 Extra Early Hackensack—Two weeks earlier than the Large Hackensack and produces medium sized fruit, somewhat flattened, evenly deep ribs with coarse netting. The flesh is green, slightly tinged with yellow, juicy and sweet.

Pkt., 10c; oz., 15c; 1/4 lb., 40c.

196 Large Hackensack (or Turk's Cap)—An old and well-known sort which produces very large green-

Rocky Ford

fleshed fruits which are nearly round and flattened. Flesh green, thick, juicy and sweet.

Pkt., 10c; oz., 15c; 1/4 lb., 40c.

SALMON FLESHED VARIETIES

197 Hearts of Gold or Improved Hoodoo—A new orange-fleshed variety, ideal as a shipping melon and of the very finest quality. Fruits uniformly of medium size. Rind thin yet very firm. Flesh very thick, firm, of fine texture and delicious flavor.

Pkt., 10c; oz., 15c; 1/4 lb., 50c.

198 Pollock's No. 10-25—Best described as a salmon tinted Rocky Ford, being identical in every way except color of flesh, which is a light salmon in color at the center, shading into a light green midway to the

rind. It is rapidly superseding the green fleshed variety in the large melon growing districts of the South and West.

Pkt., 10c; oz., 15c; 1/4 lb., 40c.

199 Emerald Gem—An early yellow fleshed melon of small to medium size which is one of the very best for home gardens. Vines vigorous and productive. Fruits globe shaped, flattened, somewhatirregularly ribbed and very slightly netted. Outer skin dark green when young, becoming slightly tinged with yellow. Flesh deep salmon yellow, thick, melting and very highly flavored.

Pkt., 10c; oz., 15c; \(\frac{1}{4} \) lb., 40c.

200 Tip Top—A popular sort with market gardeners, producing very large sized melons, ribbed but almost smooth skin. Flesh salmon, very deep, a little coarse but exceedingly sweet and luscious. Especially desirable for very rich soil and one of the most profitable for market.

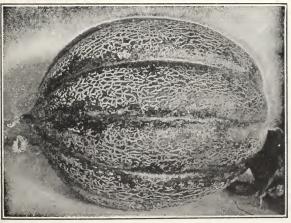

Pkt., 10c.; oz., 15c; 1/4 lb., 40c.

202 Osage or Miller's Cream—A medium salmon fleshed melon of excellent quality. Fruits are oval, dark green, slightly ribbed, tinged with grey. Flesh salmon color, thick and highly flavored. A splendid sort for late or main crop, especially for market.

Pkt., 10c; oz., 15c; 1/4 lb., 40c.

203 Banana—A long, smooth skinned variety, growing something in the shape of long squash. Fruit about 12 inches long, salmon flesh, which is very sweet, luscious and tender. Much esteemed in some localities.

Pkt., 10c; oz., 15c; 1/4 lb., 40c.

Hearts of Gold or Improved Hoodoo

WATERMELON

Watermelons do best on old, rich soil, which is not too freshly manured, hence when making the hills, well rotted manure should be used, and it is better to prepare them some time ahead before planting the seed. If manure cannot be obtained, use good commercial fertilizer or sheep manure mixed with the soil.

One ounce plants 20 hills. 4 lbs. per acre. Plant early in May or for later use, in June.

Culture—Treat as for Musk Melon, but give more room, 10 or 12 feet apart each way.

204 Ribault—Long and thick in shape, measuring 24 to 30 inches long. The color is dark green, indistinctly striped, mingled with lighter green. The rind is medium thick and stands shipping well. The meat is red and sweet, free from hard centers. Very prolific and of splendid quality.

Pkt., 10c; oz., 15c; $\frac{1}{4}$ lb., 40c; 1 lb., \$1.00.

205 Stone Mountain or Dixie Bell—A melon of finest quality and claimed to be the sweetest of all the large melons. It is almost round and has a dark green, medium thick rind. Flesh, rich scarlet. It is not unusual to grow Stone Mountains weighing 70 to 80 pounds. For home use and nearby markets it is unexcelled.

Pkt., 10c; oz., 20c; $\frac{1}{4}$ lb., 50c; 1 lb., \$1.50.

206 Excel—Will produce more large, marketable melons under the same conditions than any of the other sorts of the long variety and its carrying and keeping qualities are unsurpassed. Fruits oblong in shape, dark green color with tracings of light green. Flesh deep red, crisp and tender. Weight, 35 to 60 pounds.

Pkt., 10c; oz., 15c; 1/4 lb., 30c; 1 lb., 85c.

207 Tom Watson—A long, dark green melon, which has become exceedingly popular on account of its large size and general fine qualities. Vines are vigorous and productive. Flesh rich bright red, very juicy and sweet. Most suitable for nearby markets, family gardens, and a favorite with truckers, as it stands shipping well and retains its color and good quality a long time.

Pkt., 10c; oz., 15c; $\frac{1}{4}$ lb., 30c; 1 lb., 85c.

208 Kleckley's Sweet—One of the best flavored melons in cultivation and one of the best for home use or nearby markets. It is long, very dark green with thin rind. Flesh deep red, of fine delicious flavor.

Pkt., 10c; oz., 15c; 1/4 lb., 35c; 1 lb., \$1.00.

209 Florida Favorite—A well-known popular sort which has long been a favorite for home use and market. Ripens early, has dark green rind, striped with light green. Flesh light crimson, exceedingly sugary, fine and tender. Very delicious and highly recommended either for home market or family use.

Pkt., 10c; oz., 15c; \(\frac{1}{4} \) lb., 30c; 1 lb., 85c.

210 Fordhook Early—The fruit is of good size, rather short and blocky in form, with large diameter. Skin dark green, occasionally with faint stripes of lighter green. Rind quite thin, but skin tough, making an excellent shipping variety. Flesh bright red, crisp, sweet and of splendid quality.

Pkt., 10c; oz., 15c; \(\frac{1}{4} \) lb., 30c; 1 lb., 85c.

211 Kolb's Gem—One of the older sorts producing oval melons and all large size. The rind is exceedingly hard and firm, being irregularly marked with mottled stripes of dark and light green. Flesh is bright red, solid, a little coarse, but sweet. One of the best round sorts for shipping as it will handle better than almost any other sort.

Pkt., 10c; oz., 15c; 1/4 lb., 30c; 1 lb., 85c.

212 Sweetheart—A very popular shipping sort particularly in the South. Fruits are very large, oval, very heavy with thin rind which is of light green color, slightly veined with darker shade. Flesh bright red, firm, very sweet and the fruits remain in condition a long time after ripening. A splendid sort for market or main crop being of fine appearance and sells readily.

Pkt., 10c; oz., 15c; 1/4 lb., 30c; 1 lb., 85c.

213 Peerless or Ice Cream—A splendid early sort for home or market gardens. Vines moderately vigorous, hardy and very productive. Fruits are oblong, medium size, bright green finely veined with darker shade. Flesh bright scarlet, crisp and very sweet.

Pkt., 10c; oz., 15c; 1/4 lb., 30c; 1 lb., 85c.

214 Gray Monarch or Long Light Icing—Fruits uniformly long and large, oblong in shape. Color light green slightly veined with darker shade; flesh deep rich red of splendid quality.

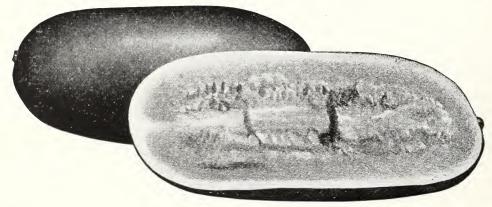

Pkt., 10c; oz., 15c; 1/4 lb., 30c; 1 lb., 85c.

215 Gypsy (or Georgia Rattlesnake)—One of the most popular of the older sorts especially in the South. Fruits are large, very long, of light green color distinctly striped and blotched with darker shade. In the South it is very highly esteemed and especially desirable for growing and shipping. The rind is remarkably thin though very tough; hence, it stands shipping well. Flesh most tender, sweet and luscious. Fruits are uniformly good quality.

Pkt., 10c; oz., 15c; 1/4 lb., 30c; 1 lb., 85c.

216 Halbert's Honey—A long dark green melon of moderate size but such splendid quality that it is especially desirable for market or home use. The rind is very thin. Flesh bright crimson and so crisp and tender that ripe melons will split ahead of the knife in cutting. We especially recommend this for general planting as it is very productive, of excellent quality and a splendid seller.

Pkt., 10c; oz., 15c; 1/4 lb., 35c; 1 lb., \$1.00.

Halbert's Honey

WATERMELON—Cont'd

217 Dark Icing—A round or oval shape which has been a favorite for home use and nearby markets. Melons are medium sized, oval, dark green in color with bright red flesh which is extremely tender and sugary. A splendid early sort and highly desirable for home or early market.

Pkt., 10c; oz., 15c; 1/4 lb., 30c; 1 lb., 85c.

218 Irish Gray-The size is uniform and large. Color of rind yellowish-gray and almost as tough as that of the Citron. Ripens earlier than Watson and will keep in good condition for a long time after picking. prolific and a good shipper. A fine market sort.

Pkt., 10c; oz., 15c; 1/4 lb., 30c; 1 lb., 85c.

MUSTARD

Quite popular in the Southern States for boiling as The Southern Giant Curled is becoming greens. popular for shipping. White Seeded is used for pickles and medicinal purposes.

Culture—Sow broadcast or in drills 12 inches apart in March or April or in the fall in September or October. Cut when 3 inches high. One ounce sows about 80 feet of drill. An acre requires 4 to 6 pounds.

220 Southern Giant Curled, or Chinese-A large growing sort with succulent, pungent leaves of sweet flavor. The best variety for use as greens.

Pkt., 10c; oz., 15c; 1/4 lb., 25c.

221 White—Used for greens and the seed largely used for pickles and flavoring.

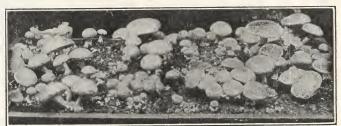

Pkt., 10c; oz., 15c; 1/4 lb., 25c.

MUSHROOM SPAWN

Mushrooms can be grown in cellars, sheds, under benches in green houses or hot beds. They are also planted outside in pastures or sod. It is a very profitable crop both for forcing or a field crop. Our cultural instructions are somewhat limited but we can furnish a booklet of more extended information on "Success with Mushrooms." Price, 25c.

One brick will spawn about ten feet square.

Culture—In preparing a mushroom bed, take three parts fresh stable manure, free from straw, and one part of good pasture soil. Mix thoroughly together and let it stand until the heat has sunk to about 90 degrees. Make the bed from this mixture about four feet wide, eight inches deep and any desired length. As soon as the temperature of the bed is about 70 or 80 degrees, the spawn may be inserted in pieces about the size of a walnut, and six inches apart each way. When the spawn is diffused through the whole bed, which will be in about ten days from planting, cover with two inches of fine loam and press down firmly. Over this place a layer of straw about four inches thick. Do not water unless the surface gets extremely dry, and then only with water at a temperature of

Mushrooms in a Bed

80 degrees. When gathering the crop, twist them off at the roots and do not use a knife. Cover the hole with soil to keep insects away from the root. Mushrooms can be grown in a great variety of situations; under the benches in a green house, a dark room, cellar, stable or elsewhere.

English Mushroom Spawn-Well-known and popular. Put up in bricks weighing about 11/4 lbs. Per brick, 25c; 5 bricks, \$1.00.

OKRA OR GUMBO

One of the most popular Southern vegetables and largely used for flavoring soups, stews, gravies and canned tomatoes.

Culture—Sow in drills 2½ feet apart after the weather has become settled and warm. Thin out to 18 inches apart in rows. To keep for winter, slice the pods when young in narrow rings and string or hang in the shade to dry.

One ounce sows about 100 feet. 10 lbs. per acre. Plant in April or May. Matures in 60 to 70 days from planting.

224 White Velvet—An early maturing and very productive variety growing about 3½ feet high. Pods white, long, smooth and very tender. This is not so deeply ribbed as the green sorts and is very popular in some sections.

Pkt., 10c; oz., 15c; 1/4 lb., 25c.

225 Dwarf Prolific—One of the most popular sorts in the South, growing 3 feet high, producing large pods deeply ribbed, tender, fine flavor.

Pkt., 10c; oz., 15c; 1/4 lb., 25c.

226 Perkins' Mammoth-Plant dwarf; are very attractive. Producing long, slender, deep green pods, which remain tender a long time.

Pkt., 10c; oz., 15c; 1/4 lb., 25c.

SETS ONION

There are three distinct classes of these. Potato or Hill onion sets can be planted in the fall from August to November and produce both green spring onions, large onions and sets. Perennial or Egyptian Top onion sets are planted in the fall and produce green spring onions early in the spring. Bottom Sets or regular onion sets of commerce are small onions which were previously grown from seed. These, set out early in the spring or in the South in the fall, produce one large onion from each set, towards the end of June or first of July. Pickling onions (which is a larger size bottom set) are used in some localities for fall planting to produce early green spring onions. All onion sets are hardy and can be set in the open ground as early as the weather will permit. They are usually planted in rows 15 inches apart—4 inches apart for small sets and 6 to 8 inches apart for potato sets. Potato onion sets can also be planted in the spring. It takes about 16 bushels of bottom onion sets per acre, and 20 to 25 bushels of potato onion sets, according to the size and distance apart. Cultivate with hoe until maturity.

If to be sent by mail, add 7c per qt. for post-Prices of onion sets are subject to market changes. Prices on application.

Yellow Danvers—Probably the most largely planted of all onion sets, producing an early crop of fine quality onions.

White or Silver Skin-Pure white of mild flavor and usually preferred for private gardens.

Australian Brown-A very hardy variety of medium size which is extremely early and of good quality.

Yellow Potato or Hill—A mild, yellow variety, producing several large onions and clusters of sets.

Egyptian or Perennial Tree (Called Top Onion Sets)—For spring or summer green onions.

ONION

One of the most nutritious and healthful of vegetables, having excellent medicinal qualities and most useful for flavoring salads, soups, meats, etc. It can be produced easily from either sets or seed and is one of the most satisfactory vegetables in the garden.

Culture—Growing Large Onions from Seed—Seed is sown in rows 15 inches apart as early in the spring as ground can be worked and covered about ½ inch deep. The Planet Junior Seed Sower is the implement for this and it requires 4 to 5 pounds per acre. Cultivate with a wheel hoe as soon as plants are up and handweed. After getting a good start thin onions to about 4 inches apart. Constant weeding and cultivation are required throughout the season. Rich soil, most heavily manured, is required to grow large crops of onions. The mucklands of Ohio, Indiana and Illinois are particularly suited to this crop but fertilization has to be kept up to produce a large and profitable crop. Onions grown from seed mature much later than those grown from sets.

Growing Sets—To produce commercial Onion Sets known as Bottom Sets, the seed is sown in rows 11 to 12 inches apart in fine clean soil at the rate of 40 to 60 lbs. per acre. Cultivate with a wheel hoe and hand-weed. The sets are ready for pulling in July and are cleaned and stored in an airy loft. For pickling onions, one ounce sows 150 ft; 15 lbs. per acre.

230 Large Red Wethersfield—A splendid red Culture-Growing Large Onions from Seed-Seed is sown

230 Large Red Wethersfield-A splendid red variety, very popular in the East. Bulbs somewhat flattened, thick and very large. Skin deep purplish red, flesh white tinged with purple, moderately fine grained, strong but pleasant flavor. It is medium early and well suited to rich soil. Is a good keeper and productive.

Pkt., 10c; oz., 20c; 1/4 lb., 60c.

Yellow Flat Danvers—An early or main crop variety of medium size, light coppery yellow color. Bulbs flattened but are quite thick with small necks. Ripen down evenly and keep well. This is the standard and most popular sort sown for yellow sets.

Pkt., 10c; oz., 20c; 1/4 lb., 60c.

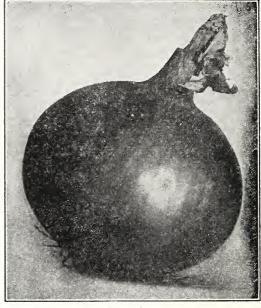

233 Yellow Globe Danvers—One of the most extensively grown yellow onions. Bulbs are of large size, uniformly globe shape with small necks. Ripen evenly. Flesh creamy white, crisp, mild and excellent flavor. Onions have a yellow coppery color, showy Onions have a yellow coppery color, showy and handsome.

Pkt., 10c; oz., 20c; 1/4 lb., 60c.

234 Ohio Yellow Globe-A very much esteemed and popular sort grown extensively in this State. ticularly suited to rich soils. Onions somewhat more flattened at the base than Yellow Globe Danvers and more blunt at the top. Color rich yellow tinged with orange. Flesh, creamy white, mild and fine flavor. One of the best for main crop planting and shipping as it is an excellent keeping sort.

Pkt., 10c; oz., 20c; 1/4 lb., 60c.

235 Prizetaker—The true Prizetaker is globe shape, has pale yellow skin and white flesh, which is very mild and of delicate flavor. It is strictly "fancy", and will be found on fruit stands during the fall, where it is

Prizetaker

sold as Spanish Onion. No sets are required, as the large onions are grown the first year from seed sown during early spring.

Pkt., 10c; oz., 20c; 1/4 lb., 60c.

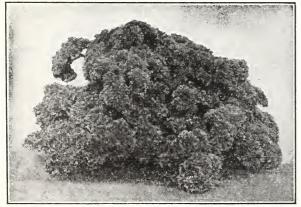

236 Riverside Sweet Spanish—A very large globe-shaped, light yellow onion with small top and an exceptionally fine shipper. It is a Spanish variety resembling Prizetaker, which has quickly become very popular.

Pkt., 10c; oz., 25c; 1/4 lb., 75c. Silver Skin or White Portugal-A well-known and favorite variety making medium size onions of mild flavor with beautiful, clear white skin. Largely used for sets and pickling onions. Mature 10 days earlier than White Globe. Bulbs are nearly round when of bunching size but somewhat flattened when mature. One of the best flattened sorts for general use.

Pkt., 10c; 0z., 25c; ¼ lb., 75c.

238 White Globe—A fine early or main crop sort for home gardens. Flesh is firm, fine grained, white, mild and more desirable for cooking than the yellow or red sorts. Bulbs are globe shape, full at the shoulder, round at the base, keep well and a good market variety. Pkt., 10c; oz., 25c; ¼ lb., 75c.

PARSLEY

Moss Curled Parsley

Easily grown and useful for so many purposes, such as garnishing, seasoning salads and for ornamental purposes. Grown in the garden as edging it is both ornamental and profitable.

Culture—Seed is sown in rows ½ inch deep and one foot apart. Cover firmly but not deep. As it is slow to germinate, usually taking 3 to 4 weeks, soaking in water is desirable. One ounce sows 150 ft. of drill. For winter growing it can be sown or transplanted to cold frames or to hot beds and is usually profitable.

239 Champion Moss Curled—A beautifully curled and crimped variety which is much preferred. It is vigorous, compact in growth and excellent for garnishing—a handsome decorative plant. One of the most popular for market and home gardens.

Pkt., 10c; oz., 15c; 1/4 lb., 40c.

240 Hamburg or Rooted—This produces an edible root resembling a small parsnip both in color

PARSLEY-Cont'd

and shape. Flesh white, flavor similar to Celeriac. Foliage is about the same as plain parsley. Roots are extensively used for flavoring soups and stews and can be dug late in the fall and stored in sand for winter use.

Pkt., 10c; oz., 15c; 1/4 lb., 40c.

241 Plain—A hardy variety having very dark green leaves which are flat, deeply cut but not curled. It is a little stronger in taste and much esteemed for flavoring soups, stews, as well as for drying.

Pkt., 10c; oz., 15c; 1/4 lb., 40c.

PARSNIPS

A popular vegetable for fall and winter use and of wonderful value for stock feeding. On rich, loamy soil produces immense crops, more nutritious than turnips and very valuable for dairy cattle. It will remain in the ground without protection all winter and can be dug as required until it begins to go to seed in the spring; or if desired, store in pits or cellars.

Culture—Sow in April in drills 18 inches apart, covered lightly. When the plants are about 2 inches high, thin out from 4 to 6 inches apart. One ounce will sow 200 ft. drill. 5 to 6 lbs. to the acre.

242 Large Sugar or Hollow Crown (Guernsey)—One of the best and most popular varieties for the table. Roots long, uniform in shape, have a smooth, white skin, tender and of good quality.

Pkt., 10c; oz., 15c; 1/4 lb., 35c.

PEAS GARDEN VARIETIES

One of the most popular crops in the home garden and usually a profitable one for market gardeners where labor for picking can be readily obtained. One pint sows 75 ft., 1½ bu. per acre. The earliest sorts can be planted just as soon as the ground is in condition to work. Wrinkled varieties a little later as they are tender. For succession, plant different sorts. For fall crop sow in August.

One pint planted every two weeks will yield a succession and is enough for a medium sized garden.

Culture—Peas succeed best in light, rich, loamy soil which has been manured the previous season. Sheep manure or good commercial fertilizer in the drills mixed with the soil will give excellent results. Sow about one pt. per 100 ft. or 120 lbs. per acre. The early dwarf varieties can be planted in rows 2 feet apart. The tall varieties in rows 3 ft. apart. Peas can be staked with sticks or wire netting on stakes. Tall varieties yield more abundantly than dwarf. Cultivate and keep clean, working the earth toward the vines rather than away from them.

Packets and $\frac{1}{2}$ pints postpaid. If to be sent by mail add 7c to pint prices and 10c to quart prices.

For Zone Rates—1 pint weighs about 15 oz., 1 qt. about 30 oz.

PEAS EARLY ROUND OR SMOOTH

244 Maud S—The earliest and most prolific pea known. The pod is of a dark green color, of a full, round shape and of strong texture which especially fits it for shipping long distances. For a late fall crop it has few equals and is the market gardener's favorite for all seasons. The far northern point at which our peas are grown renders them almost proof against cold and the best for early spring or late fall crop. Thousands of market gardeners have pronounced this pea unequalled in earliness, yield and regularity of growth. Make first planting as early in the spring as the ground will permit and cover well.

Pkt., 10c; $\frac{1}{2}$ pt., 20c; pt., 30c; qt., 50c; 4 qts., \$1.75.

245 MC Extra Early—One of the best strains of extra early peas; producing abundantly. Vines grow 2 to 2½ ft. high; pods 3 to 3½ inches long, well filled with fine delicious quality peas. Not only is this probably the earliest of all garden sorts but its yield is so abundant that it is the most profitable variety of all for market gardeners, in addition to being the best early sort for home gardens. Seed is white, smooth, medium size. Vines thrifty, vigorous, robust and extremely productive.

Pkt., 10c; ½ pt., 20c; pt., 30c; qt., 50c; 4 qts., \$1.75.

246 Alaska—A favorite sort with Southern truckers, producing long straight pods which will stand shipping, remain green longer than white seeded sorts. The seed is blue, medium size. Vines about 2½ ft. high, fairly vigorous and usually produce good yields. Pods long, straight and attractive appearance. This has long been a popular sort, is of fair quality and well-known.

Pkt., 10c; ½ pt., 20c; pt., 30c; qt., 50c; 4 qts., \$1.75.

#Mf. Extra Early Peas

PEAS—Cont'd EARLY WRINKLED SORTS

These are of very much finer and superior quality to the smooth sorts, consequently are much to be preferred for private gardens or market uses, except for very earliest crops. They are not quite as hardy as the smooth varieties—hence, should be planted just a little later.

250 Gradus (or Prosperity)—One of the very best early wrinkled large podded peas. The pods are fully as long as Telephone. Vine similar in appearance and does not grow so tall, being of medium height about 3 to $3\frac{1}{2}$ feet. The pods are 4 to $4\frac{1}{2}$ inches long, pointed, handsome and one of the most attractive of the early wrinkled sorts. Peas very large, splendid quality and a beautiful light green color. This has become one of the most popular varieties in cultivation.

Pkt., 10c; ½ pt., 20c; pt., 30c; qt., 55c; 4 qts.,

\$2.00.

251 Thomas Laxton—A comparatively new early wrinkled sort of superior merit. Vines vigorous, growing about 3 ft. high; have dark, vigorous foliage, similar to Gradus but hardier and more productive. Pods about 4 inches long, square ends, similar to Champion of England but larger, longer and darker. Peas are fine quality and it is destined to become one of the most popular of the early sorts on account of its productiveness.

Pkt., 10c; ½ pt., 20c; pt., 30c; qt., 55c; 4 qts.,

\$2.00.

252 Laxtonian—One of the largest podded of the dwarf wrinkled peas. Pods are about 4 inches in length, of a beautiful dark green color, similar to Gradus in shape, of splendid quality and mature a little earlier. Vine averages 15 to 18 inches in height, vigorous, productive and has dark green foliage.

Pkt., 10c; ½ pt., 20c; pt., 30c; qt., 55c; 4 qts.,

253 Little Marvel—An extra early dwarf wrinkled sort particularly suited to home gardens. Vines average 15 to 18 inches high, vigorous, dark green foliage. Peas are borne together in pairs of twos. Though comparatively a new sort it has become exceedingly popular on account of its large productive yield.

Pkt., 10c; ½ pt., 20c; pt., 30c; qt., 55c; 4 qts., \$2.00.

254 American Wonder—A favorite dwarf, early, wrinkled pea which is highly esteemed and splendid for family use. Vines about 9 inches to 1 ft. high, covered with well-filled pods medium size, about 2¾ inches long, containing 5 to 8 large, exceedingly sweet, tender peas.

Pkt., 10c; ½ pt., 20c; pt., 30c; qt., 55c; 4 qts., \$2.00.

255 Nott's Excelsior—A few days later than the American Wonder. Pods about one-quarter larger. It is remarkably hardy and can be planted almost as early as smooth sorts. Height, 1 to $1\frac{1}{2}$ ft. One of the best for home gardens and a profitable variety for market gardeners.

Pkt., 10c; ½ pt., 20c; pt., 30c; qt., 55c; 4 qts.,

\$2.00.

MEDIUM CROP VARIETIES

257 Premium Gem—This has long been a favorite among early dwarf peas. It matures a little later than American Wonder, is somewhat taller in growth and a little more prolific. Vines vigorous and productive, growing 15 to 18 inches high; pods 2¾ inches long, crowded with peas of fine quality.

Pkt., 10c; ½ pt., 20c; pt., 30c; qt., 50c; 4 qts.,

\$1.75.

259 Daisy or Dwarf Telephone—Similar in general characteristics to the well-known Telephone. Pods 4½

to 5 inches long, dark green; peas large, of superior quality, tender and sweet. Vines about 3 ft. high. Pkt., 10c; ½ pt., 20c; pt., 30c; qt., 50c; 4 qts., \$1.75.

LATE OR MAIN CROP SORTS

260 Telephone—One of the leading peas with market gardeners on account of its vigorous, tall growth and productiveness. Vines about 4 ft. high, foliage light green, producing an abundance of pointed pods, very large and light green. Peas large, tender, very sweet, excellent flavor. A splendid sort for home gardens and profitable for market.

Pkt., 10c; ½ pt., 20c; pt., 30c; qt., 55c; 4 qts.,

\$2.00.

Alderman

261 Alderman—A new pea like the Telephone, only better. The vine is extra vigorous, and the pods of Alderman are dark green and always well filled with fine large peas. For a pea which should be staked there is none quite so good as Alderman. It is one of the finest of the large-podded summer varieties. The haulm grows five feet in height and is of a rich, dark green color, as are also the large pods. Pods frequently measure nearly six inches in length and contain from ten to twelve very large peas of superior flavor.

Pkt., 10c; $\frac{1}{2}$ pt., 20c; pt., 30c; qt., 55c; 4 qts.,

264 Melting Sugar (Edible Pods)—These are used in the same manner as Snap or String Beans, the pods and peas being sliced and boiled. Pods very large, $4\frac{1}{2}$ inches long, broad, curved and twisted. They are when

PEAS-Cont'd LATE OR MAIN CROP VARIETIES-Cont'd

young, very tender, stringless and fine flavored. Vines are tall, 41/2 to 5 ft. high, with light foliage; are very strong growing and prolific. We strongly recommend more extensive planting of these fine quality peas. They are very popular in Europe and should become more generally known in this country.

Pkt., 10c; ½ pt., 20c; pt., 30c; qt., 55c; 4 qts., \$2.00.

Inoculation for Peas—Excellent results will be obtained by treating the seeds of peas with Inoculation Bacteria before planting. It can be easily done. We have it put up in convenient size for small gardens. (See page 56.)

PEANUTS

Peanuts should be shelled before planting. They should be planted in May or early June, in rows about 2 to 3 feet apart, dropping the nuts 8 to 10 inches apart, 1 in a hill. Cover I or 2 inches deep. Cultivate 3 or 4 times with a cultivator, so as to loosen the earth and keep down weeds, and at the last working, with a small turn-plow throw the dirt to the nuts. Do not cultivate too late in the season, as late cultivation is likely to injure the formation of the nuts. It is also advisable

to make an application of lime, scattering it on top of the row just after planting. The use of lime as above mentioned is recommended by the most successful growers.

In harvesting, plow the peanuts and then stack around stakes with the leaves outside.

Improved Virginia—Large size nuts which are very popular and a fine productive strain.

½ lb., 20c; 1 lb., 30c.

PEPPER

Culture—For earliest crop sow in hot bed in February or March and transplant to open ground in May, setting plants about 15 inches apart in rows 2½ ft. apart. Later crops can be sown in cold frames. Cultivate and keep free of weeds. Sheep manure or some good commercial fertilizer applied broadcast around the plant and hoed in when they are about 6 inches high will produce an enormous increase and improvement in yield.

One ounce makes from 1200 to 1500 plants.

267 Chinese Giant-An enormous variety sometimes attaining 6 inches in diameter. It is very even in shape, flesh thick and sweet. Very handsome and of superior quality for stuffing. Plants are vigorous and fairly prolific. Very highly recommended for home use and one of the most profitable to grow for market purposes.

Pkt., 10c; oz., 50c; 1/4 lb., \$1.75.

268 Large Bell or Bull Nose—A large early sort of mild flavor. Plant vigorous, 2 feet high, very productive, and ripens its crop early and uniformly. A splendid cost for solds splendid sort for salads, mangoes and for stuffing Color deep green which becomes bright purposes. crimson when ripe.

Pkt., 10c; oz., 30c; 1/4 lb., \$1.00.

269 Ruby King—A very large and attractive sort, deep green color when young, bright red when ripe. Flesh thick and mild flavor. One of the best table sorts. Pkt., 10c; oz., 40c; ¼ lb., \$1.25.

270 Ruby Giant—A variety of Mango Pepper, which is of a desirable size and shape for stuffing. A cross of Ruby King and Chinese Giant grows to large size and is very mild.

Pkt., 10c; oz., 40c; 1/4 lb., \$1.25.

271 Long Red Cayenne—A well-known medium early sort, having slender, twisted and pointed fruits about 4 inches long. Extremely strong and pungent—hence, valuable for seasoning. Generally known as Lady Finger Pepper.

Pkt., 10c; oz., 40c; ½ lb., \$1.25.

272 Sweet Mountain (or Spanish)—Late maturing and an attractive sort. Fruits very large and long, frequently 7 inches in length and 2 inches in diameter; flesh mild, very thick and excellent quality.

Pkt., 10c; oz., 30c; ½ lb., \$1.00.
273 Golden Dawn—A handsome sweet, mild, yellow variety; fruit pendent, one and a half inches long and about the same in diameter.

Pkt., 10c; oz., 40c; ½ 1b., \$1.50.
275 Red Chili—Pods about 2 inches in length, $\frac{1}{3}$ to $\frac{1}{2}$ inch in diameter, tapering to a sharp point. Exceedingly pungent—hence, valuable for flavoring and for Tobasco Sauce. The small bright red pods are borne in great profusion, making it an ornamental plant for the garden.

Pkt., 10c; oz., 50c; 1/4 lb., \$1.75.

276 Pimento—The fruit is of good size, medium length and attractive color. The flesh is thick and solid, mild and of fine flavor. Desirable for salads and stuffed peppers. The plants are vigorous and upright, about two to two and one-half feet high, with short, broad, dark green leaves. The fruit is deep green when young, becoming deep red as it matures.

Pkt., 10c; oz., 30c; 1/4 lb., \$1.00.

PUMPKIN

These make excellent food for stock and can be grown in corn fields at practically no extra expense. We urge larger planting, as they are very nutritious and afford a change in ration.

Culture—Generally planted in corn after the last working and gathered after corn has been shocked. For field crop, plant in May or June in hills 8 feet apart, about 8 to 10 seed to the hill and cultivate until the vines get strong; then thin out leaving 2 or 3 of the strongest plants in each hill.

One ounce plants 20 to 30 hills according to the size of the seed. Two or three pounds to the

280 King of the Mammoths —An enormous flattened variety sometimes attaining 100 lbs. in weight. It is especially desirable for exhibition purposes, Halloween parties and will find ready sale in most large cities at good prices.

Pkt., 10c; oz., 15c; \(\frac{1}{4} \) lb., 40c; 1 lb., \(\\$1.25. \)

King of the Mammoths

PUMPKIN—Cont'd

Japanese Pie-Fruit medium size. Skin light yellow, covered with fine grained netting. Flesh salmon, very thick, sweet, fine flavor and one of the best sorts for cooking.

Pkt., 10c; oz., 15c; 1/4 lb., 40c; 1 lb., \$1.25.

282 Tennessee Sweet Potato—Medium size of creamy yellow color with light green stripes. Flesh thick, fine grained, dry, brittle and of excellent flavor. Unsurpassed for pies and custards.

Pkt., 10c; oz., 15c; 1/4 lb., 40c; 1 lb., \$1.25.

283 Cushaw Crook-neck Striped-Fruit fairly large with crooked neck. Skin creamy white with green stripes. Flesh yellow, very thick, rather coarse but sweet. A productive and popular sort in most sections.

Pkt., 10c; oz., 15c; $\frac{1}{4}$ lb., 40c; 1 lb., \$1.25.

284 Golden Cushaw-One of the best varieties. Is a yellow crook-necked sort, and is nearly all flesh, having a very small seed cavity.

Pkt., 10c; oz., 15c; 1/4 lb., 40c; 1 lb., \$1.25.

285 Large Cheese—A popular sort in this section for table uses and stock. Fruits somewhat flattened; skin mottled light green and yellow. Flesh yellow and of tender quality.

Pkt., 10c; oz., 15c; 1/4 lb., 25c; 1 lb., 70c.

286 Small Sugar—One of the best for the home garden. An excellent variety for pies. Nearly round, 10 to 12 inches in diameter; rich orange color. Flesh thick, fine grained and very sweet.

Pkt., 10c; oz., 15c; ¼ 1b., 30c; 1 1b., \$1.00.

287 Connecticut Field—Used for planting in corn

for stock feeding and also for making pies. Fruits often 15 inches in diameter; smooth reddish-orange ribbed skin with orange-yellow flesh.

Pkt., 10c; oz., 15c; ¼ lb., 25c; 1 lb., 75c.
288 Kentucky Field—Grown generally throughout the central section for stock feeding. Fruits very much flattened, creamy yellow color; flesh orange. productive.

Pkt., 10c; oz., 15c; 1/4 lb., 25c; 1 lb., 60c.

SELECT SEED POTATOES CHOICE NORTHERN GROWN STOCKS

Prices on Potatoes are constantly changing, subject to market fluctuations. Please write for current market prices when ready to purchase.

Culture—Potatoes are planted in rows 36 to 40 inches apart, dropping the potatoes 12 to 16 inches apart in the rows. Sheep manure or some other good commercial fertilizer should be used in the drills even if the land is heavily manured as it will pay wonderfully well. It takes about 1 pound of fertilizer to 30 to 40 feet of drill, 400 to 600 lbs. per acre. It takes 9 to 12 bushels to plant an acre according to size of potatoes and distance of rows apart. Plant for early crop as soon as the ground can be gotten in condition. For late crop, in July or 1st of August is best.

Many potato diseases, particularly the more important ones, such as scab, black leg, black rot, stem

rot, etc., were formerly treated by the old-fashioned methods which required soaking of the seed for long

periods and creating a disagreeable task.

The introduction of Improved Semesan Bel has vastly improved these conditions by giving the grower a modern, instantaneous and effective method of disinfection at a reasonable cost that is far superior in all respects to even the best of those previously employed. See page 75.

Early Ohio-10 days earlier than Early Rose. The tubers are oval, have few eyes, rather shallow. Smooth skin, white, slightly flushed with pink. It is an extra fine quality cooking potato; makes good sized yields and is a favorite in this section and many others, especially where planted on light and loamy soil.

Early Rose—An old favorite sort which has long been popular for family use and still planted in many sections as the main variety for early crop. Tubers are oblong, light pink at the bud end but mostly white. It is of finest quality, cooks very mealy and one of the best for family use.

Early Triumph—About 10 days earlier than the Ohio. The potato is of good size, squared at the ends. Skin bright red. It is very productive.

Irish Cobbler—This has become an exceedingly popular and profitable variety for growing for market. Tubers are oval with smooth white skin, have few eyes rather deep. Grows to large size and produces enormous yields. Vines are thrifty and a reliable heavy yield can nearly always be expected. An excellent sort for market purposes and produces good crops both early and late.

SWEET POTATOES

We carry in stock the best sort of seed grown by reliable planters. Varieties, Yellow Jersey and Nancy

Hall. Prices variable. Write for quotations. Cannot be shipped until about April 1.

Early White Tipped Scarlet Radish

RADISH FINEST SEED STOCKS

One ounce sows 100 ft. of drill. If broadcasted requires 10 to 12 lbs. per acre. For forcing in frames sow in January or February. Out of doors, sow from March to June for early and summer crop. For late, sow from July to September. Early sorts mature and are ready for the table in 21 to 30 days

from sowing.

Culture—Quick growth is essential for tender, crisp radishes. Hence, rich soil and plenty of moisture are essential. They can be sown at intervals of ten days to two weeks for early use or grown as a catch crop between rows of beets, lettuce, onions, etc. When forced they require plenty of ventilation and moisture.

ROUND VARIETIES

290 Early White Tipped Scarlet—One of the handsomest of the turnip varieties and

a general favorite in nearly all large markets. It is excellent as a forcing sort or for earliest planting outdoors. Roots nearly round, slightly flattened on under side. Color very deep scarlet with distinctive white tip. Flesh white, of best quality. We strongly advise more extensive planting of this sort in this locality.

Pkt., 10c; oz., 15c; 1/4 lb., 30c; 1 lb., \$1.00.

RADISH—Cont'd

ROUND VARIETIES-Cont'd

Early White Turnip-Similar to Early Scarlet Turnip but little more flattened and slightly earlier maturing. It has very small tops, is of quick growth, suitable for forcing or early planting. Color clear white; flesh crisp and tender.

Pkt., 10c; oz., 15c; 1/4 lb., 30c; 1 lb., \$1.00.

292 Golden Globe-A splendid sort for second early crop as it does not get pithy easily and produces tender, crisp roots. Skin golden yellow, flesh white, roots uniformly globe shaped, 2 inches long and 21/4 inches in diameter when mature.

Pkt., 10c; oz., 15c; 1/4 lb., 30c; 1 lb., \$1.00.

294 French Breakfast-A small olive-shaped variety about 11/2 inches long, which is very quick growing. Color beautiful deep scarlet shading to white at the tip. Top small. Quick maturing and splendid for very earliest crop.

Pkt., 10c; oz., 15c; 1/4 lb., 30c; 1 lb., \$1.00.

Crimson Giant-This variety is suitable both 295 for forcing or early planting out of doors. A remarkable feature of this radish is that it will grow double the size of other round red forcing radishes and still remain solid. The ordinary forcing radish, after growing to the size of 2 inches in circumference becomes pithy, while the Crimson Giant will grow to 6 inches in circumference, and still remain solid and juicy, free from all signs of becoming soft.

Pkt., 10c; oz., 15c; 1/4 lb., 30c; 1 lb., \$1.00.

296 Early Scarlet Turnip-A well-known sort producing round or oval roots of bright scarlet color. Flesh white, crisp and tender. Tops medium, quick growth and desirable for early planting.

Pkt., 10c; oz., 15c; 1/4 lb., 30c; 1 lb., \$1.00.

Extra Early Scarlet Globe-One of the very best and most showy radishes for earliest forcing or growing outside. Roots are slightly olive shape, rich bright scarlet color; flesh white and tender. It is fit to pull very early and is especially desirable for market gardeners on account of its showy qualities.

Pkt., 10c; oz., 15c; 1/4 lb., 30c; 1 lb., \$1.00.

LONG VARIETIES

298 Cincinnati Market—A popular sort in this section and has long been a favorite with market gardeners as it commands ready sale and good prices on

this and nearby markets. It is a brilliant crimson color with white slightly tinged flesh, exceedingly sweet and tender. Grows 6 to 7 inches in length, straight and smooth and does not become hollow and pithy until very old. A remarkably fine sort for either market or home

> Pkt., 10c; oz., 15c; 4 lb., 30c; 1 lb., \$1.00.

299 Long Scarlet Short Top—An [old standard sort which is excellent either for home gardens or market. Tops short and small. Roots smooth, tender, uniform in shape; an attractive bright red color.

Pkt., 10c; oz., 15c; 1/4 lb., 30c; 1 lb., \$1.00.

300 Long White Icicle-The earliest of

the long white varieties which is popular for forcing and earliest outdoor or early summer crop. It is productive and of excellent quality, crisp and tender. Roots are usually 5 to 6 inches long and about 1/2 inch in diameter with small tops.

Pkt., 10c; oz., 15c; 1/4 lb., 30c; 1 lb., \$1.00.

301 White Strasburg—One of the most popular and desirable of all long white radishes for second early or summer crop. Even when comparatively small it is fine quality and remains crisp and tender much longer than other early varieties. Roots when full grown are 1½ to 3 inches thick and 5 to 6 inches long, tapering. Tops medium; roots smooth, crystal white color, handsome, showy, crisp and tender and especially desirable for market or family use.

Pkt., 10c; oz., 15c; 1/4 lb., 30c; 1 lb., \$1.00.

FALL RADISHES

303 Long Black Spanish—A favorite late sort producing long, thick, almost black roots, with white flesh of fine texture. Decidedly pungent but well flavored. Roots are usually 7 to 9 inches long, 2 to 3 inches in diameter and it is one of the best of the long sorts and especially adapted for winter use. Pkt., 10c; oz., 15c; ¼ lb., 30c; 1 lb., \$1.00.

Rose China Winter (Scarlet China)—A popular sort producing cylindrical roots, stub-rooted, blunt at both ends. Is bright, deep rose color shading to white. Skin smooth, flesh white, crisp, tender and pungent. Roots usually 4 to 5 inches long, 11/2 to 2 nches in diameter. A splendid sort for fall and winter. Pkt., 10c; oz., 15c; ¼ lb., 30c; 1 lb., \$1.00.

306 White Chinese or Celestial—A large stump-rooted radish with white skin and flesh. Can be sown from July 1 to August 15, and will keep in prime condition a long time; mild in flavor, brittle and never woody. Fine for market gardeners.

Pkt., 10c; oz., 15c; 1/4 lb., 30c; 1 lb., \$1.00. 307 California Mammoth White Winter—A giant fall and winter variety. Roots from 9 to 12 inches long and 2 to 3 inches through, tapering regularly to the tips, smooth and cylindrical in form; skin and flesh white, tender and crisp.

Pkt., 10c; oz., 15c; ¼ 1b., 30c; 1 lb., \$1.00.

SALSIFY

A desirable winter vegetable which should be more extensively used throughout the Central States. Roots are palatable and can be served boiled or as fritters.

Culture—Sow in April in rows 18 inches apart, thinning out to 4 to 6 inches. Cultivate deeply and often. It is hardy and will remain out all winter, but if desired can be dug before winter and stored in earth or sand and stored in earth or sand to keep it from wilting.

One ounce sows 100 ft.; 6 to 8 lbs. are required per

309 Mammoth Sandwich Island-The best sort, which is much larger and a great improvement over the old-fashioned long sort.

Pkt., 10c; oz., 20c; ½ lb., 60c.

Mammoth Sandwich Island Salsify

White Icicle Radish

SPINACH

Has long been one of the most popular of all greens for market gardeners and truck growers and in some sections is grown in enormous quantities. In this locality Spinach is sown broadcast in March or April for early crop and from July to September for fall and winter crop at the rate of about 10 to 15 lbs. per acre. It can also be sown in drills 12 to 15 inches apart and cultivated.

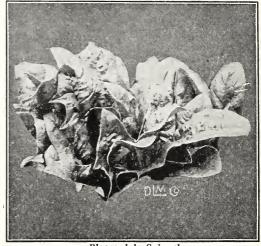

One ounce sows 100 ft. of drill. 10 to 15 lbs. per acre in drills. 15 to 20 lbs. per acre, broadcast. Onehalf pound is sufficient for a medium garden.

310 King of Denmark - The New Evergreen Spinach. This variety is superior to all others for spring planting, under the same circumstances, in the matter of standing a longer time before going to seed. Has an abundance of dark green leaves of large size and very much crumpled and of fine quality. It is fit for use in thirty days from time of sowing, and remains in good condition fully two weeks after other varieties have started seed-stocks.

Pkt., 10c; oz., 15c; $\frac{1}{4}$ lb., 25c; 1 lb., 50c. 311 Bloomsdale Savoy (or Norfolk)—A very early sort especially desirable for fall use. Plant is upright, having glossy, thick, crimpled, green leaves, pointed. A favorite sort for market gardeners and truckers.

Pkt., 10c; oz., 15c; 1/4 lb., 25c; 1 lb., 40c. 312 Round Thick Leaf-One of the best sorts for spring sowing as it is somewhat slower to go to seed than Bloomsdale. Plant upright, vigorous; leaves large, thick, fresh bright green color.

Pkt., 10c; oz., 15c; 1/4 lb., 25c; 1 lb., 40c.

Bloomsdale Spinach

313 New Zealand—An especially desirable sort for summer use as it thrives during hot weather in any soil, rich or poor. It has tender shoots of good quality which may be cut throughout the summer. Plant becomes very large and spreading, leaves small, broad and Plant 3 or 4 seed in hills 2 ft. apart each way. Germination will be hastened by soaking in warm water 24 hours before planting.

Pkt., 10c; oz., 15c; 1/4 lb., 30c.

SOUASH-Called Cymling in the South

Summer squash requires one ounce to 30 hills. Winter varieties one ounce to 15 hills and 3 to 4 lbs. per acre.

Culture—Plant when the weather has become settled and the ground fairly warm. Bush varieties are planted 3 x 4 ft.; running varieties 6 x 8 ft.; about 4 to 6 seeds per hill and thin out later leaving the strongest plants about 3 to the hill. Hills similar to those made for Cucumbers with well-rotted manure or fertilizer are best. Winter varieties may be stored in a moderately warm dry place of even temperature. of even temperature.

SUMMER VARIETIES

315 Mammoth White Bush-A well-known early variety, largely planted in the South both for market and home use. Color is creamy white with comparatively smooth surface, somewhat flattened and scalloped. Vines are bushy, vigorous and very productive. Known as Patty Pan or Cymling in the South. Pkt., 10c; oz., 15c; ½ 1b., 40c; 1 1b., \$1.25.

316 Golden Summer Crook-neck-An old standard running sort having long fruit with uniformly crooked neck. Color is bright yellow; densely warted surface and very productive.

Pkt., 10c; oz., 15c; \(\frac{1}{4}\) lb., 40c; 1 lb., \(\frac{1}{2}\)1.25.

Mammoth White Bush Squash

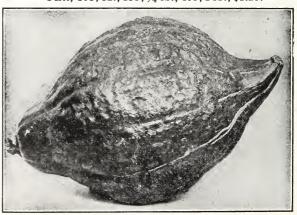

WINTER VARIETIES

318 Improved Hubbard—One of the best winter squashes; flesh bright orange vellow, fine grained, very dry, sweet and richly flavored. Fruit large, oval-shaped; skin dark green, rough, covered with warts. Excellent keeper.

Pkt., 10c; oz., 15c; 1/4 lb., 40c; 1 lb., \$1.25. Golden Hubbard-Similar to the old Hubbard excepting the skin is of a rich orangered and heavily warted, flesh of extra fine quality.

Pkt., 10c.; oz., 15c; 1/4 lb., 40c; 1 lb., \$1.25. 320 Warted Hubbard-Similar in fruit and shape to Hubbard except that the surface is very much warted. It is very handsome in appearance and extra quality.

Pkt., 10c; oz., 15c; $\frac{1}{4}$ lb., 40c; 1 lb., \$1.25.

Hubbard Squash

SQUASH-WINTER VARIETIES-Cont'd

321 Mammoth Chili—Rich orange-yellow; flesh thick and of good quality for making pies; grows to an enormous size; a valuable sort for feeding stock.

Pkt., 10c; oz., 15c; 1/4 lb., 45c; 1 lb., \$1.50.

322 Boston Marrow—Vines strong, of running growth and very productive. Fruits large, orange skin, deep orange flesh, oval with hard shell; a superior winter sort.

Pkt., 10c; oz., 15c; 1/4 lb., 30c; 1 lb., \$1.00.

TOMATO

A popular crop in all home gardens and usually profitable for truckers, market gardeners and growers for canning factories.

Culture—For earliest crop sow in a hot bed or shallow boxes in February or March, transplanting when 2 or 3 inches high to small pots, trays or cold frames. When danger of frost is past (usually in this climate the 1st to 10th of May), set in open ground 3 x 4 feet apart. Well-rotted manure, sheep manure or other good comercial fertilizer should be used in the hills at the rate of a dessert spoonful per hill or about 200 lbs. per acre mixed with the soil. It is essential for producing good stocky growth that the soil be enriched in this manner as it will have a tendency to prevent blight and add vigor and fruitfulness to the vines. Tomatoes should be staked to keep the fruit from the ground and it will help also to prevent blight, mildew and make them more prolific.

One ounce produces about 3,000 plants; 2 ounces produces enough plants to set one acre. For early crops sow in February; for late crop

sow in open bed in April or May.

WILT RESISTANT TOMATOES

The loss caused by tomato wilt is increasing each year. Wilt is a fungus that lives in the soil and invades the plant through its roots. When diseased tomato vines are plowed under they only serve to increase the infection. In the early stages of the disease the leaves curl, later they turn yellow, beginning at the bottom of the plant which slowly dies, usually about the time the fruits are half grown. No amount of spraying will do any good, the only means of controlling wilt is to grow wilt resistant varieties.

325 Marglobe—Wilt Resistant—Very productive second-early variety. Fruits large, smooth, meaty, red, globular. It will stand up longer after it becomes flushed than any other variety of tomato. Highly resistant to wilt and somewhat resistant to blights.

Pkt., 10c; oz., 50c; 1/4 lb., \$1.50.

326 Norton—Wilt Resistant—Norton was developed from the Stone, ripens at the same season, and can be classed as a wilt resistant Stone, but a more abundant bearer and the fruits are more solid. It yields a heavy crop of large, smooth, solid red fruits that ripen slowly, therefore is a good keeper and a good shipper; it is also remarkably drought resistant. An excellent tomato for home garden, for canning and for the late market.

Pkt., 10c; oz., 35c; 1/4 lb., \$1.00.

327 Marvana—Wilt Resistant—This variety is commanding attention on account of its remarkable wilt-resisting qualities. A first-early red-fruited variety resembling Earliana in earliness, size, shape of fruits and in type of foliage, but its fruits are usually smoother, more crimson and slightly less acid. A heavy yielder of excellent quality.

Pkt., 10c; oz., 40c; 1/4 lb., \$1.25.

EARLY VARIETIES

328 Oxheart—Because of its Oxheart shape, large size, as well as excellent table qualities, it has quickly come into general favor. The skin is pink and the flesh frequently shows 2 inches thick, without a seed cavity. The flavor has that delicious tomato quality that every lover of this fruit knows so well.

Pkt., 10c; oz., 50c; 1/4 lb., \$1.50.

329 Purple King—One of the largest and best of the purplish pink varieties. Vines very vigorous and productive; fruits smooth, uniform in size, nearly globe

shaped. It is an extremely early sort and of excellent quality. We strongly recommend it for market gardens and it will prove one of the best sorts for home gardens for early use. It is especially valuable for shipping. Purple King will become popular wherever grown. It is a very large, early sort and its freedom from cracking and tendency from blight are strong points in its favor.

Pkt., 10c; oz., 35c; 1/4 lb., \$1.00.

330 Earliana—A deep scarlet, very early variety which is largely planted by truckers and market gardeners. Fruit is borne in clusters, is medium to large, nearly round, and exceptionally smooth for so early a variety. On account of its extreme earliness and the fact that the crop ripens uniformly and very early it is one of the most valuable of the first of the early sorts.

Pkt., 10c; oz., 35c; $\frac{1}{4}$ lb., \$1.00.

331 June Pink—An extra early purplish-pink sort similar to Earliana except in color. It is a valuable variety for market gardeners and truckers, especially on markets where purplish sorts find ready sale.

Pkt., 10c; oz., 40c; 1/4 lb., \$1.25.

332 Chalk's Early Jewel—A particularly desirable sort with purplish scarlet fruit, nearly round, smooth, of large size and a most excellent quality. Fruit ripens early and not inclined to crack, is early and pickings are extended over a long season. One of the best of the early sorts and unsurpassed for home gardens.

Pkt., 10c; oz., 35c; 1/4 lb., \$1.00.

333 Dwarf Champion—An early variety which is very dwarf growing. The vines are so stiff that they are generally self-supporting. Fruits medium size, purplish red and borne moderately early. On account of its strong, upright growth, it is sometimes sold as Tree Tomato and is desirable on extremely rich soil and where tall varieties have a tendency to make too much vine.

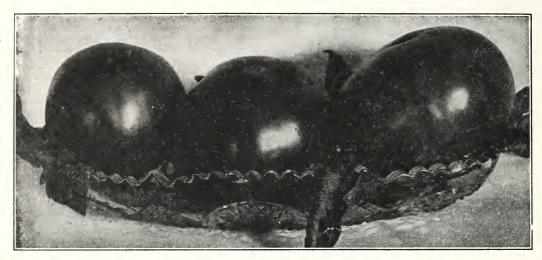

Pkt., 10c; oz., 40c; \(\frac{1}{4} \) lb., \(\\$1.25. \)

334 John Baer—An extra early scarlet fruited variety of superior merit. The vines are very hardy and exceptionally productive. The fruits are the largest

Marglobe Wilt Resistant Tomato

TOMATO-Cont'd

Ponderosa Tomato

EARLY VARIETIES-Cont'd

of the extra early sorts and are also most attractive in color. They are nearly round, smooth, firm and of excellent quality. It is one of the very earliest to riper its first fruits and it continues to furnish marketable fruits much longer than other very early varieties.

Pkt., 10c; oz., 35c; $\frac{1}{4}$ lb., \$1.00.

335 Bonny Best—The fruits of this desirable early sort are most attractive in shape and color. The crop ripens more uniformly than any other early scarlet fruited sort, and is of superior solidity and interior color. The vines are vigorous and produce a good crop of exceptionally round and deep fruits, bright deep scarlet in color and of very good quality.

Pkt., 10c; oz., 35c; 1/4 lb., \$1.00.

336 Early Detroit—A very productive second early purple tomato, uniform in size of fruit, free from cracks and does not blight easily. Fruit large and smooth. Vines vigorous and quite productive. Quality excellent.

Pkt., 10c; oz., 35c; 1/4 lb., \$1.00.

MAIN CROP SORTS

337 Ponderosa—One of the largest and finest varieties for home use. It is purplish pink in color. Vines vigorous, tall, fairly productive. Fruits are very solid and have exceptionally few seeds. It is fairly smooth for so large a variety and sometimes attains such a size that one slice will cover a dinner plate. Very free from acid, has few seeds, is of delicious flavor and most excellent for slicing; ripens about mid-season. On account of its thick meaty flesh and fine flavor it is most desirable for home use, and the large showy handsome fruits are popular sellers for fancy fruit stands.

Pkt., 10c; oz., 50c; 1/4 lb., \$1.50.

338 Beauty—One of the most satisfactory and popular sorts. Fruits are purplish pink, ripen evenly, are uniform in size, very solid and finest quality. They are exceptionally smooth and do not crack readily. Vines large, vigorous and very productive, ripening fruits about mid-season.

Pkt., 10c; oz., 35c; $\frac{1}{4}$ lb., \$1.00.

339 Stone—One of the very best tomatoes producing large, very smooth, solid fruit slightly flattened, deep red color. It is very popular with all market growers and especially desired by canners. Ripens

mid-season. On account of its large yield and general uniformity in production we strongly recommend it for both market gardens and home uses.

Pkt., 10c; oz., 25c; 1/4 lb., 85c.

340 Crimson Cushion or Beefsteak—Is very large, round and regular; bright scarlet skin, solid flesh of best quality, seed cells small. Plants are very prolific and of fine appearance.

Pkt., 10c; oz., 50c; $\frac{1}{4}$ lb., \$1.50.

341 Trucker's Favorite—A large, deep purple variety, producing uniform size fruit. It is somewhat deeper color than Beauty; fruit being more globe shaped, largely used for main crop, producing fine yields of large, smooth, solid fruits which command best prices—hence very popular with truckers and market gardeners.

Pkt., 10c; oz., 35c; $\frac{1}{4}$ lb., \$1.00.

342 Cincinnati Purple—A favorite sort in this locality and one of the very best for market or home use. It is very round, smooth, solid and of splendid flavor. Vines are vigorous and remarkably productive. Fruits of large size, very meaty; have small seed cells and of rich flavor.

Pkt., 10c; oz., 35c; $\frac{1}{4}$ lb., \$1.00.

343 Golden Queen—A large growing variety bearing abundantly. Fruits are golden yellow color, smooth, well shaped and desirable for slicing as a contrast with red varieties on the table.

Pkt., 10c; oz., 40c; $\frac{1}{4}$ lb., \$1.25.

SMALL-FRUITED TOMATOES

344 Pear-Shaped, Red—Fruits pear-shaped, about 2 inches long and of bright red color. A splendid variety for preserves.

Pkt., 10c; oz., 40c; 1/4 lb., \$1.25.

345 Pear-Shaped, Yellow—Fruits pear-shaped, about 2 inches long, rich clear yellow color, largely used for canning, tomato preserves and pickling.

Pkt., 10c; oz., 40c; $\frac{1}{4}$ lb., \$1.25.

346 Red Cherry—Small, round fruit, resembling cherries; used for preserves.

Pkt., 10c; oz., 40c; 1/4 lb., \$1.25.

347 Yellow Cherry—Fruits ⁵/₈ inch in diameter, perfectly round and smooth. A splendid sort for sweet or sour pickles and preserves.

Pkt., 10c; oz., 40c; 1/4 lb., \$1.25.

Tomato Plants—Leading varieties in season. We do not send these plants by mail.

TURNIP

One of the easiest crops to grow and profitable for stock feeding and in most cases for markets.

They cost so little to grow, make splendid nutritious feed and should be much more generally used. A good yield from an acre of Turnips is from 600 to 1000 bushels.

Culture—For early use, sow in March or April either broadcast, in drills, using preferably Milan or Purple Top Strap Leaf or Globe.

Rutabaga is sown in June or July, preferably in drills 2 feet apart thinning out to 6 inches.

Turnips for main crop are sown from July to September 15th, broadcast $1\frac{1}{2}$ to 2 lbs. per acre.

Turnips for greens, can be sown as late as October 1st and require 3 to 4 lbs. per acre.

348 Early Purple Top Milan—Extra early variety which is very sweet and particularly valuable for sowing in early spring. Roots are medium size, plants purple, top flat. Best for private gardens and preferable to grow for early market crop.

Pkt., 10c; oz., 15c; 1/4 lb., 35c; 1 lb., \$1.00.

349 Purple Top Strap Leaf—A well-known early sort which is largely used in all sections. Our stock is extra choice.

Pkt., 10c; oz., 15c; 1/4 lb., 25c; 1 lb., 75c.

350 Purple Top Globe—A very superior strain, producing large smooth roots, which are sweet and tender. One of the best for early or main crop use. Excellent either when young or fully matured.

Pkt., 10c; oz., 15c; 1/4 lb., 25c; 1 lb., 75c.

351 Early White Flat Dutch—Similar to Early Purple Top Flat, excepting that it is white all over. Quick grower, excellent quality and splendid for early crop.

Pkt., 10c; oz., 15c; 1/4 lb., 25c; 1 lb., 75c.

352 Large White Globe—Flesh white, firm and crisp; a very desirable early variety.

Pkt., 10c; oz., 15c; \(\frac{1}{4}\) lb., 25c; 1 lb., 75c.

353 White Egg—An early, oval variety with smooth, clear white roots, medium size which grow half out of the ground, top small, flesh clear white, fine grained, sweet. Excellent either when young or fully matured.

Pkt., 10c; oz., 15c; 1/4 lb., 25c; 1 lb., 75c.

354 Long White Cow Horn—These often grow 12 to 15 inches long and are a valuable crop for stock feed, flesh is white, well flavored and good for table use.

Pkt., 10c; oz., 15c; 1/4 lb., 25c; 1 lb., 75c.

Early Red or Purple Top Turnip

355 Yellow Aberdeen—A globe-shaped variety with purple top, flesh yellow, sweet, somewhat coarse grain, an excellent sort for stocks, producing large crop.

Pkt., 10c; oz., 15c; \(\frac{1}{4} \) lb., 25c; 1 lb., 75c.

357 Seven Top—Used entirely for greens and very popular in the Southern States.

Pkt., 10c; oz., 15c; 1/4 lb., 25c; 1 lb., 75c.

RUTABAGA OR SWEDISH TURNIP

358 American Purple Top—Our stock of this is extra choice and can be depended on by the most critical growers. Rutabaga besides being best food for stock, is the sweetest of all Turnips for table use.

Pkt., 10c; oz., 15c; ½ lb., 25c; 1 lb., 75c.

French Turnip—(See Kohl-Rabi.)

TOBACCO

Saved from crown shoots only and grown for us by practical growers.

Culture—The seed is sown from February to April in open beds. Ground must be clean, very finely pulverized, raked fine and smooth. It is customary to burn over the top of the bed by piling brush or litter to destroy weed seeds and add fertility for the young plants. After sowing, beds are protected with thin cotton cloth similar to cheese cloth to protect them from tobacco flies. About June 1st it is set in rich or highly fertilized ground in rows $2\frac{1}{2}x \ 3$ ft. Cultivate often and destroy worms by applying Paris Green or Arsenate of Lead.

One ounce sows 50 sq. yds., sufficient to set 2 or 3 acres, sheep manure will give most excellent results on this crop and should be applied in hills two to three hundred pounds per acre.

359 Improved White Burley—A standard sort which is more largely grown in Blue Grass region of Kentucky, Ohio, Tennessee and Missouri than any other sort. It is a large growing sort having very broad leaves of finest quality and largely used for fine bright

leaf, especially for cigarette tobacco, fine bright mixing tobacco and outside wrappers for plug. Commands highest prices on the market and where soil is suitable the most profitable of all sorts.

Pkt., 10c; oz., 20c; 1/4 lb., 50c.

360 Stand-up Burley—Has all the good qualities of White Burley but superior to that variety in many respects. The leaves instead of drooping have a more erect position on the plant, turning upward rather than down—hence, the name "Stand-up". It is fast becoming the most popular type of Burley and largely grown by planters in all Burley sections.

Pkt., 10c; oz., 20c; 1/4 lb., 50c.

361 Havana—A fine strain of Americanized Havana used for cigars and adding flavor to smoking mixtures.

Pkt., 10c; oz., 20c; ½ lb., 50c.

ROCK PLANT SEEDS

In the whole history of gardening there has never been so much interest taken in the cultivation of rock plants as there is to-day. Not very many years ago it was quite exceptional to find a rock garden worthy of the name in any but the largest of our private gardens. To-day, however, a garden no matter how small, is not considered complete unless it contains a portion devoted to the cultivation of Alpines. Many Rock and Wall Plants may be easily raised from seed. Of those shown below, all are hardy and will succeed in our trying American climate.

513 Alyssum, Saxatile Compactum (Basket of Gold)—Small, bright yellow flowers in April and May. Height, 12 inches. Pkt.... Aquilegia, Mrs. Scott Elliott's Strain (Columbine)— A very refined mixture of Long Spurred Hybrids. Pkt.....15c 539 Arabis Alpina (Rock Cress)—The foliage forms a dense carpet which is completely covered with small white flowers in May. Height, 6 inches. Pkt. 542 Arenaria Grandiflora (Sandwort)—Covers itself with pure snow-white starlike flowers. May. Pkt..... violet-purple. Pkt......15c 595 Campanula Carpatica, Blue (Blue Carpathian Harebell)—Free-flowering, hardy plants continuing in bloom the whole season. Height, 6 inches. Pkt. 618 Cerastium Tomentosum (Snow-in-Summer)-Greyfoliaged trailing plants covered with delicate white flowers in May and June. Likes dry sunny spot. Height, 6 inches. Pkt..15c 665—Dianthus Caesius (Cheddar Pink)—Narrow grey leaves with rose-pink fringed spice scented blossoms. Pkt.......25c 666 Dianthus Deltoides (Maiden Pink)—Deep pink

For complete descriptions and cultural directions of all varieties offered above, together with list of Rock Plant seeds not offered on this page, see varieties marked with a (*) on pages 35 to 50, inclusive.

The entire above collection of seeds for the Rock Garden, 25 varieties. \$3.75 value for \$2.75.

Individual Selection at Packet Price.

Rock Garden

Flower Seed Novelties

The descriptions are those of the raisers

AQUILEGIA (Columbine)

COREOPSIS (Tickseed)

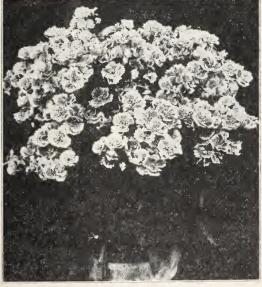

592 Mayfield Giant—This very fine perennial of Australian origin, is a considerable advance over any strain yet introduced of this highly ornamental and very useful flower. It produces a taller and more vigorous plant, with longer and firmer stems and larger individual blooms, of which the ray petals are broader and form a more perfect corolla. The color is the same familiar yellow, if anything a shade more intense. Both for the border and for cutting, we can strongly recommend this excellent new strain. Pkt.

CHRYSANTHEMUM (Shasta Daisy)

620 The Prince—A Shasta Daisy producing very large pure white flowers, 5 inches in diameter, borne on long stiff stalks, 18 inches and more in length, of which the vigorous plant throws up a large number. Blooming takes place in about mid-season and it is no doubt the best variety for cutting yet produced. Pkt. 25c

DIANTHUS SWEET WIVELSFIELD (Dianthus Allwoodi x D. Barbatus)

DIANTHUS HIGHLAND OUEEN

DIANTHUS SWEET WIVELSFIELD

DELPHINIUM

Delphinium Blackmore & Langdon's

Flower Seed Novelties—Cont'd

The descriptions are those of the raisers

GENTIANA

688 Hascombensis—This beautiful new Gentian produces large floriferous heads of bloom. The individual flowers are about 1½ inches across and of a bright mid-blue, slightly speckled with white towards the base. Will grow either in sun or shade, wherever it can get its roots well down into the soil, and it is fond of bottom moisture but does not like a really wet place. Received an Award of Merit from the Royal Horticultural Society of England. Grows 1½ to 2 feet high and blooms during July and August. Perennial. Pkt. 6

MECONOPSIS

NEW ICELAND POPPY (Coonara Pink)

802 Papaver Nudicaule Roseum—This new Iceland Poppy adds an exceptionally lovely color to this class, a rose-pink suffused with salmon pink. If sown in the hot bed in March or April, plants will bloom the same year.

Meconopsis Baileyi

Gentiana Hascombensis

Sweet Peas

SWEET PEAS

845 FluffyRuffles—Aremarkable new type with large double and ruffled blooms. The color is a light cream-pink. Pkt...15c

VERBASCUM (Mullein)

886 Phoenicium Hybrids—A hardy perennial with spikes of white, pink, purple, mauve and blue flowers. Unusually attractive for cutting and as a showy plant in the hardy border. Will bloom from June to September. Height, 2 feet.

ZINNIA

ME CHOICE FLOWER SEEDS

With Cultural Instructions and Information

We take pleasure in presenting to our customers, this season, the following list of flower seeds which will be found to contain many old favorites, as well as the new novelties. We have purposely omitted many varieties because they are being improved upon each year.

This season we have added various sorts of new flower seeds not previously catalogued, which we offer to our customers who wish to entrust us with an order.

Flower seeds are divided into three classes: Annuals, Biennials and Perennials.

Annuals are those flowers that bloom from seed the first year, then die. Among these are Asters, Marigolds, Nasturtiums, Zinnias and many other sorts.

Biennials from seed generally bloom the second year, then die. Some varieties will bloom the first year if planted early.

Perennials are those that endure our winters with little or no protection, depending upon the variety and location. A large majority of the Perennials will bloom the first year from seed, especially if sown early, or they can be sown in August or September. They will bloom the following year and will sometimes live indefinitely.

All varieties marked with a (*) throughout the list of Flower Seeds are especially suitable for the Rock Garden.

ACHILLEA (Milfoil, or Yarrow)

ACONITUM (Monkshood)

Bold spikes of hood-shaped flowers, valuable for cutting; very effective in flower borders and shrubberies, thriving anywhere. Hardy perennial.

AGERATUM (Floss Flower)

A beautiful hardy annual which bears in dense clusters attractive feathery flowers which are very useful for bouquets or decoration. It grows in bush form and is desirable for outdoor bedding and borders, bearing profusely and covered with blooms nearly all summer.

505 Little Blue Star—Compact with small, beautiful, mauve-colored flowers, suitable for edging or rockwork. Pkt......20c

506 Blue Perfection—A splendid dwarf bedding variety, the darkest of all blue ageratums. ¼-oz., 50c. Pkt........10c

AGROSTEMMA (Mullein Pink)

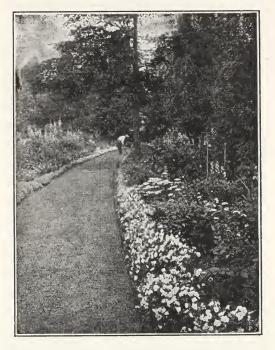

508 Coronaria—Silvery foliage and bright crimson flowers; free-flowering hardy perennial of easy culture; blooms the first season; fine for cutting; 2½ to 3 feet; June to August. Pkt...10c

AMPELOPSIS VEITCHI

Boston Ivy-See page 52.

ANEMONE (Windflower)

517 St. Brigid—A very pleasing perennial, producing large, Irish poppy flowers; few plants compare with them in beauty; fine for bouquets. 1/4-oz., 75c. Pkt................................. 10c

ALYSSUM

A hardy annual, which is useful for borders, edgings or massing in small beds. It blooms very early and is almost covered with clusters of trusses of small white flowers which are sweet scented having a peculiar, delicate fragrance.

■509 Carpet of Snow—The dwarfest of all Alyssums. Of creeping habit, forming a dense carpet of beautiful white flowers. Height, 4 inches. ¼-oz., 25c. Pkt............10c

512 Lilac Queen—Is of dwarf, compact habit and the deep layender-like flowers are borne in profusion. 1/4-oz., 25c. Pkt. 10c

PERENNIAL ALYSSUM

ANCHUSA

ANTHEMIS (Hardy Marguerite)

518 Kelwayi—A most satisfactory hardy perennial, bearing all summer daisy-like golden-yellow blossoms; excellent for cutting; 2 ft. ½-oz., 40c. Pkt. 10c

ANTIRRHINUM (Snapdragon)

Well-known, showy border and bedding plants of long blooming season. The spikes have curious shaped tubular flowers with spreading lobes and finely marked throats. They are fragrant, brilliant colors and most desirable for cutting in addition to being one of the most ornamental bloomers for garden uses grown from seed. Succeed in any good garden soil, growing 1½ to 2 ft. high.

Seed sown out-of-doors in the open ground early in May will bloom in July. For early flowers, sow seed indoors in pots or flats, or in a cold frame, in March and transplant the seedlings out-of-doors as soon as the weather will permit.

TALL GIANT VARIETIES

Bearing large spikes of enormous flowers in many brilliant colors. Our strain is extra choice.

Colors. Our strain is extra choice.
519 Apple Blossom—A delicate apple blossom pink with a touch of light yellow on the lip. ½-oz., 60c. Pkt10c
520 Canary Bird—Canary yellow. 1/8-oz., 60c. Pkt10c
521 Indian Summer—Velvety copper scarlet. 1/2-oz., 60c. Pkt
522 Old Gold—Deep golden yellow. 1/8-oz., 60c. Pkt10c
523 Snow Flake—White with light yellow lip. 1/6-oz., 60c. Pkt
524 The Rose—Rose pink. 1/8-oz., 60c. Pkt10c
525 Finest Mixed—All colors, 1/2-oz 50c Pkt 10c

HALF DWARF VARIETIES

	This class of snapdragons attains a height of 18 inches, has a great range of color, and is suitable for bedding.					
526	Empress—Deep velvety crimson. 1/8-oz., 40c. Pkt10c					
527 40c.	$ \begin{array}{llllllllllllllllllllllllllllllllllll$					
528	Golden Queen-Bright yellow. 1/8-oz., 25c. Pkt10c					
529	Philadelphia Pink—Bright pink. 1/8-oz., 60c. Pkt10c					
530	Purity—Glistening pure white. 1/8-oz., 40c. Pkt10c					
531	Silver Pink—A very fine shade. 1/8-oz., 60c. Pkt10c					
532	Finest Mixed—All colors. 4-oz., 25c. Pkt 10c					

AQUILEGIA (Columbine)

One of the most pleasing of hardy perennials which is very desirable, easily grown and excellent for borders. It is an old-fashioned perennial, forming large permanent clumps which bloom profusely early in the season and remain in bloom for a considerable period. Flowers are of peculiar shape, pendant, exquisite form, often with long spurs.

		specialist.					
col	or a rich	a shade of b	lue.	Pkt	 	 	3

- *534 Coerulea (Rocky Mountain Columbine)—One of the most beautiful of our native American flowers. Sepals deep blue; petals white. Height, 1 to 2 feet. April-July. Pkt 15c
- ■535 Rose Queen—Long spurred pink flowers with white center and yellow anthers. Height, 2½ ft. Pkt...........20c
- •536 Snow Queen—Long spurred pure white flowers. Pkt.15c

ARABIS (Rock Cress)

- ■539 Alpina—A hardy perennial and one of the earliest and prettiest spring flowers. The spreading tufts are covered with a sheet of pure white flowers as soon as the snow disappears. Unequalled for rockeries or edging; withstands the drought and is always neat; 6 inches. ⅓-oz., 25c; oz., 70c. Pkt......10c
- ■540 Grandiflora Superba—Similar in every way to the above, but having improved habits with larger flowers. Pkt..15c

Aquilegia, Mrs. Scott Elliott's Strain

ARCTOTIS (Blue Eyed African Daisy)

541 Grandis—Forms much branched bushes 2 to 3 ft. high; its flowers are large and showy, being pure white on the upper surface, the reverse of petals pale lilac-blue; blooms early in July and continues until hard frost. It delights in a sunny situation. Half-hardy annual. 14-oz., 30c. Pkt......10c

ARENARIA (Sandwort)

A very useful and lovely plant for the rock garden, easily raised from seed. Hardy perennial.

ARMERIA (Sea Pink or Thrift)

Attractive dwarf plants that are invaluable for the rock garden, thriving in sunny places and succeeding in any soil. Forms evergreen tufts of bright green foliage from which flowers appear in dense heads on stiff, wiry stems, from 3 to 12 inches high. May be easily raised from seed. Hardy perennial.

■543 Cephalotes, Bees' Ruby—Brilliant pink with long stems. The finest Armeria for the border and for cutting. Pkt .25c

AUBRIETIA (False Wall Cress)

Lovely dwarf-growing perennial plants that should be enjoyed in more gardens. Their use is not confined to the rock garden but when massed on dry walls or along the edges of sunny borders with white Arabis and yellow Alyssum will give rich spreads of color. Moreover, they are easily raised from seed, blooming the second year. The plants should be well clipped over after flowering so that they will make a fine growth for next year's blossoming.

- ■545 Bougainvillei—Light violet-purple. Pkt......15c

- ■548 Leichtlini—Leaves grayish, usually evergreen. Color carmine rose. Sun or half shade. Late April, May. Pkt...25c
- •549 New Large Flowering Hybrids—Exceptionally fine strain, including a wide range of many unusual colors which cannot be fixed and offered separately. 13-oz., 85c. Pkt... 15c

ASTERS

One of the most satisfactory of all annuals and unsurpassed for bedding, cutting and decoration. Asters are in many and diversified sorts, comprising various sizes, colors and forms. They bloom usually in mid-summer at a time when good cutting flowers are scarce. Plants are of vigorous growth and hardy, sometimes standing slight frost without serious injury. We recommend that various sorts be sown for blooming at different seasons. They can be easily grown without the assistance of hot bed. For earliest blooming, seed should be started in boxes or hot beds or little later they can be sown in beds in the open and transplanted where they are to bloom, allowing from one to one and a half feet between plants. Sheep manure will give good results on Asters and should be mixed with the soil before the plants are set out. We do not recommend Asters to be planted in the same soil two seasons as sometimes they suffer from disease on this account.

Our strain comprises the best of classes and of most select stocks. We advise sowings of earliest as well as late sorts for a succession of bloom.

Diseases—Bacteria and Fungi, popularly known as blights, rots, wilts and damping off. Treat seed with Semesan before sowing, also dust the rows with Semesan when the plants are set in the open ground. For further information and prices on Semesan, see page 75.

Insect Remedies—For the black bug which sometimes eats the flowers, spray with Evergreen, see page 73.

CALIFORNIA GIANTS

A Novelty of Merit

A new variety of the Crego type, with the robust habit of growth and long stems of the Beauty type. The flowers are much larger and more substantial than the Improved Crego. They measure 5 to 6 inches in diameter and stand up well when shipped as cut flowers. Their immense size and beauty, as well as their long and sturdy stems, make them very attractive.

550	White—1/8-oz., 50c. Pkt
551	Peach Blossom—½-oz., 50c. Pkt
552	Light Blue—1/8-oz., 50c. Pkt

555	Mixed Colors—¼-oz., 80c. Pkt 20c
556	Collection, one pkt. each, above 5 colors, 80c.

ROYAL ASTERS

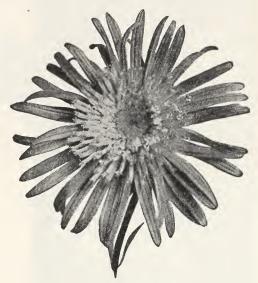

The Royal Asters are of comparatively recent introduction. They represent a most valuable branching type, blooming during mid-season. The flowers come in after the Queen of the Markets have passed and for many weeks are the main type of Asters found in the cut-flower markets. It is their long blooming season and excellent habit which has given them this foremost place.

The blooms are borne abundantly on long, strong stems. The habit of the plants assures them a place in the home garden, where they are wanted for beds or borders. The bushes grow 2 feet tall and branch freely near the ground, so that all the flowers can be cut with long stems.

557 Lavender—1/4-oz., 55c. Pkt
558 Purple—1/4-oz., 55c. Pkt
559 Lavender Pink—¼-oz., 55c. Pkt

Sunshine Aster

THE SUNSHINE ASTER Improved Anemone Flowered

A new semi-double type, introduced in England several years ago, but greatly improved by additional color selection. A most attractive variety. The plants are sturdy and strong, throwing up long flower stalks, making wonderful cut flowers. Some of the flowers have twisted petals and some have quilled petals; all have a cushion center of tiny quills of a contrasting color which makes a flower look as if it was covered with snowflakes. The blue flowers are dotted with a paler blue and some in white, and the rose in a lighter shade of pink or white. Their delicate beauty is hard to describe. A wonderful cut-flower variety, borne on long, stiff stems, and the flowers last a long time after cutting. See illustration.

BALSAM (Lady's Slipper) An old-fashioned flower which is generally popular in all gardens. It bears flowers of various shades, white, pink, red, yellow, purple, etc., some of which are beautifully striped and spotted. Hardy annual.

Balsam Pear or Apple—See page 52.
Bachelors Button—See Centaurea.
Black Eyed Susan—(Thunbergia). See page 52.

BELLIS PERENNIS (English Daisy)

A well-known dwarf growing plant which bears massive and very double aster-like flowers. It is very useful for borders or growing for cut flowers. Plants are about 6 inches high and bear in greatest profusion.

574	Giant Red— $\frac{1}{16}$ -oz., 30c.; $\frac{1}{8}$ -oz., 50c.	Pkt15c
575	Giant Rose—16-oz., 30c; 1/8-oz., 50c.	Pkt15c
576	Giant White-16-oz., 30c; 1/8-oz., 50c.	Pkt15c

577 Double Mixed—Large, double flowers, various shades, pink, red, white and other colors. 1/4-02., 75c. Pkt......15c

BROWALLIA

Coreopsis Lanceolata Grandiflora

CAMPANULA

CANDYTUFT

Hardy annuals growing 12 to 15 inches high, of branching habit and producing in profusion large clusters of flowers which are splendid for cutting. They are excellent for borders or to are splendid for cutting. They are excellent for borders plant in masses; also can be used for rockeries.

598 Giant Hyacinth-Flowered or Improved Empress Perennial Candytuft—See Iberis, page 43.

CARNATIONS

604 Marguerite—A very early blooming sort which sometimes blooms in four months from sowing. Flowers are large, double, deeply fringed, very fragrant. Plants semi-dwarf, good for bedding and desirable for cutting. Annual. Finest mixed colors. Pkt..........10c
605 Hardy Border Double Mixed—A good hardy strain for outdoor culture, flowering the second season and producing a mass of flowers in a great variety of colors; 2 ft. Pkt..15c

CALENDULA (Pot Marigold)

A hardy tannual, which will grow and succeed in almost any garden. It produces a brilliant effect in beds and borders, being extremely free blooming and commencing early and continuing in greatest profusion until frost.

586 The Ball—Bright orange flowers, very large with long stems uniformly double. A great favorite on the cut-flower market. 1/4-0z., 50c. Pkt...........15c

587 Orange King—A beautiful rich orange. Full double flowers, borne abundantly throughout the

588 Lemon Queen—Beautifully imbricated, very large double flowers. Petals light yellow, delicately edged with orange. Desirable for beds, borders and back-ground. Height, 2 ft. Oz., 25c. Pkt......10c

589 Prince of Orange—A very distinct variety, has large, double, golden yellow flowers. Petals shaded, dark orange. Produces in -A very distinct variety, has large, double, great abundance. Grows about I ft. high. Valuable for borders and edgings. Oz., 25c Pkt....

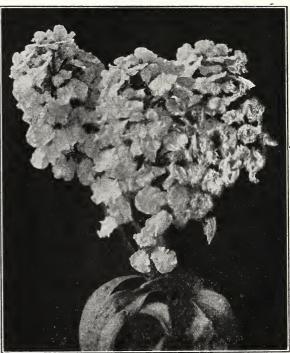

CALLIOPSIS OR COREOPSIS ANNUAL SORTS

One of the best annuals for beds or borders, producing attractive and graceful flowers on long stems which are most effective and artistic for decoration. They commence blooming early and continue in pro-fusion until early fall. Seeds are usually sown outdoors where they are to bloom but they can be sown inside and transplanted if desired. 590 Golden Wave-Bright golden yellow flowers with dark 591 Mixed—A splendid mixture comprising many varieties and a

PERENNIAL VARIETIES

592 Mayfield Giant-For description, see Novelty, page 33. 593 Lanceolata Grandiflora-A hardy perennial blooming the first year from seed and producing on very long stems a constant succession of rich, bright yellow flowers, 2 to 3 inches across. Highly desirable and ornamental for borders or beds and exceedingly valuable for cutting and decorating purposes. Oz., 60c. Pkt.. 10c

-Lanceolata Grandiflora Fl. Pl.-(Double Flowering Coreopsis.) This new double and semi-double form is just as easy to grow as the single and the extra petalage adds a further charm to the

Giant Hyacinth-Flowered or Improved Empress

610 Glasgow Prize—Dwarf growing and bearing immense deep purplish red combs; foliage dark but not abundant. Pkt.10c 611 Chinese Wool Flower—Plants grow 2 to 3 ft. high, branching freely, each branch terminating with a large roundish head like a ball of wool or chenille of a rich, bright scarlet color. They bloom early and continue until frost, retaining their rich color. 1/8-oz., 30c. Pkt......10c

CENTAUREAS

Under this name is included such popular annuals as the Cornflower, Sweet Sultans, etc. They are favorites in all sections of the country, are perfectly hardy, will grow and do well almost everywhere, and are much in demand as cut flowers.

DOUBLE CORNFLOWERS (Centaurea Cyanus)

These are also known as Bachelor's Buttons, Blue Bottle, These are also known as Bachelor's Buttons, Blue Bottle, Ragged Sailor, Bluet and sometimes as Ragged Robin, but which name belongs to one of the Lychnis and frequently results in confusion. It is always best to order by the botanical names. They are well known to every flower lover and always included in old-fashioned gardens. We have discarded the old single-flowering type, the improved double-flowering sorts offered below being much better in every way.

637 Persicum Giganteum Mixed—One of the finest strains of large flowered English Cyclamen which comprises the best shades and colors, varying through the various shades of white, pink, crimson and dark red. Greenhouse perennial. Pkt....35c

CYNOGLOSSUM (Chinese Forget-me-not)

Chrysanthemum-"The Prince"

DELPHINIUM (Hardy Perennial Larkspur)

The Delphinium, or Hardy Larkspur, is one of the most valuable of all herbaceous plants. It provides many of the light and dark shades of blue colors greatly in demand, but very scarce. Many delightful shades of lavender and mauve are also present in the newest strains, all of which will be found in the choice varieties offered below.

Cultural Directions—Delphiniums thrive in rich, deeply cultivated soil; however, any soil, even hot and sandy, if well watered and fertilized, will give excellent results.

If the flowering spikes are cut after blooming to within 8 to 10 inches from the soil, fertilized and watered, fresh growth will then be produced, which will give blossoms. Coal ashes strewn over the crown will protect the plants from slugs through the winter and spring, also forming a natural drainage of excess moisture from the crowns.

Start seed in flats in February or March, transplant seedlings when about 1 inch high, to 4 inches apart. In May, set the plants out in the border, about 3 feet apart, where they will bloom in late summer. However, the seed can be sown at any time. The above is but one plan. Another successful method is to sow seed during July, August and September in a cold frame. When the plants are large enough to handle, transplant to 4 inches apart. When the ground has frozen hard, fill the frame with straw, cover with rap aper sash, and forget them until spring. In March, take off the tar paper sash and when the ground has thawed, remove the straw. Your plants are then ready to be moved to their permanent position.

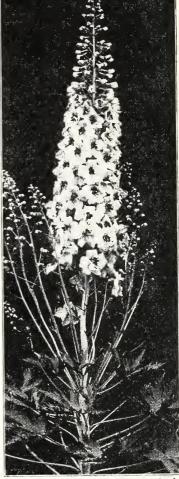

642 Large Flowered English Hybrids—A choice mixture of all shades, ranging in color from pale lavender to indigo blue. %-oz., 40c; %-oz., 75c. Pkt............10c

NAMED VARIETIES ENGLISH DELPHINIUMS

A slight variation in colors must be expected in the flowers produced from seed, but a large per cent of the seedlings will come true. The others, too, will be of good type, and more than likely some new color combinations will be found among them.

646 Blue Boy—Rich, deep blue single, with white eye. Vigorous. Height, 6 ft., 6 inches. Pkt.......50c

648 Coquette—Tapering spiral spikes, 4 ft. long, amethyst violet flowers, delicately shaded blue and set off with golden brown center. Pkt.......50c

Delphinium Blackmore and Langdon's Strain

650 Jenny Jones (Award of Merit, R.H.S.)—A statuesque beauty, blooms of pansy violet with vivid flashes of gentian blue. Spikes of great height. Pkt.................50c

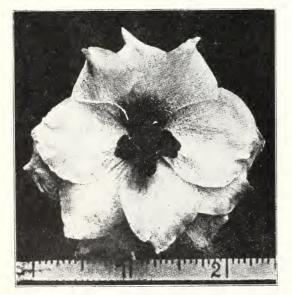

651 King of Delphiniums—Gentian blue and plum, white eye. Height, 5 ft. Pkt......50c

652 Lavanda—Deep rosy lavender, small white center, fine spike. Height, 5 ft. Pkt......50c

655 Queen Mauve—An exceptionally lovely, eveless mauve with a very graceful spike, 3 ft. long, wide at the base, and tapering to the top, with but few side-shoots. The color is an exquisite shade of pale hortense violet, shaded with salvia blue.

657 Rev. E. Lascelles—Royal blue, large and conspicuous white center. Height, 5 ft. Pkt......50c

All Delphiniums offered on this page, with the exception of varieties Bellamosum and Vanderbill Hybrids, have been imported from English and European growers. We feel certain that garden lovers will welcome this opportunity to obtain the best in Delphiniums.

Individual Delphinium bloom, actual size, Hollyhock Strain

DAHLIA

A popular autumn flowering plant which will bloom the first season from seed if started early. Dahlias are well known and hardly need description.

659 Cactus, Flowered—Collected from named varieties.
3 pkts., 50c. Pkt.......20c

DIANTHUS (Pinks) ANNUAL PINKS

Every garden should include some of the pinks because they are so easily grown and make such a wonderful display with their bright colored flowers. The plants are covered with sweet scented flowers all during the summer. Grows about 1 ft. high.

662 Hedewiggi (Single Japan Pink)—A splendid mixture of single flowers of brilliant shades, brilliantly marked. Plants dwarf and very free flowering. 1/4-oz., 25c. Pkt..........10c

663 Hedewiggi, Fl. Pl. (Double Japan Pink)—Very double with deep fringed petals. Colors vary from white to rose, illac, carmine, crimson, scarlet, purple, brown and almost black, spotted and striped. 14-0z., 40c. Pkt. 10c

HARDY PERENNIAL PINKS

Barbatus—(See Sweet William, page 49.)

**665 Caesius (Cheddar Pink)—Pleasing to the eye at all seasons with its tufts of grey narrow leaves and rose-pink, fringed, spice-scented blossoms. Good for a south wall, or any dry, hot place on the rock garden. Will vary from 5 to 10 inches high. Late May to early July. Pkt.................20c

Modes **Properties **Properties*

DIDISCUS (Blue Lace Flower)

This valuable flower deserves large cultivation for florist use. Flowers in clusters, borne on long, stout stems. General appearance not unlike lace and is often referred to as "Lace Plant." Plants about 18 inches high. Annual.

669 Coeruleus-Light blue. 1/4-oz., 50c. Pkt......10c

DIGITALIS (Foxglove)

Handsome and highly ornamental hardy plants of stately growth, succeeding under almost all conditions, and with but little attention will give a wealth of flowers during June and July. They are now used extensively with good effect for naturalizing in shrubberies, the edge of woods and other half shady places. 3 to 5 feet.

Gloxiniaeflora—This is a fine strain of the ordinary Foxglove D. purpurea, with handsome spotted Gloxinia-like flowers on long spikes.

671	White—1/8-oz., 25c. Pkt	. 10c
672	Purple—1/8-0z., 25c. Pkt	.10c
673	Rose—1/8-oz., 25c. Pkt	. 10c
674	Mixed—1/8-oz., 25c. Pkt	.10c

DIMORPHOTHECA (South African Daisy)

A hardy annual that flowers early and keeps on blooming throughout the summer.

675 Aurantiaca—Golden orange, with dark center. Pkt...10c

ESCHSCHOLTZIA (California Poppy)

Very attractive hardy annuals growing about 1 tt. high which bear large single flowers on fairly long stems which are excellent for cutting. They bloom over a long season and a bed in full flower is very gorgeous. Foliage is finely cut, has bluish tinge of bloom delicate and attractive. Flowers are more or less saucer shape, various shades of yellow, orange and orange-crimson.

677 Scarlet Beauty—Deep scarlet. ¼-oz., 35c. Pkt....10c

678 Golden West—A very large, bright yellow sort with deep orange at the base of petals. Oz., 30c. Pkt......10c

679 Mixed—An excellent mixture including yellows, creamy white, scarlet, orange and crimson shades. Oz., 30c. Pkt...10c

EUPHORBIA

Hardy annual growing about 2 feet high.

680 Variegata (Snow on the Mountain)—Leaves veined and margined with white. ¼-oz., 25c. Pkt......10c

FEVERFEW (Matricaria)

FOUR O'CLOCK (Marvel of Peru)

Old-fashioned flowers which are borne on erect, bushy plants. 2 to 3 ft. high Flowers are large tube shaped, opening in the afternoon and remaining open all night, and close again in the morning. Very desirable for borders and backgrounds for lower growing plants. Hardy annual.

682 Mixed—Comprises all shades. Oz., 25c. Pkt................10c

Forget-Me-Not-See Myosotis.

Foxglove-See Digitalis.

Dianthus Highland Queen

GAILLARDIA (Blanket Flower)

The Gaillardias are wonderful for cut flowers, blooming right through until frost, and adapt themselves to almost any kind of soil.

Pkt.		 	60c

GEUM (Avens)

Geums have become indispensable border plants. The sorts named below bloom from early summer till late autumn, and the flowers, both for their purity of color and graceful poise, are much prized for cutting. Hardy perennial.

- *689 Double, Mrs. Bradshaw—The orange-scarlet flowers are very large and full, comes quite true from seed and blooms the first year. This is a great advance over any other Geum seedling. Height, 18 inches. 1/2-0z., 35c. Pkt......15c
- ■690 Double, Lady Stratheden—Fine rich golden-yellow flowers, which match in other respects the popular scarlet variety, Mrs. Bradshaw, and will become as general a favorite. Height, 18 inches. ⅓-oz., 50c. Pkt.................20c

GERANIUM (Pelargonium)

The heads of gorgeous flowers, of many shades of color, borne continuously, render this one of the most popular plants grown, either for pot culture in winter or for bedding out in summer. Tender perennial.

692 Single Large Flowering-Mixed. Pkt......10c

GLOBE AMARANTH (Gomphrena)

693 Everlasting flowers which are highly prized for bouquets. Hardy annual, 2 ft. Superb mixed. Pkt..........................10c

GYPSOPHILA (Baby's Breath)

Pretty free-flowering plants, succeeding in any garden soil. Their misty white panicles of bloom are largely used for mixing with other cut flowers.

- 694 Elegans Alba (True Covent Garden Strain)—This is an improved large flowering, pure white form of the annual Baby's Breath. Half-hardy annual. Oz., 30c. Pkt...........10c
- 695 Elegans Delicate Pink—A pretty blush-pink form of the above and equally as valuable for cutting. Oz., 40c. Pkt...10c
- ■696 Muralis—Dwarf hardy annual with rose-colored flowers, suitable for rockwork. Height, 9 inches. ¼-oz., 25c. Pkt..15c
- 697 Paniculata—White flowers, fine for bouquets; blooms first year if sown early. Hardy perennial. Oz., 60c. Pkt...10c
- 698 Paniculata Double—Pure white, giving a very large percentage of double flowers. Hardy perennial. Pkt......25c
- ■700 Repens Rosea—A pale pink form of the above variety, both lovely in the rock-garden or in the dry wall. Pkt......15c

HELIANTHEMUM (Rock or Sun Rose)

Low growing shrubby evergreen perennial plants, loving smishine and dry, exposed positions. Easily raised from seed, but should be sown right out in the open where they are to bloom, or grown in pots and then set out.

■701 Mutabile—Forms a low mat of glossy foliage which is hidden by a mass of rose, pink, white and yellow flowers during early June and July. 8to 12 inches. ¼-oz., 50c. Pkt.10c

HELICHRYSUM (Straw Flower)

A hardy annual of the easiest culture; one of our best "Everlasting" flowers, the dried double bloom being very handsome in winter bouquets. 2 feet.

- 703 Rose Queen—Immense flowers of a rich, deep rose. Extremely beautiful under artificial light. Pkt...15c
- 704 Mixed—¼-oz., 25c. Pkt.................10c

HELIOTROPE

HEUCHERA (Coral Bells)

A very graceful hardy perennial for rockeries and borders, Foliage pale green, dwarf and compact, above which rise numerous panicles of flowers which are excellent for cutting. Easily grown from seed.

Geum Orange Queen

All 10c Packets are 3 Packets for 25c.

HIBISCUS (Rose Mallow or Marsh Mallow)

Free blooming and desirable plants, 2 to 5 ft; producing flowers of great size, brilliancy and beauty, often 10 inches across.

HOLLYHOCK

709 Exquisite—Flowers very large, beautifully fringed and curled petals, extremely double. Each white-margined petal is adorned by a large blotch, suggesting the markings of the Pelargonium. Supplied in mixture only, containing following colors: rose, light rose, carmine rose, violet and dark purple. Pkt
710 Double White—An improved strain producing perfect double flowers. ¼-oz., 75c. Pkt
711 Newport Pink—It is the finest pure pink, flowers very double. ¼-oz., 75c. Pkt
712 Double Scarlet—Very brilliant. 1/4-oz., 75c. Pkt10c
713 Double Yellow—A bright lemon color. ¼-oz., 75c. Pkt
714 Double Mixed—Comprises all shades. ¼-oz., 50c. Pkt
715 Allegheny—Flowers are distinct, having edges of the petals finely fringed. They are large size, come fairly double, and are usually valuable on account of the fringed appearance of the petals. Our strain comprises a good range of soft rich

Ice Plant—See page 52.

IBERIS (Hardy Candytuft)

Low, evergreen, shrubby perennial plants which are very valuable for dry sunny places, that are well drained. The plants should be clipped over after flowering, in order to keep them compact and sightly. Easily raised from seed.

■719 Tenoreana—A dwart evergreen plant with white flowers turning to purple. Foliage very hairy. Requires a light sandy soil and will grow in a half shaded position. 9 inches. May and early June. ½-oz., 25c. Pkt.......10c

KOCHIA—Trichophylla (Mexican Fire Bush)

(Also called Burning Bush and Summer Cypress)

LANTANA

Half-hardy greenhouse or bedding plants, constantly in bloom, bearing miniature, verbena-like heads of orange, white, and rose. Start seed indoors early.

721 Dwarf Bedding Hybrids. Excellent for bedding and pot culture. Will bloom freely all summer. 1/4-oz., 30c. Pkt. 10c

LARKSPUR—Annual TALL DOUBLE STOCK FLOWERED

Plants branch freely, bearing long spikes of beautiful double flowers. Height, 2½ ft.

pink right	Exquisite Pink Improved—A new strain, true, exquisite in color with a wonderful improved new form. An uphabit similar to the Perennial Delphinium. The color is autiful soft pink-shaded salmon. ½-oz., 40c. Pkt150
	White Spire—A pure white double larkspur with the oved base branching habit. 1/8-oz., 40c. Pkt150
724	Dark Blue—1/4-oz., 25c. Pkt
725	Light Blue—1/4-oz., 25c. Pkt
726	Finest Mixed—¼-oz., 25c. Pkt

LATHYRUS LATIFOLIUS

(Everlasting, or Hardy Sweet Pea)

Showy, free-flowering hardy perennial climbers for covering old stumps, fences, etc., continually in bloom; fine for cutting.

727 Mixed—All colors. ¼-oz., 25c. Pkt.........................10c

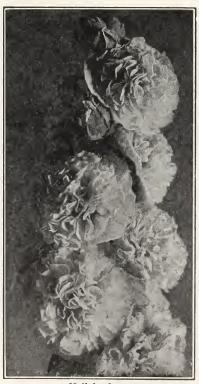

LAVENDER (Lavandula Vera)

728 Well-known, sweet-scented, hardy perennials; should be extensively grown in the mixed border; 3 ft. 1/4-oz., 25c. Pkt. 10c

LIATRIS (Blazing Star)

738 Tall Mixed—All colors. Oz., 25c. Pkt......10c

LYCHNIS

A fine old-fashioned flower, bearing large heads of brilliantly colored flowers, that liven up the border during summer and early autumn. Hardy perennial.

739 Arkwrighti—An abundance of large flowers in brilliant colors, varying from orange-scarlet to soft salmon pink. Pkt..25c

740 Viscaria Splendens—Brilliant red. 1/4-oz., 25c. Pkt. 10c

MARIGOLD

A very popular old-fashioned garden annual which is remarkable for its brilliant display of yellow and orange flowers which are borne in greatest profusion from ealy summer till frost. The African varieties are tall, usually 2 to 3 ft. high and well adapted for large beds, backgrounds or mixed borders. The French are more dwarf and can be used for borders and bedding. All varieties have finely cut, bright green foliage.

AFRICAN VARIETIES

- 741 Prince of Orange—Flowers about 3 inches in diameter, imbricated and extremely double, in tints of primrose, orange and gold. Grows 2 to 3 ft. high. 1/4-oz., 25c. Pkt.....10c
- 743 African Double Mixed—Comprises various shades and well adapted for large beds or mixed borders. ½-oz., 20c. Pkt. 10c

FRENCH VARIETIES

- 745 Legion of Honor (Little Brownie)—A single flowering Marigold, forming compact bushes 9 inches high. Begins flowering early, commencing in June, continuing until frost. The flowers are golden yellow, marked with a large spot of velvety crimson at the base of each petal. 1/4-oz., 25c. Pkt. 10c

MECONOPSIS

746 Baileyi-For description, see Novelty page 34. Pkt...50c

MIGNONETTE (Reseda)

A popular hardy annual producing dense, cone shaped spikes made up of thickly set flowers, yellow, orange, red, etc.

750 Allen's Defiance—An excellent variety for cutting. ¼-oz., 30c. Pkt.......10c

Morning Glory-See page 52.

Moon Vine—See page 52.

MYOSOTIS (Forget-Me-Not)

Few spring flowers are more admired than the lovely Forget-Me-Nots, which are especially effective when grown in masses. Perennials and hardy if given slight protection through the winter. Seed may be sown any time from spring till mid-summer. The Alpestris variety comes into bloom in April, and are largely used for bedding or borders in connection with spring flowering bulbs, Pansies, etc. The Palustris sorts do not bloom till May, but continue till fall.

- 752 Dissitifiora—Large-flowered early strain. The most valuable to form a groundwork for spring bulbs. Deep blue. Height, 9 inches. Biennial. ½-oz., 65c. Pkt.........15c

NASTURTIUM

One of the most popular of tender annuals which is valuable alike for bedding, borders and cutting. Few plants are more easily grown or remain longer in bloom. Flowers are in many brilliant shades ranging from creamy white through rose, light pink and scarlet together with yellow, orange, brown, maroon, etc., and many flowers are brilliantly spotted. Blooms abundantly from early summer until late fall.

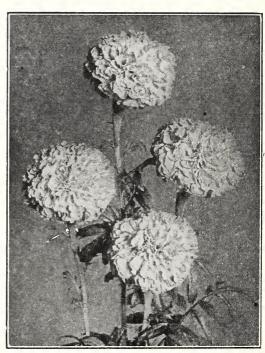

Seed is usually sown outdoors as soon as the weather is settled. If desired can be started in the house and transplanted.

754 Dwarf Mixed—Comprises all varieties and shades. Oz., 20c; ½-1b., 50c; Lb., \$1.50. Pkt.......10c

TALL VARIETIES

These are excellent for growing in beds and borders where there is plenty of room for trailing or for light trellises and for hanging baskets, vases and window boxes. Height, usually 4 to 5 ft.

755 Tall Mixed—Comprises all shades in splendid mixture. Oz., 20c; ¼-1b., 50c; lb., \$1.50. Pkt...............................10c

African Marigold

NICOTIANA

(Sweet Scented Tobacco Plant)

One of the easiest annuals to raise and one of the most effective. The blossoms in shape are not unlike a Petunia blossom, but with a longer tube. The flowers open toward evening and cmit a powerful perfume.

757 Sanderae Hybrids—A showy and profuse flowering, half-hardy annual, giving a continuous display of brilliant flowers through summer and autumn. The plant is of branching, bushy habit, 2 to 3 feet high, and carries the flowers in clusters. The flowers measure from 1 to 2 inches across and remain open all day. Many colors, mixed. ½-oz., 25c. Pkt.........10c

NIGELLA

(Love in a Mist, or Devil in the Bush)

758 Miss Jekyll—Lovely variety giving an abundance of long-stemmed flowers which are of a clear cornflower-blue, prettily set in slender elegant foliage. One of our most attractive annuals. The plants are extremely hardy, and an autumn sowing produces the best specimen for flowering in the following summer. Height, 18 inches. Hardy annual. Pkt......10c

PANSIES

This popular annual is so well known that it needs little description. Pansies are easily grown and bloom profusely for many months. Sow the seed indoors early in March or outdoors as early as the ground can be prepared. If sown during August, and wintered over in a cold frame, the plants will begin blooming very early the following spring, and continue their showy display throughout the summer.

760 Ullswater (Suttons)—New. Rich Wedgewood blue, with a blue black center. Flowers enormous. Pkt......50c

761 "Our" Fancy Mixture—A particularly fine strain comprising all the best shades and brilliantly marked. It is one of the most effective and largest flowered sorts and the flowers are of good substance on stiff stems. Plants are thrifty and extremely free flowering. When properly grown it is of faultless form and wonderfully large. ½-0z.,\$1.00, ½-0z.,\$1.75. Pkt..25c

763 Giant Trimardeau—All colors. 1/8-oz., 40c. Pkt....10c

GIANT EARLY-FLOWERING PANSIES

This remarkable new race of Pansies flowers four to six weeks earlier than the other varieties. The flowers are of immense size, on long stems. Excellent for greenhouse culture or early spring bedding.

765 Superb Mixed—1/8-oz., 30c; 1/4-oz., 50c. Pkt......20c

Our Pansies are giant strains from the best European growers.

Tufted Pansies-See Viola, page 50.

PENTSTEMON (Beard Tongue)

A beautiful perennial plant producing freely large spikes of handsome tubular flowers in almost every shade and color.

766 Gloxinioides "Sensation"—As a bedding plant this takes rank with the Petunia, Phlox, etc. It grows about 30 inches high, every branch being a spike of large, Gloxinia-like flowers in a very wide range of bright colors, including rose, red, carmine, cherry, pink, lilac, purple, etc. 2 pkts., 25c. Pkt..15c

PHLOX

Seed can be sown out of doors where they are to bloom, thinning out as may be necessary or they can be started in boxes and transplanted if desired.

PHLOX DRUMMONDI—Grandiflora

Hardy annuals growing about 2 ft. high, producing the largest size blooms in brilliant display and range of colors.

767 Alba-Pure white in large clusters. 1/4-oz., 50c. Pkt. 10c

768 Salmon-Even shade of salmon pink. 1/4-oz., 50c. Pkt. 10c

769 Crimson—Brilliant shade. ¼-oz., 50c. Pkt......10c
770 Grandiflora Mixed—An extra choice strain of the best large flowered varieties, unexcelled in profusion and brilliancy of bloom and color. ¼-oz., 30c. Pkt................10c

PHYSALIS (Chinese Lantern Plant)

771 Francheti—An ornamental plant, forming clense bushes about 2 ft. high, producing freely its bright orange-scarlet lantern-like fruits, which can be cut and dried for winter bouquets; highly interesting. Perennial. Pkt...........10c

PHYSOSTEGIA (False Dragon Head)

One of the prettiest hardy perennials, and gaining in popularity as it becomes better known. It forms dense bushes, 3 to 4 ft. high, bearing freely during the summer months spikes of delicate rosy lilae or white tubular flowers not unlike a gigantic heather.

772 Virginica—Rosy lilac. 1/8-oz., 50c. Pkt............10c

PLATYCODON

(Balloon Flower, or Japanese Bellflower)

One of the best hardy perennials, producing very showy[flowers during the whole season. They form large clumps and are excellent for planting in permanent borders or among shrubbery; easily raised from seed, which begins blooming in August if sown outdoors in April.

"OUR" Fancy Mixture (About one-third natural size)

PETUNIA DWARF GIANTS OF CALIFORNIA

PETUNIA

A very useful and free-flowering annual, thriving on any soil and in the hottest weather. For a showy bed, or for porch or window boxes, few plants equal the Petunia in effectiveness.

For earliest blooming outdoors, seed is started in shallow boxes and shifted to pots, then transplanted to beds. Or seed may be sown in open border where they are to bloom, thinning out as necessary or transplanting, usually allowing about 1 ft. to 18 inches between plants.

774 Ruffled Monsters—This is a half dwarf type of erect and robust habit. The flowers are very large and ruffled, with open shallow throats. The colors are mostly the desirable red and dark shades richly marked and veined. Pkt...........................35c

776 Double Fringed Mixed—Many brilliant colors; flowers beautifully fringed. Pkt.......35c

777 Elk's Purple—Immense flowers of rich deep Elk's purple, with large lobes forming a five-pointed star. The velvety black veins add much beauty. Pkt......25c

778 Pink Glory—Large well-formed flowers of a most exquisite luminous pink, shaded with a contrasting white throat, and marked with creamy white veins. Pkt.......25c

779 Rose of Heaven—This would be our choice if the space available permitted the planting of only one variety of Petunia. It excels by its marvelous color—a brilliant crimson-rose of rare purity. \(\frac{1}{5} \cdot \cdot \cdot \frac{1}{5} \cdot \cdot \cdot \cdot \frac{1}{5} \cdot \cdot

782 Howard's Star—This grand Petunia has flowers 2 to $2\frac{1}{2}$ inches in diameter, of fine texture, with more or less veining. Ground color a crimson maroon. In the center of each flower is a five-rayed star of light bluish pink or white. Height of plant, $1\frac{1}{2}$ to 2 ft. $\frac{1}{2}$ -oz., 45c. Pkt................10c

BALCONY PETUNIAS

A splendid large and free flowering type either for window boxes, vases, hanging baskets, etc., the flowers average 3 inches across and make a very effective display over a long season.

788 Finest Mixture— $\frac{1}{16}$ -oz., 50c. 2 pkts., 25c. Pkt....15c

PORTULACA (Moss Rose)

These are excellent for bedding, vases, rockeries or window-boxes, producing a dazzling display of colors. Single varieties have cup-shaped flowers about 1 inch across, range through many shades of white, pink, yellow, orange, red and some are striped. The double varieties have narrow petals which are set closely and form full heads. Stems and leaves are succulent, creeping and ornamental. They will stand a great amount of drought and bloom through a long season. Height about 9 inches. Hardy annual.

PYRETHRUM (Painted Daisy)

791 Hybridum, Single Mixed—Hardy perennial, bearing large daisy-like flowers, ranging in color from white to deep red, with bright yellow centers; blooms in May and June, and again in the fall; and is one of the most graceful and long-lasting cut flowers; 2 ft. 1/4-oz., 50c. Pkt..................15c

Home Flower Growing, by E. C. Volz, 151 illustrations, 364 pages. Price, \$3.50. For complete description, see page 95.

POPPIES

Well-known and popular annuals and perennials which produce flowers varying from moderate sized single cup-shape blooms to very much larger flowers sometimes 4 inches across both single and double. Colors are extremely vivid and brilliant; very graceful, hence, fine for cutting and for home decoration. Grown in beds and masses nothing is more brilliant in the garden and they are of easiest culture.

ANNUAL VARIETIES

793 Shirley—A beautiful sort which blooms a long season and bears large single flowers of flat but artistic shape. Most petals are very silky texture with an intense sheen. Others plain, some crimpled, some like tissue paper and others wavy. Colors range through shades of pink, rose, scarlet, carmine and are generally edged with lighter shades. Choicest Mixed Colors. Oz., 40c. Pkt.

795 Tulip—One of the most brilliant of poppies, bearing bright searlet tulip-shaped flowers with a dark spot at the base of each petal. It makes a gorgeous display in masses. Grows about one foot high. ½-oz., 25c. Pkt.................10c

PERENNIAL POPPIES

Sow the seeds thinly right where the plants are to grow.

ORIENTAL POPPIES (Papaver Orientale)

799 Princess Victoria Louise—Rich salmon pink. Pkt....25c

801 Orientale Hybrids Mixed-1/4-oz., 50c. Pkt....... 10c

ICELAND POPPIES (Papaver Nudicaule)

*802 Coonara Pink—For description, see Novelty page 34.
Pkt......25c

■803—Sunbeam—A great improvement on the ordinary mixed. The stems are longer and the flowers larger. 2 pkts., 25c. Pkt. 15c

Iceland Poppy-Coonara Pink

PRIMULA (Hardy Primrose)

The Primrose is a splendid plant for naturalizing near shrubs or shaded nooks and moist places on the rockery. Primroses are not at home in the open herbaceous borders, but thrive in sheltered, lightly wooded places, where they may grow among the Violets, Hepaticas and Bloodroot. They generally establish themselves in damp and shaded positions which are generally most difficult to fill. Perennial.

**804 Auricula Alpina—The growth is very attractive, forming in a rosette, broad thick foliage. The flower stalks rise to a height of 6 to 8 inches, bearing heads of bloom of various colors; exceedingly fragrant. Will grow in sun or half shade. Protect in winter. In flower during late April and May. Pkt..25c

*806 Cortusoides—Broad soft foliage in a rosette close to the ground. Flowers in early summer, deep rose; prefers light, rich, well-drained soil, in a half shaded position in the border or rockery. 6 to 10 inches high. Pkt.......................25c

#807 Vulgaris—The old English Primrose with pale yellow flowers. 6 to 9 inches high. Grows in half shade. Mid April to June. 16-0z., 40c; 1/6-0z., 65c. Pkt..................................15c

POLYANTHUS (Bunch Primrose)

Showy, free-flowering perennials that should be used largely inborders, wild gardens and rockeries. If your soil is light and dry and you have no shaded situations, do not try to grow the true Primroses as offered above, but confine your efforts to the Polyanthus that we list below. The Polyanthus or Bunch Primrose will thrive in full sun if they have some moisture at the root; if not, they must be given the comfort of partial shade.

**808 Munstead Strain Mixed—This strain of Bunch Primroses has been perfected in the gardens of Miss Jekyll of England. The flowers show shades of yellow, from cream to dark orange. 6 to 10 inches. Late April-May. Pkt.................35c

Our Primroses are pure strains from the best English growers.

RICINUS (Castor Bean)

810 Zanzibariensis—Grows to immense size. Leaves sometimes measure 30 inches across and range in color from bright green to deep bronze. Choice mixed colors. Oz., 25c. Pkt..10c
811 Mixed Sorts—A desirable mixture of all reprising

SALPIGLOSSIS (Painted Tongue)

A very showy, half-hardy annual which is desirable both for bedding or border plants. Has richly colored funnel-shaped flowers of many shades including yellow, buff, crimson and scarlet and extends through to purple and almost black.

812 Tall Finest Mixed-Height, 2 ft. 1/8-oz., 25c. Pkt..10c

SALVIA (Scarlet Sage)

One of the most useful and effective bedding plants which produces immense masses of brilliant turkey-red flowers from early in the season, continuing in uninterrupted succession until frost. Blooms are borne on long spikes well above the foliage and continue in good condition a long time. Spikes are often 8 to 10 inches long and have 30 to 40 tube-like flowers borne in a feathery manner on each side of the stem.

Seed should be started in boxes, hot beds or greenhouse, transplanted and set out of doors after the weather has become warm. Blooming the first season.

815 Farinacea—A perennial variety, but best treated as an annual. Color, light blue; 2 ft. Pkt......15c

SAPONARIA (Rock Soapwort)

SAXIFRAGA (Rockfoil)

Saxifrages thrive in a deep gritty loam and sunshine. Sow the seed upon the surface of a pot or flat of very fine sandy soil, not covering it at all. Cover with paper or boards to insure darkness and to check the evaporation of moisture. Perennial.

****819 Species Mixed**—This mixture contains both the Mossy and the Encrusted species in colors of white, blush, pink or crimson. 6 to 15 inches. May and June. **Pkt**.........................25cc

SCABIOSA (Pin Cushion Flower, Mourning Bride)

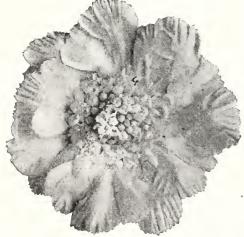

One of the old-fashioned popular annuals which produce an abundance of many colored flowers which are excellent for cutting. The blossoms are borne on long stems, are fragrant, double and somewhat in the shape of a pin cushion. It makes an effective garden plant for bedding or borders.

Seed can be sown in open border and thinned out from 1 to 1½ ft. apart. Grows 2 to 2½ ft. high.

ft. apart. Grows 2 to 21/2 ft. high.
820 Peach Blossom (New)—"Highly commended" by the
Royal Horticultural Society of Great Britain. A beautiful
shade of peach blossom pink, large size and long stem. An ex-
cellent cut flower. 3 pkts., 50c. Pkt20c
821 Shasta (New)—A pure white of enormous size, the flowers
measuring 3½ inches across with extremely long stems. 3 pkts.,
50c. Pkt20c
822 Azure Fairy—Clear lavender blue. ¼-oz., 30c. Pkt. 10c
823 Crimson—Rich rosy crimson. 1/4-oz., 30c. Pkt 10c
824 Yellow—¼-oz., 30c. Pkt
825 King of the Blacks—1/4-oz., 30c. Pkt10c
826 Tall Double Mixed—A splendid sort for large beds or
borders. Comprise many beautiful colors. Height 2½ ft.
¼-oz., 25c. Pkt

PERENNIAL SCABIOSA

827 New Giant Hybrids (Isaac House Strain)—A wonderful improvement in perennial Scabiosa. They are more vigorous in their plant growth, having longer and stouter stems with the average size of the flower, more than a third larger than the best strain of Caucasica we have heretofore seen. The outer edges are ruffled and fringed and the colors range from a very light lavender to a dark blue. Pkt
828 Columbaria—This is a South African form of the European Scabiosa and although reminiscent of Caucasica, is a distinct type. It can be briefly described as a hardy, low growing perennial with fine, light-green foliage, some of the flowers measuring from two to two and a half inches across with short, compact petals, borne on long, slender, but strong stems. We offer this choice perennial in a beautiful pink shade which is a new color in Perennial Scabiosa. Pkt
829 Caucasica (Blue Perfection)—3 ft., especially valuable for cutting, the blooms lasting an unusually long time in water. Pkt
830 Caucasica Alba—A large, pure white variety; the flowers, 3 to 4 inches across on long stems, are exquisite for vases, lasting a long time. Pkt

Scabiosa-Isaac House Strain

SCHIZANTHUS

(Butterfly Flower or Poor Man's Orchid)

An attractive hardy annual growing about 20 inches high, which is of neat, compact growth with finely cut foliage. The

Scabiosa

plant bears very attractive flowers ranging in colors from white to purple and are shaded from their edges to throats with darker colors. Flowers resemble somewhat the butterfly and are borne in clusters or spikes. Seed can be sown outdoors after danger of rrost or started earlier indoors and transplanted.

331 Finest Mixed Colors—\(\frac{1}{16}\)-02., 50c. Pkt. 10c

EARLY GIANT IMPERIAL STOCKS

(Cut and Come Again)

A recently developed strain of early-flowering Winter or Brompton Stocks, forming much-branched plants about 2½ ft. high and having numerous spikes of very large, double, delightfully fragrant flowers, they are of special value as pot plants for greenhouse decorations and for cutting during the dull winter months; for this purpose seed should be sown from July to September; if sown in February or March will produce plants that will bloom out-of-doors from mid-summer till frost. Annual.

832 Apple Blossom—Blush pink. ½-02., 50c. Pkt.....20c

034	Apple Blossom—Blush plink. 16-02., 50c. Fkt20C
833	Chamois—Ivory tinted old rose. \(\frac{1}{16}\)-oz., 50c. Pkt20c
	Fiery Blood Red—Striking. 16-oz., 50c. Pkt20c
835	Rose—Deep rose pink. 16-oz., 50c. Pkt20c
836	White—Pure White. 16-oz., 50c. Pkt20c
837	Golden Ball—Canary yellow. \(\frac{1}{16}\)-oz., 50c. Pkt20c
838	Violet—Soft violet purple. \(\frac{1}{16}\)-oz., 50c. Pkt20c
839	Superb—Mixed. 16-oz., 50c. Pkt

STOKESIA (Cornflower Aster)

840 Cyanea—This is not new, but is a rare and beautiful hardy perennial. The plant grows about 24 inches high, each bearing from 20 to 30 handsome lavender-blue cornflower-like blossoms; in bloom from July till frost. One of the choicest subjects for the hardy border and indispensable for cutting.

SUNFLOWER (Helianthus) Hardy Annual

Of easy culture, and the newer sorts are among the most ornamental and effective of all garden annuals. The single flowering sorts are indispensable for cutting. Bloom early and continue until frost.

842 Red—The flowers are of a chestnut red color, which appears as a ribbon around the center, while the points of the petals are tipped yellow. Grows to a height of 6 feet. 2 pkts., 25c. Pkt. ... 15c.

SWEET PEAS

Sweet Peas are among the seeds to be sown very early in the spring. They should go into the ground as soon as the soil can be worked, and should be planted six inches deep, being covered at first with only two inches of soil, the trench being filled as the plants grow. It is best to soak the seeds for several hours before they are planted. If this plan of planting early is followed, and if the Sweet Peas are kept mulched with peat moss or with lawn clippings or else watered abundantly, they will generally give a fine crop of blooms.

EARLY FLOWERING SPENCER VARIETIES

While these are especially adapted for forcing under glass for winter and early spring blooming, they are also valuable for outdoor culture, coming into bloom five or six weeks earlier than the regular Spencer type, and if the flowers are kept cut, they will continue to bloom for a long time.

- 847 Aviator-Dazzling crimson-scarlet.
- 848 Ball Rose-Rose-pink.
- 849 Blue Bird-A splendid rich, deep blue.
- 850 Burpee's Orange—Deep orange.
- 851 Eldorado-Clear, light orange.
- 852 Giant Rose-Rose pink, very large.
- 853 Harmony-Clear lavender.
- 854 Mrs. Kerr-A fine shade of salmon.
- 855 Rose Queen-Light rose-pink.
- 857 White Harmony-Pure white, long stems.
- 858 Zvolanek's Rose-Deep rose-pink

Price—Any of the above. Oz., 60c; 1/4-lb., \$1.75.

859 Early Flowering Mixed—A splendid mixture containing all colors. Oz., 50; 1/4-1b., \$1.50. Pkt......10c

SUMMER FLOWERING SPENCER SWEET PEAS

- 861 Heavenly Blue-Delphinium blue.
- 862 Hercules—Giant pure pink.
- 863 Jack Cornwell, V. C .- Dark blue.
- 864 King Edward Spencer—The large flowers are waved and crinkled; standard and wings deep rich carmine scarlet.
- 865 King White Giant white.
- 866 Mary Pickford-Cream pink suffused with salmon.
- 867 Matchless-Clear cream.

Jack Cornwell-Dark blue.

868 \$MR Best Spencer Mixed—Comprises the best varieties in all beautiful shades and colors and much superior to that offered indiscriminately as coming from growers. Oz., 15c; ¼-1b., 50c; 1 lb., \$1.50. Pkt.................10c

Spencer Sweet Peas

Sweet Peas Hardy-See Lathyrus, Page 43.

Larger flowers on Sweet Peas are sure when the seed is treated with Acme Inoculation. (See Page 56.)

SWEET ROCKET (Hesperis)

Deliciously sweet-scented flower for garden or cutting Hardy perennial.

 870 Violet—¾-oz., 25c. Pkt
 10c

 871 White—¼-oz., 25c. Pkt
 10c

SWEET WILLIAM (Dianthus Barbatus)

A well-known, old-fashioned perennial which has long been used for beds and borders. It is one of the most desirable plants in the garden, is easily grown, very hardy and free flowering, continuing in bloom for several weeks. The flowers are borne in heads or clusters, sweet scented, in brilliant colors ranging from pure white through pink, crimson, etc., to deep purple. Most of them have two colors in the same flower. They are borne on stiff stems in graceful profusion and the clusters are often 3 to 4 inches across. Useful for cutting. Height, 1½ ft.

875 Newport Pink—A distinct new color which originated in one of the far-famed gardens at Newport, R. I. In color it is what florists call watermelon-pink or salmony-rose. Strikingly brilliant and beautiful; the flowers are borne in massive heads on stems 18 inches high. For mid-season mass bedding it has no equal. It is also very effective for cutting. ½-oz., 50c. Pkt 10c

876 Holborn Glory—This strain is a large-flowered selection of the auricula-eyed section, the most beautiful and admired of all Sweet Williams. The individual flowers and trusses are of extraordinary size, while the range of color, all showing a clear, white eye is truly superb. 1/2-oz., 30c. Pkt..........10c

877 Scarlet Beauty-Intense scarlet. 1/4-oz., 40c. Pkt. 10c

878 Double Mixed—A splendid strain of this beautiful perennial comprising a great variety of excellent shades. Pkt 10c

THALICTRUM (Meadow Rue)

Handsome dark foliage resembling the Columbine. The flowers are borne in feathery clusters. Very useful in making bouquets. Its light and graceful habit makes it very valuable in the perennial border or when placed among the shrubbery.

879 Aquilegifolium—Graceful foliage with masses of pure white flowers, stamens purple. Hardy perennial. Will thrive in sun or half shade. Late May to mid July. Height, 2 to 3 ft. Pkt......20c

880 Dipterocarpum—A handsome herbaceous plant, with loose sprays of clear rosy purple with lemon-yellow stamens and anthers. The plant is of strong growth, about 4 to 5 feet high. The flowers are produced during August and September. Thrives best in a poor soil in a sunny position. Pkt......25c

TRITOMA

(Red-hot Poker, or Torch Lily)

TROLLIUS (Globe Flower)

882 Mixed Varieties—Saved from a collection of the newest varieties, ranging in color from pale yellow to deep orange; on strong stems 2 feet high. Hardy perennial. Grows best in a half shaded moist situation. May and June. Pkt...........25c

TUNICA (Coat Flower)

VALERIANA (Garden Heliotrope)

Showy hardy perennial; forms small flowers in dense clusters. Very fragrant.

884 Crimson—1/6-oz., 25c. Pkt..................10c

78-02., 23c. 1 kt......

VERBASCUM (Mullein)

VERONICA (Speedwell)

887 Spicata—An elegant border plant, growing about 1½ ft. high, producing long spikes of bright blue flowers in June and July. Hardy perennial. 15-oz., 60c. Pkt............15c

VINCA (Periwinkle)

Valuable for bedding, seed should be sown early. Annual.

889 Mixed—White and pink. ¼-oz., 40c. Pkt.........10c

VIOLA CORNUTA (Tufted Pansies)

A tufted plant of strong growth bearing a profusion of faintly scented flowers the size of a small Pansy. Valuable for the border or rock garden. Grows in sun or half shade. 5 to 8 inches high. If the plants are sheared several times during the season so that the flowers do not go to seed, they will bloom from late April until frost. Perennial.

*890 Jersey Gem—This variety of recent introduction possesses the dwarf and everblooming habits of the Viola Cornuta or tufted pansies and the vigorous, bushy growth and roundish foliage of the finest English bedding varieties. Color is pure, rich violet and sightly perfumed. Pkt......35c

*891 Rosy em—Dwarf compact habit, color rosy-pink. Pkt. 15c

■892 Bedding Mixed—The plants are more hardy than Pansies, and of vigorous growth, forming deep-rooted compact tufted clumps. Planted in masses or lines they form perfect mats covered with myriads of flowers. ⅓-oz., 50c. Pkt....10c

VERBENA HYBRIDA GRANDIFLORA

A magnificent new strain of Verbenas, of robust, compact habit and free blooming. The trusses are immense, the individual florets measuring an inch in diameter. These Verbenas are fixed and come true from seed.

Seed can be started in the house and transplanted to the garden when the weather is warm or sown in the open ground, thinned and transplanted. Verbenas from seed are much more thrifty and less liable to rust than from cuttings. Annual, 1 ft. high

WALLFLOWER

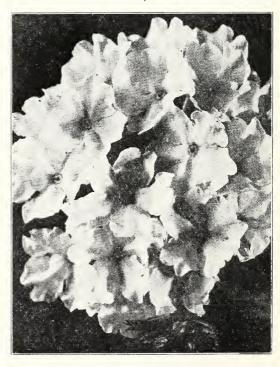

"WILD GARDEN" FLOWER SEED

This comprises a mixture of annuals, biennials and perennials and consists of sorts growing at moderate heights. No vines, trailers, or very tall growing plants being used in it.

903 Large Pkt., 10c. Oz., 25c. ¾-lb., 75c. 1 lb. \$2.50

XERANTHEMUM (Everlasting Flower)

904 Double Mixed—Bright and pretty "Everlasting" with silvery foliage and silky flowers in pink, white and purple. Pkt. 10c

Verbena Grandiflora Type

Dahlia Flowered Zinnia

ZINNIAS (Youth and Old Age)

The wonderful new shades in the Dahlia Flowered Zinnias, represented below in Luminosa, Old Gold, Eldorado, and the striking innovation offered for the first time, Crown O' Gold, all add to the assortment now available.

910 Crown O' Gold—This new Zinnia derives its name and distinction from the fact that each petal of the flower is overlaid with a deep golden yellow at the base, while carrying out the individual flower color at the tip. The effect is a very pleasing two-tone color harmony. The color range comprises the more popular shades, including old rose, cream, yellow, carmine and burnished red; the latter a new shade in Zinnias. Pkt...35c

All Dahlia Flowered Zinnias offered on this page have been secured from the originator, Bodger, in California.

ZINNIA LILLIPUT

This type of Zinnia forms a bush about 1 foot high and is covered with small, very double flowers in protusion.

931	Canary Yellow-1/4-oz., 40c. Pkt
932	Crimson Gem—1/4-oz., 40c. Pkt
933	Golden Gem—1/4-oz., 40c. Pkt
934	Salmon Rose—¼-oz., 40c. Pkt

937	White Gem—1/4-oz., 40c. Pkt
938	Mixed Colors—1/4-oz., 40c. Pkt
939	Collection, one Pkt. each of the above 7 varieties for 50c.

ZINNIAS (Youth and Old Age) GIANT DAHLIA FLOWERED

The latest development in Zinnias. This type was awarded the Gold Medal and the Award of Merit by the Royal Horticultural Society of England, at the Chelsea Flower Show in London, England, in June, 1924. It took seven years of painstaking care and selection to produce this type of Zinnia, but it is now recognized the world over as being the largest and most beautiful Zinnia. The Dahlia Flowered Zinnia is a good forcer and money maker for florists. The variety Polar Bear is used as a bunching flower for Mother's Day, while Old Rose, Oriole, Crimson Monarch, Exquisite, Canary Bird and Scarlet Flame are recommended to force as desirable colors for florists for early spring trade. The plants are sturdy and the flowers, often measuring 6 inches in diameter and 4 inches in depth, closely resemble the Show Dahlia. Annual.

914 Golden Dawn (New)—A beautiful golden yellow of immense size and good form. Very attractive. Pkt......15c

916 Exquisite—By far the most pleasing of our collection.

Truly Dahlia flowered as regards form and size. Color, light rose with center a deep rose. (Tyrian Rose). Pkt.......15c

917 Old Rose—This is adequately described by its name, as it is of the real old-rose shade; it is large, and for charm and beauty we consider it ranks next to Exquisite. Pkt......15c

918 Illumination—Similar to Exquisite, but a striking color of deep rose. (Tyrian Rose.) Pkt......15c

922 Meteor—A rich, glowing deep red (Spinel Red) and the darkest of all the red shades. Fine form, with good depth of petal. Very large and more floriferous than other reds. Pkt..15c

925 Dream—A fine, deep lavender, turning to purple (Mallow Purple), a new, desirable shade in Zinnias. Pkt......15c

926 Purple Prince—A fine, deep purple (Rhodanthe Purple), large and well-formed. Pkt.......15c

927 Polar Bear—A very large pure white, the best white yet seen in Zinnias. True Dahlia form. Pkt.......15c

928 Canary Bird—A delicate shade of primrose, very large and holds its color well until out of bloom. Pkt......15c

ZINNIAS VARIOUS MIXTURES

942 Dwarf Curled and Crested—Twisted and curled petals which make very effective flowers. 4-oz., 25c. Pkt......10c

COLLECTION OF FLOWER SEEDS

The following collections are made up of the popular sorts, that will thrive under the average garden conditions.

ANNUALS FOR CUT FLOWERS

A dozen sorts that will give you a garden display as well as cut flowers from early summer until frost.

400 A collection of 12 packets (our selection)......90c

TWELVE OLD-FASHIONED HARDY PERENNIALS

This collection is made up of the old-fashioned hardy perennials that were popular in our grandmother's gardens, including Columbine, Hardy Larkspur, Foxgloves, Sweet Williams, Shasta Daisies, and others equally desirable.

401 A collection of 12 packets (our selection)......\$1.00

ANNUALS FOR ROCK GARDENS

A desirable collection of annuals for the newly made rockery that should give results the first year. At the same time plant Hardy Perennial seeds for permanent results from the following collections: "Perennials for Rock Gardens", found on this page or the complete collection of 28 varieties of Rock Plant seeds found on page 32.

402 A collection of 8 packets (our selection)................60c

PERENNIALS FOR ROCK GARDENS

This collection is made of varieties that will succeed under conditions found in the average rock or wall garden, including Rock Cress, Golden Alyssum, Columbine, Primula, Aubrietia and others equally popular.

403 A collection of 12 packets (our selection)......\$1.15

Collections of Asters, Sweet Sultans, Sweet Peas, Zinnias, etc., are offered under their respective heads from page 32 to page 52.

VINES; CLIMBERS AND TRAILERS

AMPELOPSIS

(Japanese or Boston Ivy) Hardy Perennial

951 Veitchi—The leaves are olive green turning to scarlet in the autumn. Perfectly hardy; grows 30 to 60 feet. It clings firmly and permanently to walls, trees, etc. Very desirable.

BALSAM—PEAR AND APPLE (Momordica)

Tender annual climbers bearing ornamental fruits of various colors. They grow 10 to 12 ft. high. Have light green foliage, rather large leaves and are very graceful.

952 Balsam Apple—Like Balsam Pear with foliage smaller and smaller fruits, very nearly round. Green, striped when young, afterwards becoming scarlet. 1/4-oz., 25c. Pkt....10c

CANARY BIRD FLOWER

954 Canary Bird Flower—A beautiful climber with small, beautiful, rich yellow flowers and dark foliage, the leaves resembling palm leaves. It is a quick grower attaining a height of 12 ft. Blooms profusely from July until frost. Pkt. 10c

CARDINAL CLIMBER

COBAEA SCANDENS

An attractive, rapid growing Climber with large bell-shaped flowers which at first are green but gradually change to a deep violet blue. The foliage is handsome, dark green; a great profusion of tendrils is produced and it is valuable for arches, trellises, arbors and attains a height of as much as 30 ft. in a season.

CYPRESS VINE

A beautiful rapid growing Climber with delicately cut vivid green foliage and star-like flowers which make a most effective contrast with the leaves. Annual.

Seed is usually sown outdoors where the plants are to remain, covering $1\frac{1}{2}$ inches deep. About 15 ft. high.

957 Mixed-Mixed scarlet and white. Oz., 50c. Pkt....10c

GOURDS

958 Mixed—Mixture of small sorts including many curiously shaped and ornamental sorts. Oz., 25c. Pkt............10c

HYACINTH BEAN (Dolichos Lablab)

A beautiful tender annual climber bearing large clusters of purple and white flowers which are afterwards followed by ornamental purple seed pods. Height, 15 to 20 ft.

ICE PLANT—(Mesembryanthemum)

MOON FLOWERS (Evening Glory)

The well-known and popular tender perennial so largely used. It grows to an immense height, sometimes 30 to 40 ft. in a single season and is literally covered with large white flowers 3½ to 4 inches across which open in the evening and are very sweet scented. Useful for covering old fences, dead trees, stables, and unsightly places, being extremely rapid growing with a profusion of large leaves.

Seed should be started indoors and transplanted to the open after the weather is warm. As the outer seed shell is particularly hard, a small hole should be filed in it or part shaved off with a knife before planting. Soaking in very warm water 24 hours is beneficial.

MORNING GLORIES

The well-known and popular hardy annual climbers which produce large trumpet-like flowers of many brilliant colors. Seed is sown where they are to bloom, thinning as may be desired. Height, 10 to 15 ft.

962 Heavenly Blue—Immense flowers of bright sky blue, very beautiful. 4-oz., 30c; oz., 90c. Pkt......10c

963 Japanese—Flowers of largest size, often 3 inches across, in magnificent colors and brilliantly marked. Oz., 25c. Pkt 10c Nasturtium (Tall)—See page 44.

SCARLET RUNNER BEANS

964 Scarlet Runners—A great favorite in England and Europe, not only as an ornamental climber, but for the delicious edible beans which succeed the spray of bright scarlet peashaped blossoms. Oz., 20c. Pkt.................10c

THUNBERGIA (Black Eyed Susan)

An attractive climber growing 4 to 6 ft. long which is largely used for garden vases, window-boxes, hanging baskets, etc. Flowers are about 1 inch across being of creamy white, buff and orange colors with very dark brown throats; very free blooming. A very attractive plant both in foliage and in abundance of flowers.

GENERAL LIST OF GRASS SEEDS

As the prices of many of the following seeds are subject to weekly and sometimes daily fluctuations we can not give them here but will be pleased to quote lowest market prices.

If orders are entrusted to us they will be filled at the lowest market prices on the day received.

ORCHARD GRASS (Dactylis glomerata)

Particularly suited to upland, loamy or moderately stiff soils. It ripens 3 weeks ahead of Timothy and is excellent to sow with Red Clover. It should be cut when in bloom as at that time makes most nutritious hay but if allowed to become old it contains a great deal of woody fibre; usually yields two crops and is one of the most valuable grasses for both pasturage and hay.

If sown alone it requires 1½ to 2 bushels per acre; if with Red Clover, 1 to 1½ bushels of Orchard Grass to 5 to 6 pounds of Red Clover. If for seed the same quantity of Clover and ¾ of a bushel of Orchard Grass.

RED TOP OR HERD'S GRASS

(Agrostis alba)

Particularly suited to low and wet situations and affording a splendid pasturage and fair crops of hay. Ripens at about the same time as Timothy and excellent to sow with this grass if pasturing of meadows is contemplated. It is also valuable to sow on alluvial land liable to wash and when once established and some care taken will last indefinitely.

Fancy (free of chaff) requires 8 to 10 lbs. alone or 3 to 4 lbs. (in mixtures) per acre.

Unhulled (seed with hull on)-1 bu. per acre.

TIMOTHY (Phleum pratense)

Too well-known to need description. It is the most desirable of all grasses for hay but should not be grazed as the tramping of cattle hoofs causes it to die. In this section Timothy is best suited to low, flat or alluvial soils where there is a fair amount of moisture but does not grow well in water sogged soil. Requires alone, 1 pk. per acre; if with Clover, 8 lbs. Timothy and 5 to 6 lbs. of Clover.

TALL MEADOW OAT GRASS (Arrhentherum elatius)

A very fine grass which is suitable for upland soils and especially valuable for mixture with Orchard Grass. It ripens about the same time and does not have a tendency to grow in clumps or tufts—hence, forms a better sod. Cut when in bloom it is very nutritious and it affords wonderful amount of pasturage. Requires alone 1½ to 24 of a bu.

BROME GRASS (Bromus inermis)

A hardy perennial, which can be used for meadow or for pasture. The seed may be sown in the spring or in the fall, or at any time in between when conditions are favorable. It is especially valuable for pasture, the vigorous root stalks forming a firm sod. Brome Grass is more drought resistant than ordinary eastern meadow grasses and does not require a heavy good soil, but thrives on loose, and comparatively poor land. The seed is usually sown broadcast at the rate of 20 lbs. per acre.

To sow cheap seeds to save money, is like stopping the clock to save time.

GENERAL LIST OF GRASS SEEDS-Cont'd

MEADOW FESCUE

(Festuca elatior)

A most valuable grass for permanent pasture. It grows best on low, damp soil, but does not attain its full productive power till the second or third year. (Called Evergreen Grass in some sections.)

Requires one bu. per acre, if alone. In mixture, from 1/2 to 34 of a bu.

KENTUCKY BLUE GRASS

(Poa pratensis)

A well-known pasture grass which grows well on any stiff or loamy soil in central or northern states. It is indigenous to sections of Ohio, Kentucky and Missouri and in these sections is the main grass depended on for pasture or for stock grazing for which these sections are famous. There is no better or more partitions practured. nutritious pasturage.

Kentucky Blue Grass is also largely used for lawns and when once established, lasts indefinitely. It is slow starting, however, and for lawns should be mixed with other quick growing short grasses. For pastures, sow 1½ to 2 bus. per acre; for lawns, 3 to 4 bus. per acre.

CANADIAN BLUE GRASS

(Poa compressa)

Closely akin to Nentuca, valuable for general purposes. Canadian Blue Grass is particular, well suited to high, dry situations and rocky soil, also under trees where the soil is more or less impoverished and very dry. It does not make a very good turf as it produces a large amount of stems and comparatively little forage. Valuable for mixtures and up-Closely akin to Kentucky Blue Grass but not nearly so able for general purposes. Canadian Blue Grass is particularly

PACEY'S IMPROVED SHORT RYE GRASS PERENNIAL RYE GRASS

(Lolium perenne)

A quick growing grass which is most suitable for mixtures, pastures, hay and lawns. Succeeds well on almost any soil not water sogged and affords good, quick, nutritious grazing. If alone, requires 1½ bus. per acre. In mixture, from 2 to 3 pks. per acre.

ITALIAN RYE GRASS

(Lolium italicum)

In growth somewhat similar to Perennial Rye Grass but little quicker maturing. It is especially liked in Southern States and in most of the low Delta country yields good crops of very early hay. Valuable for mixture or quick hay crop. Requires same quantity per acre as Perennial Rye Grass.

AMERICAN GROWN RYE GRASS

Also known as Western Rye Grass. It is inclined to be an annual and is especially valuable for use in lawn mixtures; it is a quick growing grass and succeeds well on almost any type of

ROUGH STALKED MEADOW GRASS

(Poa trivialis)

A splendid grass of spreading, thickly matting, stoloniferous rooted species; leaf blades narrow, flat and dark green in color. Forms a fine turt where few other grasses can exist and especially adapted for shady places and under trees. For pastures, sow 1½ to 2 bus. per acre; for lawns, 4 to 5 bus. per acre. (14 lbs. per bu.)

RED OR CHEWINGS FESCUE

(Festuca rubra)

A creeping-rooted species, forming a close and lasting turf and especially adapted for dry, sandy soils. It resists extreme drought and thrives on poor soils; also valuable for shady places in lawns as well as for golf-courses and particularly on putting greens. 40 lbs. to the acre. On putting greens sow 8 lbs. to 1000 square feet. (24 lbs. per bushel.)

SHEEP FESCUE

(Festuca ovina)

An extremely valuable pasture grass for high, dry situations ocky or gravelly soils. It affords excellent grazing and withor rocky or gravelly soils. It affords excellent grazing and withstands adverse conditions often when many other varieties burn out. The foliage is of fine texture and it has a tendency to grow in tufts and close grazing is desirable. Especially valuable for mixture.

Requires alone 1½ to 2 bus. per acre. In mixture ½ to 1 bu.

CRESTED DOGSTAIL

(Cynosurus cristatus)

Very much esteemed for lawns and mixtures in many of the Northern States, producing a quick growth of short grass, which is, however, of little forage and many stems.

BERMUDA GRASS

(Capriola dactylon)

A valuable grass for the South and for tropical climates; will not endure frost. Sow 5 to 8 lbs. per acre.

SEASIDE OR COOS COUNTY BENT GRASS

(Agrostis maritima)

This Bent Grass is one of the most vigorous stoloniferous ans bent Grass is one of the most vigorous stoloniferous creepers, also spreads under ground by root stalks or stolons, making a deep, reinforced sod. Seems hardy and suited to sour soil conditions, and grows on a wide range of soils. Excellent for lawns, greens, parks and playing fields. Needs considerable care, cutting, water and fertilizer.

It is slow to develop its creeping characteristics, but after it has done so, makes a very excellent uniform quality and color in the turf. Sow about five pounds to 1,000 square feet.

RHODE ISLAND BENT GRASS

(Agrostis/ tenuis)

A grass of very splendid appearance making a fine close turf, dark green in color. It is adaptable to different soils and various locations and will stand dry weather. It has a spreading habit, a soft leaf and is useful either in mixtures, on the green, or fairway. From 60 to 100 lbs. of seed should be used per acre.

MIXED GERMAN BENT

As the name implies it is composed of different types of Bent Grasses. It is exceptionally useful for lawns or fairways, also for putting greens.

MR Best Special Mixtures

GOLF COURSES.

AIRPORTS AND LANDING-FIELDS. POLO GROUNDS, ATHLETIC FIELDS, LAWNS,

PASTURES and MEADOWS

We put up special mixtures for all purposes and will be very glad to estimate on any special mixture that may be required.

We offer mixtures which can be relied on to be the very highest quality and prices are very reasonable. See pages 2 and 3 for descriptions.

Constant experimenting has shown that a heavy stand and prolonged growth can only be obtained by sowing a **mixture** of several kinds of grass seeds. In our special mixtures we use varieties best suited to the different soils and purposes for which they are recommended. Those for permanent pasture are composed of grasses that succeed each other in growth, thus furnishing good grazing from early spring until late fall.

Nothing but our "Acme" MC Best-brands are used, which means the best obtainable. We will be glad to give you the benefit of our knowledge and experience and advise you as to grasses suitable to your wants.

CLOVER, GRASS AND GRAIN SEEDERS, SEE PAGE 88.

"ACME" JMC BEST CLOVER SEEDS

Prices are so changeable they cannot be given here. Will be glad to submit prices and samples at any time.

Bags for Clover Seed holding $2\frac{1}{2}$ bus. extra and must be remitted for on all orders.

RED CLOVER (Trifolium pratense)

Too well-known to need extended description. Can be sown either in the spring or fall and requires 8 to 12 lbs. per acre alone or 5 to 6 lbs. per acre if in mixture with grasses.

MAMMOTH OR SAPLING CLOVER

Similar to Red Clover but of larger growth and blooms 3 weeks later—hence, more valuable for sowing with Timothy. It also forms better aftermath than Red Clover. Requires same quantity of seed as Red Clover per acre. Current prices on request.

ALSIKE CLOVER (Also called Swedish Clover)

Similar in growth to Red Clover but not quite so vigorous. Blossoms flesh color. Blooms later and at the same time as Timothy. Valuable for hay and more satisfactory for pasturage as it lasts longer and will stand more grazing.

If sown alone requires 4 to 6 lbs. per acre or in mixture 2 to 3 lbs. per acre.

BOKHARA OR SWEET CLOVER

It is suitable for almost all classes of soil and especially desirable on loamy, sandy or alluvial soils. Formerly it was used mostly for waste lands but many prominent stock raisers are using it extensively for both pasturage and hay, in many cases abandoning Alfalfa and substituting Sweet Clover.

Sweet Clover is of vigorous growth and withstands extremes of heat and cold as the tap roots penetrate the soil very deeply, and it does well on both barren hillside as well as bottom lands. Matures early. Can be cut two or three times in a season; has a delightful and sweet scented odor and the blossoms are particularly attractive to bees attractive to bees.

We offer the following classes:

WHITE SWEET CLOVER

A biennial growing 5 to 6 ft. high having white blossoms borne in large panicles and extremely sweet scented. Reseeds itself if undisturbed or not cut in bloom.

Hulled Seed (cleaned seed) requires 10 to 12 lbs. per acre. Bags extra. Current prices on request.

Unhulled (Seed with the hull on).

YELLOW SWEET CLOVER

A biennial not quite so tall growing as the White but more desirable for pasturage as the life season is much longer, producing an abundant yield of forage.

GRUNDY COUNTY SWEET CLOVER

The growth starts early in the A white blossom biennial. spring and makes an abundance of early pasturage. It is unusually hardy and a good soil builder. The stem and leaves are finer and make a better hay than the Common Sweet Clover.

When grown for seed, the yields are from five to ten bushels to the acre. Unlike the common biennial, it grows to a height of three to five feet and may be harvested with the ordinary grain binder. The seed ripens uniformly earlier than the common.

Sow at the rate of 12 pounds of scarified seed per acre.

HUBAM SWEET CLOVER

An annual Sweet Clover with a growth of $3\frac{1}{2}$ to 6 ft. Is particularly good for bees as it blooms the first year. Also excellent as a green manure crop. Most favorable results are obtained by sowing broadcast. Requires 12 to 15 lbs. per acre.

JAPAN AND KOREAN CLOVERS (Lespedeza)

The acreage sown to these Clovers is rapidly increasing each year; they are becoming very valuable as forage crops, used extensively for hay; also very popular for grazing. Lespedeza is an annual, but once planted reseeds itself satisfactorily if given a short period of rest. Being leguminous plants, it is very profitable as a soil builder, growing on almost any character of soil; thriving well on sour land.

Seed can be sown during the early spring, or as late as May 15th broadcast, at the rate of 25 pounds per acre; being customarily sown on old pastures where plowing is not necessary, producing good yields under ordinary conditions. Also, excellent to sow with other grasses, affording ample grazing through the hot summer months. Quantity of seed sown per acre should be reduced according to stand of grass.

The Korean Clover is larger, coarser, and blooms earlier than the Japan Clover.

WHITE CLOVER (Trifolium repens)

Well-known and indigenous to most soils throughout this section. It is largely used for lawns and pastures, producing very quick growth and covering the soil with a bright, vivid green very thickly. Particularly suited to sandy soils and in some localities where grasses do not grow well.

Requires 3 to 4 lbs. per acre alone or in mixtures 1 to 2 lbs. "ACME" ## Best Grade.

CRIMSON OR SCARLET CLOVER (Trifolium incarnatum)

This Clover grows about two feet high, makes good hay and is excellent for feeding green, the yield being immense; and after cutting it at once commences to grow again, and continues until freezing weather, but being an annual, dies after maturing its seed. Should be sown in August to October, also early spring. (15 to 20 lbs. per acre.)

ALFALFA OR LUCERNE (Medicago sativa)

Alfalfa is being more generally grown, as experience is teaching our farmers the proper methods to follow. Once established, it is such a profitable crop that every farmer can afford to take great pains to obtain a stand. It requires cutting at least twice the first season, even if not large enough to make hay. Cutting destroys any weeds that may come up in it and gives the Alfalfa a chance. Must be sown at the rate of 10 to 15 pounds per acre when sown broadcast. Different soils do not seem so difficult to overcome, especially where they can be properly drained, pulverized, sweetened and inoculated.

Alfalfa does not thrive on acid or sour land.

A liberal dressing of fine ground lime will be found a great benefit to the soil. May be sown from April 1st to June 15th for the carly spring sowing, either drilled or sown broadcast. If broadcast, cover lightly with a light drag or with single stroke of a harrow.

Much seeding is now done later and many prefer sowing from July 15th to September 15th. When seeded late it gives the grower an opportunity to have his land clean and free from weeds, and if weather conditions are favorable a crop is almost assured.

Alfalfa naturally prefers a deep, sandy or gravelly subsoil. Roots from 3 to 15 feet deep and a good stand on properly selected land should yield from 3 to 5 cuttings a year. Current prices on request.

Acme Inoculation will insure a sturdy alfalfa stand. Inoculate the seed this year. See page 56.

ACME

FOR ALL LEGUME

The legume crops, such as alfalfa, the clovers, soy beans, vetches, peas, etc., are known as soil builders because certain soil bacteria make nodules on their roots in which nitrogen is gathered from the air and stored. If these special bacteria are not present, the crop robs the soil instead of building it up. The only way to make sure that there is a sufficient supply of nodule bacteria in the soil is to inoculate the seed before sowing with a culture of the right kind of bacteria. Inoculation produces the following results:

- Insures Better Stands. The legume crops require plenty of nitrogen in their early growth. Inoculation makes an ample supply available.
- 2 Insures Bigger Crops. Inoculation by increasing available plant food promotes the most vigorous growth and produces bigger crops.
- By feeding nitrogen to plants, their protein content and hence their feed value, is greatly increased.
- Adds Fertility to Soil. Inoculation provides plenty of nitrogen for the crop and, when it is turned under, adds to the soil an average of 100 lbs. of nitrogen per acre.

Acme Inoculation Easiest and Surest Form of Inoculation

Acme Inoculation is a scientific pure culture of root nodule bacteria, prepared on special food jelly in bottles with patent stoppers which permit the bacteria to live and breathe and maintain their vigor. Each culture contains plenty of bacteria to inoculate the quantity of seed marked on the bottle. The

Cost per acre is very small.

Moreover Acme Inoculation is easiest inoculation to use, requiring no equipment or experience Takes only a few minutes. Complete directions on every bottle. Results are sure. Buy your Acme Inoculation when you buy your seed. Always specify names of crop as well as size of culture wanted Buy your Acme

THE J. CHAS M'CULLOUGH

SEED CO.

INOCULATION

CLOVER

GO lbs. or less of seed

The Original Dry Inoculator

Contains carefully tested, highly efficient nodule bacteria. An easily applied modern method of inoculation. Eliminates the use of water and therefore seed may be sown immediately after inoculation. No longer are split seed coats, spread of disease or extra handling necessary in order to inoculate your seed. Dry-Inoc, used dry on dry seed, sticking with a fixed tenacity, insures you a larger crop of higher quality as well as enriching your soil. Full directions on every package.

GM

SEED CORN

SEED CORN TREATMENT REDUCES DISEASE DAMAGE

Seed disinfection with Improved Semesan Jr. will help greatly to prevent damage by diseases to the roots, stalks and ears of field and sweet corn. It protects seed against rotting, permits earlier planting, increases germination, controls blight and increases crop yields. See page 75.

All our Field Corn Seed is well matured, thoroughly cured and shelled with the greatest care. We test all varieties before sending the seed to our customers that there may be no doubt as to the vitality. To avoid delay when ordering late in the season, it would be well for you to mention your second choice, or state whether we shall send you a sort adapted to your locality, or refund your money, provided we are sold out of your first choice when your order arrives.

Put up in two-bushel cotton, seamless bags. Bags, extra.

Will be glad to quote you prices when planting season arrives and know you will find our prices as low as high-grade seed can be sold.

WHITE VARIETIES EARLY NORTHERN WHITE DENT

A particularly desirable sort for very early planting or very late planting, as it matures its crop in about 90 days. The ears are 8 to 9 inches long, of 16 to 18 rows, which are well filled. Grains moderate, white, dented.

This is largely planted in many sections for green table corn, as it produces 2 good ears to the stalk and is profitable.

HICKORY KING CORN

An old favorite sort which is well-known in all localities. The ears are rather small but as they are borne 2 to 3 on a stalk it is a fairly good yielder. It has the largest grains and the smallest cob of any white corn ever introduced. So large are the grains that if an ear is broken off and the grain laid over the cob it will almost cover it. It is particularly fine quality and universally satisfactory.

RED COB ENSILAGE

Beyond doubt one of the best fodder corns, either to feed green, to put up for the silo, or to cure for hay. It is sweet, tender and juicy; has short joints and therefore an abundance of leaves, and grows to a fair height, but coarse-stalked. The seed is white and grows on a red cob, thus giving it the name.

SWEET FODDER CORN

For forage purposes, as it is the best of all corns both as green corn for ensilage or to be cut and used dry. Both the stalks and fodder contain large amounts of saccharine matter, which is both fattening and relished by stock.

YELLOW VARIETIES OF SEED CORN GOLD STANDARD LEAMING

An ideal feeder's corn of light, golden color; ripening in about 100 days; ears slightly tapering and cylindrical. They grow 8 to 10 inches long, 7 to 8 inches in circumference, and are well filled at the ends. The ears are from 16 to 22 rows, there being little space between them. The cob is red, moderate size and the percentage of corn to cob varies from 86 to 90 %. The per cent of protein which the grains contain is more than any other corn that we know of and 4 bushels of Gold Standard Leaming will put as much fat on a hog or steer as 5 bushels of ordinary corn.

OHIO YELLOW DENT

A medium early yellow variety, producing well-filled ears of good length and filling out remarkably well, even under adverse conditions. Stalks of good height, producing one or two good ears, which average 10 to 11 inches long, 14 to 16 rows. Grains flinty deep; slightly dented, rich color, and fine feeding quality. This is one of the most popular varieties of yellow corn and particularly well liked by stock raisers. Ripens in about 100 days.

WOODBURN YELLOW DENT

An extra early variety producing a medium size ear. The cob is small and well filled from butt to tip, grain deep.

On account of its early maturity (about 90 days), and exceptionally fine yielding qualities, it is especially popular for a quick maturing sort; also for very late planting.

"ACME" IM BEST SEED OATS

We are very large handlers of these and always sell the most select stocks which have been carefully recleaned in our own mills. Do not compare our prices on Seed Oats with the ordinary commercial feeding oats which are so often sold for seeding purposes. Current prices on request.

SWEDISH TYPE SELECT

It is an early white variety, producing grain of good

weight and quality. Straw is medium in height and strong. On account of its vigorous root action, can be recommended for a variety of soils, doing well on nearly all. Our stock of Swedish Type Oats is northern grown in a section of the country that has proven itself especially adapted to this crop. One hundred bushels to the acre is not an uncommon yield. Oats grown in a northern latitude are more vigorous, hardier and mature earlier than stocks grown anywhere else.

"ACME" ONE BEST SEED OATS-Cont'd

FULGHUM OATS

A spring sowing, early variety, adapted to a rather wide range of soil and climate. It is vigorous, maturing about ten days earlier than the Red Rustproof, to which variety it is quite similar, and is easily distinguished by its more erect heads.

Color of Fulghum Oats is a rich buff.

The kernels are usually free from awns, beards and basal hairs. They are inclined to be resistant to smut, also somewhat resistant to leaf rust.

WINTER TURF OATS

Superior to spring oats in some sections of the country. If sown in early spring they grow 4 to 5 ft. high and the straw is very palatable for stock. The husks are very thin with a very heavy grain; often a measured bushel weighing 36 to 40 lbs. Requires $1\frac{1}{2}$ to 2 bushels per acre.

COW PEAS

The Great Soil Improving Crop

One of the most productive and nutritious crops grown. The feeding value is high and for ensilage they are unsurpassed. As they are practically a sure crop and nitrogen gathering plant there is no surer or cheaper way of improving and increasing the productiveness of the soil than by sowing Cow Peas. They are entirely different from Canada Field Peas, really belonging to the bean family, therefore, must not be sown until the ground is warm. Sow at the rate of $1\frac{1}{2}$ bushels to acre.

WHIPPOORWILL

One of the earliest varieties with brown speckled seed which grows in bush form. It is a favorite sort in the West and North on account of its early maturity and ease of cutting and harvesting.

NEW ERA

In comparison with other sorts we consider New Era one of the very best as it produces an abundant growth of vine and exceedingly large quantity of pods and matures earlier than other sorts. Reports of 40 bushels per acre have been made us and the peas, while smaller than Black or Whippoorwills, are fully as nutritious. Seeds are dull, lead-colored and require less per acre than other sorts.

MIXED COW PEAS

A mixture of Clays, Whippoorwills, Blacks, etc., which are somewhat lower in price than the straight sorts and they are just as satisfactory for soiling or hay.

VETCH

HAIRY OR SAND (Vicia Villosa)

It is a winter annual and is especially well adapted to sandy soil and will do much to build up any poor soil. Withstands cold weather. Should be sown from latter part of August to middle of September.

SPRING VETCH (Vicia Sativa)

Used for sowing with oats for producing a spring crop of hay.

CANADA FIELD PEAS

Grown with oats will make a fodder or hay which doubles the production of milk. Current prices on request.

They should be sown in March or early April, two bushels of peas and two bushels of oats to the acre. The peas should be sown first and plowed under about 4 inches deep; the oats then sowed and harrowed in. They will be ready for cutting about the end of June, when the oats are in milk and the pods formed on the peas. Prices variable.

SUNFLOWER (Mammoth Russian)

The best variety for the farmer. Drill in seed at the rate of about 8 to 10 lbs. to acre. It is much relished by poultry and horses. Current prices on request.

"Any crop that grows its seeds in pods will give two to five times the yield if inoculated with 'Acme' Inoculation. See page 56."

SOY BEANS

Soy Beans do equally well on both light and heavy soils. In addition to their value as a forage crop, they improve the soil and increase following crop production. They are a valuable pasture crop for hogs as well as other stock, and can be sown by themselves for this purpose; or in the corn rows and the hogs turned in to feed on them after the corn is harvested.

The value of Soy Beans as a grain crop makes it particularly adapted to system of rotations. Like other legumes, Soy Beans are able to utilize the nitrogen of the air, adding it to the soil. Soy Beans should therefore be inoculated. Actual experiments have shown that legumes not inoculated rob the soil; inoculated they feed the soil. Sow 1½ to 2 bushels per acre broadcast, in drills 45 pounds. Use "ACME" Inoculation for BEST results.

VIRGINIA

(Seed small Brown.) One of the Best Varieties for Hay and Silage, produces a larger yield of fine texture per acre than any other bean (generally known as the Hay Bean). Because it has such fine stems, it makes excellent hay, does well on poor types of soil; a medium late variety maturing in about 125 days. Use "ACME" Inoculation.

SOY BEANS-Cont'd

MANCHU-DUNFIELD

These varieties are especially adapted to northern sections, where they have become some of the most popular beans of the corn belt. They are some of the best producing early yellow varieties, well suited for hogging off with early corn; also heavy yielder of beans and excellent for Early Hay and Forage. Plants, moderately erect, retain their foliage when ripening; begin to bush out six or eight inches above the ground, making them easy to cut with a binder. Matures in about 105 to 110 days. Use "ACME" Inoculation.

ILLINI

This is a New Improved Early Yellow variety for this section. Tests made at the Illinois Agricultural Station show a maturity of 105 days. It is well adapted for an early hay crop, and as a grain crop, it yields well, and has produced very good in Illinois where this bean originated; stands up well and does not shatter very much when harvested. Use "ACME" Inoculation.

BLACK EBONY—WILSON BLACK

(Early Black.) Two widely known varieties and adapted to a wide range of soils. Their popularity is probably due more to the dependability under all conditions. Produces abundant foliage; and excellent varieties for hay, producing a large and early crop; also recommended for a seed crop—stems and branches slender, with profuse growth of leaves. Do well on poor soil, maturing in about 115 to 120 days. Use "ACME" Inoculation.

MIDWEST-HOLLYBROOK

Are of the best known varieties for Hay and Silage, and especially desirable for hogging off with corn. Because of their upright growth, they are also excellent for grain production—medium early maturing, about 120 days. Use "ACME" Inoculation.

ITOSAN

When a Catch Crop is desired, this bean is principally sown because it is the earliest maturing and is best known for this purpose; matures in about 100 to 105 days. The plants are stiff, upright and slightly branched with stems rather slender; grows from 24 to 30 inches in height. This variety produces well for both hay and grain, and has many desirable qualities. Use "ACME" Inoculation.

BLACK EYEBROW

Has proved a medium early (105-day) seed type of bean well adapted to the corn-belt soils. An excellent variety for hogging off with early corn; also produces satisfactory yields of seed and hay. At maturity is inclined to hold the seed well and does not lodge so badly as some varieties. Use "ACME" Inoculation.

MAMMOTH YELLOW

The plants of this variety grow very tall; it is a popular bean in the South where they yield an enormous quantity of beans, north of the Ohio River it is sown

principally for a green manure and forage purposes; also especially adapted for silage, as it produces a large volume of foliage, growing very vigorous and rank, maturing in about 145 days. Use "ACME" Inoculation.

"ACME" BEST MILLET TRUE TENNESSEE CULTIVATED GERMAN

(Round Seed.) This Millet withstands drought better than all other varieties. Under ordinary conditions, it produces large crops. It is used as a summer hay crop and particularly adapted to rich or bottom soils. It should be sown thickly and cut when the heads are in bloom, never allowing to get old or seed to form as this causes a great drain on the soil besides materially injuring the quality of hay. Very useful for cleaning rich, foul lands of weeds as its quick, abundant, luxuriant growth smothers most weeds. Sow one bushel per acre in May, June or July. Two crops can be seeded on the same land in one season, if desired.

WHITE WONDER MILLET

Produces a very large head similar to the Tennessee Millet. Under certain growing conditions it is quite difficult to distinguish it from the cultivated millet. The heads will run from six to eight inches. A very desirable feature is its earliness; the foliage is also very heavy and the leaves broad, resembling Golden Millet. It produces an immense amount of excellent fodder which cures very readily.

On account of the earliness, the immense yield of hay and the very vigorous growth which leaves the ground clean, we recommend the sowing of White Wonder Millet.

HUNGARIAN

Specially adapted to rich or alluvial soil. It makes a finer quality of hay than Millet on very rich soil as it does not grow so coarse. Cut at the right time, which is in bloom, and cured properly it makes as nutritious hay as Timothy; is especially popular with dairymen.

Sow from ¾ to 1 bushel per acre in May, June or July. Current prices on request.

"Any crop that grows its seeds in pods will give two to five times the yield if inoculated with 'Acme' Inoculation. See page 56."

KAFFIR CORN

A favorite grain crop in the West growing similar to Sorghum. Foliage and stalks, however, do not contain saccharine matter—hence, are not so valuable for feeding but the enormous yield of grain makes it very profitable. The grain is very largely used for poultry and stock feeding, containing a high percentage of starch. Current prices on request.

ROSEN RYE (Michigan Grown)

Grain unusually large and yield surpasses the old standard sorts.

BARLEY

Barley needs a rich land and lighter than that adapted to Wheat. It should be cut before fully ripe (unless intended for seed), as it is then of better quality and less liable to shell. Sow 1½ to 2 bushels if drilled; 2 to 2½ bushels broadcast. (48 lbs. per bushel.)

Spring Barley, Beardless Barley—Current prices on request.

VELVET BARLEY

Velvet Barley is a Spring Bearded Variety, the beards are smooth, there being no barbs. The yield is not quite so large as the Common Bearded Spring Barley, but the advantage of Velvet Barley off-sets that. It is reported to us that the Velvet Barley straw is suitable for feed and the crop handles as nicely as oats. Sow two bushels to the acre.

BUCKWHEAT

A splendid soil improving crop for very poor land besides being largely grown for grain in northern and mountainous sections. It is also largely used for bees.

Culture—Sow in June, July or August at the rate of ¾ of a bu. to 1 bu. per acre broadcast, covering with a smoothing harrow. It does not mature its grain until the cool nights—hence, too early sowing is not desirable.

Japanese—This produces the largest yield of finest and largest kernel buckwheat. Superior to all other sorts. Current prices on request.

Silver Hull—Much improved over the common Buckwheat. Grains, however, smaller than Japanese but yielding abundantly. Current prices on request.

DWARF ESSEX RAPE

This plant is extensively grown for forage, especially for sheep and hogs. Farmers who desire to get their stock in favorable condition, to be sold advantageously in the fall, can do so more reasonably by growing this crop. Best results are obtained where a field is pastured for a couple of weeks, then the stock changed to another field, while the first recovers growth. A crop of Rape will develop sufficiently to pasture within six weeks or two months after sowing. It will make a good growth during cool, moist weather in the spring months. Rape may be sown any time from early spring until mid-summer, which will make prime pasture for all stock, excepting milk cows. For green manure, where a rank growth is desired, it is an excellent crop.

Sow three pounds per acre when drilled in; six pounds when sown broadcast. If planted in Corn, after the last cultivation, it will furnish a fine feed for grazing, after the Corn is cut.

SUDAN GRASS

Sudan Grass, though of comparatively recent introduction into the United States, has spread like wildfire over many sections. It produces an immense yield of hay which is nutritious and can be cut twice in a season. In appearance it resembles Johnson Grass; grows when broadcasted 3 to 5 ft. high, or if cultivated 6 to 10 ft. high, but is more nutritious than Johnson Grass, containing larger amounts of protein and fattening qualities. Its principal value is that it is adapted to almost any kind of soil and succeeds in nearly all climates, but produces the largest yield in warm and temperate latitudes, where there is an abundance of rainfall. It does not blight, cures easily, is greatly relished by stock and can be easily grown if sown either broadcast or in drills. After the first cutting it stools enormously, and as many as a hundred stalks sometimes come from a single root. After frost Sudan Grass is killed, and entirely unlike Johnson Grass it can be easily gotten rid of, as the winter destroys it entirely. Current prices on request.

Culture—Sudan Grass can be sown either in drills $2\frac{1}{2}$ to 3 feet apart at the rate of 8 to 12 lbs. to the acre, and cultivated like corn, or broadcast 20 to 30 lbs. per acre. Seed should be sown about the time of planting corn and the hay cut when the grass is headed out, with a mower or binder. Early cutting is desirable as the hay is more nutritious and gives the grass a better chance for large succeeding crops.

SORGHUM OR CANE

Culture—Sow in May, June or July, either in drills 3 ft. apart at the rate of about 1 pk. per acre or broadcast 1 to 1½ bu. per acre. Cut after seed has matured.

Early Amber—A favorite sort in Northern and many Western States. Grows 10 to 12 ft. high. Price fluctuates. Current prices on request.

Red Top or Imphee—A favorite sort in Kentucky and Tennessee and one of the best varieties for general purposes both for stock feeding or making syrup. Current prices on request.

Early Orange—Similar in growth to Amber, except that the head is more spreading. A favorite sort in Southern and Western States where it produces large crops. Current prices on request.

BROOM CORN

This is usually a profitable crop and sometimes enormously profitable. A fair yield is a ton to 3 or 4 acres of ground and the seed is valuable for stock and poultry food in addition to the returns from the broom straw.

Culture—Sow in drills 3 ft. apart at the rate of 4 to 5 lbs. per acre, thinning out stalks to about 70 to the rod. Cultivate as for corn. Rich land requires thicker seeding and more stalks than medium or poor soil. Cut when the seed is in the milk state.

Improved Evergreen—A favorite sort in the Middle West producing long, straight straw of greenish appearance after being cut, which commands the highest price. Current prices on request.

SUMMER FLOWERING BULBS AND ROOTS

These include many of our most attractive plants both for foliage and flowers. As a rule they should be planted out of doors after the weather has become settled and warm. After the first

frost, and the leaves have turned droopy or vellow, take up and put in a dry cellar or some other place where they will not freeze, storing in paper bags or soil preferably, and then replanting the following year.

TUBEROUS-ROOTED BEGONIAS

They are now used extensively for outdoor planting. Give them a partially shaded position in a light soil and well-drained location, and they will give more bloom than any other plant which will grow in such a place. A soil that will grow it to perfection is turfy matter scraped from the bottom of old sod—one part, and one part sand. Mix these well together, and you have a compost that is friable, porous, and well adapted to any plants having fine, fibrous roots. It is more satisfactory to apply plant-food when needed, and in such quantities as seem to be required, than to make the soil very rich from the start. Water very cautiously until active growth begins, then increase the amount. But at no time during its existence will the plant require more

than enough to make-and keep the soil moist all through. Good drainage should be provided to guard against over-watering.

DOUBLE FLOWERING VARIETIES

Double—Crimson, rose, scarlet, white and yellow, in rate colors. Each, 30c; per doz., \$3.25. Per 100...\$22.50 Double Mixed—Each, 25c; per doz., \$2.75. Per 100.\$20.00 separate colors

SINGLE FLOWERING VARIETIES

Single—Crimson, rose, scarlet, white and yellow, in separate colors. Each, 25c; per doz., \$2.75. Per 100..\$20.00 Single, Mixed—Each, 20c; per doz., \$2.25. Per 100.\$17.00

CANNAS

The wonderful improvement to which this popular bedding plant has been developed makes it today one of the best of all summer flowering plants both for flowers and foliage. Its ornamental leaves varying from light pea green to darkest brilliant maroons and bronzes can be used most effectively both in borders or beds. The flower spikes have been developed to enormous size and individual flowers sometimes measure 2 inches across. They are of the most brilliant colors, including all shades from creamy

white through pure lemon yellow, orange, salmon pink, scarlet to deep red velvety maroons. Many of the flowers are tinged with gold, some spotted and others striped until there is a gorgeous display which continues to bloom from early summer until cut by frost.

For best results beds should be deeply spaded and a liberal amount of well rotted manure dug in. A mass of the different colors can be planted together or single plants are effective—the arrangement being largely dictated by ones own taste.

Prices of Named Varieties listed below-Dormant Roots-each 10c. Dozen, 75c. By mail, 90c. dozen.

GREEN FOLIAGE

The Ambassador—A distinguished looking Canna. Flowers vivid cherry-red; has luxurious tropical foliage prettily bronzed and makes a splendid color contrast with its brilliant blossoms. Ambassador has a habit of holding its flowers high above the foliage, a feature which makes this variety especially attractive. 3½ to 4

City of Portland-A wonderful bright rose-pink, much deeper in color than Hungaria. A free-flowering and vigorous grower. $3\frac{1}{2}$ feet.

Eureka-The genuine, practical White Canna is found at last. With the advent of Eureka, we are granted good, full-trusses; broad petals; uniform, free and continuous bloom, and a clean, waxy, lily-white color. Plant growth sturdy, with nice foliage. 4 feet.

Gaiety—Scarlet-orange mottled with carmine and edged with clear yellow. Very showy. 4 feet.

Hungaria—Large flowers, borne in trusses of immense size. Color a pure La France pink with satiny sheen. The most popular pink; green foliage. $3\frac{1}{2}$ feet.

Canary Bird-Flower a pure canary-yellow, strong erect stalks well above the large, rich green foliage.

Louisiana—Very large, beautiful, vivid, scarlet, orchid-like flowers, often measuring five to six inches across. Foliage a glossy green, edged with a narrow purple band. 5 feet.

Meteor—The best deep red large-flowered Canna, with massive erect trusses of deep-red flowers. 4 feet.

Queen Charlotte—The center of the petal is a brilliant crimson-scarlet, shaded with crimson and bordered with a wide belt of gold. 3 feet high.

The President—This variety is superior to any other scarlet in quality and also the size of the flower. 4 feet.

Venus-Rose-pink, creamy yellow border. 4 feet.

Yellow Humbert—Has the same habit of growth as the King Humbert. Has green foliage and produces yellow flowers, dotted with red. 4 feet.

BRONZE LEAVED

King Humbert—In this grand Canna we have a combination of the highest type of flowers with the finest bronze foliage. Its flowers measure 6 inches in diameter. Produced in gigantic trusses, a brilliant orange-scarlet with bright red markings; foliage broad and massive, of a rich coppery-bronze. 4 feet.

Shenandoah—4 feet. Flowers salmon-pink borne in large clusters, foliage rich ruby-red.

Well-known summer flower, having a very sweet scent. Bulbs

MADEIRA VINES

each, 7c; per doz., 65c.

Madeira Vines (Mexican Potato)—A rapid growing vine with bright, smooth leaves which produce intense shade and valuable for covering fences, outbuildings, or screening porches. Plant the roots 2 inches deep. Vines should be trailed on strings or poles. Strong roots. Each 5c; per doz., 40c. Per 100. \$3.00

Caladium or Elephant Ear

DAHLIAS READY ABOUT APRIL 1ST

One of the most satisfactory of the summer flowering roots, producing an abundance of brilliant colored flowers from July to frost. The different varieties comprise all colors from purest white to deepest maroon. Many of them in two or more colors with edged petals; some double with quilled petals, others broad, flat petals; some twisted and curled, and comprise many fantastic shapes. There are several classes. Our stock embraces the best varieties and price converted the control of the control o varieties and prices are very reasonable.

Culture—Plant from May to July. Tubers should be planted about 6 inches deep, laid flat, eyes or sprout up. Allow at least 3 feet between plants, each way. Do not allow over three stocks to grow. Stake the plants. Keeping the suckers pulled off will produce the finest blooms. After frost dig and store in a dry place where they will not freeze. Covering the tubers with peat moss is very satisfactory and always store with the stalk end pointed down.

The size of the tuber does not in any way designate the size or quality of the flower. Some varieties of dahlias always produce very small bulbs, while other varieties make larger ones.

Out stock is CHOICE FIELD GROWN Roots, strong division.

J. CHARLES McCULLOUGH

Hybrid Cactus—The dahlia we have been looking for. A winner of two first prize blue ribbons at the Dahlia Show held at Fleischmann Gardens in Cincinnati, Oct. 4th and 5th, 1930, by the National Gardens: Association. J. Charles McCullough is a gigantic flower that is easily one of the largest, handsomest and most outstanding of late introductions. The color is entirely distinct. It is a perfect blending of pink and rose, accented by a delicate white line running the length of each perfect petal, which curls and twists very much as a chrysanthemum petal and forms one of the most popular shaded and indescribably beautiful of all dahlias. Hybrid Cactus-The dahlia we have been looking for. beautiful of all dahlias.

J. Charles McCullough dahlia blooms early and profusely. It has long stems, a stiff neck and finely cut foliage that forms a background for the flower even when disbudded. Even when neglected this dahlia blooms beautifully and is satisfactory; but when cared for by beautifuly and is satisfactory, out when cared for by the dablia enthusiast, its loveliness can be surpassed by none. The flowers are full to the center and keep indefinitely when cut. The plant is a strong, sturdy grower, and will be a continual delight to all of our customers who are fortunate enough to own it. Each.\$5.00

DECORATIVE DAHLIAS

These come next to the Cactus as a cut flower. They are also very showy in the garden, being unusually free bloomers. They are more formal in make-up than the Cactus Dahlias, but not so formal as the Show varieties, being a happy medium between the They are also oomers. They two.

Mrs. I. De Ver Warmer—One of Judge Marean's best creations. Very large beautiful flowers of fine form and substance. Color a rich rosy mauve. Stems long and rigid. Very attractive in the garden, and one of the best for exhibition and for cutting. We consider it one of the best dahlias on our list.

Pride of California—Dark rich crimson of pleasing form and large size. Flowers held erect on splendid stems. One of the best red decorative dahlias for cutting yet introduced. Each....

Jersey's Beauty—A justly praised decorative of striking loveliness. A perfect bloom of deep, true pink, carried high above the foliage on perfect stems. A famous prize winner. loveliness. Each....

Judge Marean—In this large dahlia there is a riot of ding color, ever changing as the flower ages. There is a blending color, ever changing as the flower ages. There is a glowing salmon-pink, iridescent orange, yellow and pure gold, and the shades all blend most beautifully. The large fine flower stands on a long, straight, strong stem facing the garden boldly. Each.

Regalia—An exceptionally well-formed, beautiful yellow decorative dahlia. Has long, erect stems and is a free bloomer. Each......85c

Snowdrift—Pure white, full deep built flower with broad petals. Low bush. One of the best white decoratives. Each..50c

GLADIOLI

Gladioli are among the most decorative plants in the garden and as a cut flower lends itself readily to any arrangement. If the spikes are cut when the lowest flower is in bloom, the others will open in succession and remain fresh a week or ten days.

open in succession and remain fresh a week or ten days.

Gladioli will thrive in almost any soil except a stiff clay. Plant the bulbs six to nine inches apart, the large ones tour inches and the small ones two inches deep. Make an early planting of the smallest bulbs first as soon as the ground is sufficiently dry and warm. Continue to plant at intervals of two weeks during the spring and early summer; in this way a succession of bloom may be had from midsummer until frost. A free use of water during the season of active growth, particularly as the buds begin to show color, will be beneficial in producing fine blossoms. In the autumn before freezing, they should be dug and the tops allowed to dry down, after which the dry tops, earth and old bulbs can be removed. Store in a cool, dry place, secure from frost until spring.

NEW AND RARE RUFFLED GLADIOLI COLLECTION

Dr. F. E. Bennett—Peach red, overlaid with flame scarlet, throat speckled ruby and creamy white; very large flowers of great substance, many open at a time on strong stem; sturdy grower. Each, 20c; per doz., \$1.75. Per 100.........\$12.00

MC Superb Mixture—Largest size bulbs. Brilliant colors and shades. Per doz., 35c. Per 100.............\$2.50

As a safeguard against fungous disease, such as rot, etc., dust bulbs thoroughly with Semesan before planting. See page 75.

HARDY LILIES

Lilies are stately and most beautiful bulbous plants—producing large flowers of exquisite outline and varied coloring. They are hardy even in cold locations with protection, and usually surviving for many years. Ideal locations are in the shrubbery or herbaceous border where the roots are sheltered from the hot sun. Groups of 6 or more lilies of a kind, here and there, in such situations are most effective. Large isolated clumps or beds of the varieties Auratum or Rubrum, are very beautiful. They should be planted 6 to 8 inches below the surface in light soils, or 4 to 5 inches below in heavy soils; in the latter case the bulbs should be surrounded by sand to facilitate drainage.

Lilium Regale or Myriophyllum—It is absolutely hardy and is excellent for forcing. It has been predicted that this will become the Easter Lily of the future, and being so hardy, may be grown at home. The flowers are white, slightly suffused with pink on the outer edges, with a beautiful shade of canary yellow at the center, and extending part way up the trumpet. It is delightfully perfumed, reminding one of the Jasmine, and lacking the heavy, oppressive odor of most lilies. Blooms out-of-doors early in July. Thrives in any good soil not too wet. Each, 40c.

Auratum (Gold-Banded Lily)—A magnificent sort producing large broad creamy white flowers spotted with maroon and having a broad band of gold extending the length of each petal. Large size bulbs. Each, 35c. Per doz......\$3.50

The book "Gladiolus," by F. F. Reckwell, is recommended as the best brief guide on gladiolus growing. It tells how to plant, fertilize, and cultivate; how to grow from seed or bulblets; how to harvest and cure; how to handle for cut flowers, and every other detail needed for success with this popular flower. See page 95.

ROSES FOR THE GARDEN

Many of our old customers are familiar with the high-grade roses that we send out, but to those who have never planted our stock, we wish to direct their attention to the following:

All our roses are 2-year-old field grown budded stock, except where noted: While some planters prefer stock grown on their own roots on account of the possibility of budded plants developing wild shoots, this will rarely occur if the deep planting as directed in the following paragraph is followed. Much can be said in favor of budded plants, they being more vigorous producing finer blooms, coming into bearing sconer, and are as permanent and hardy as those on their own roots, while many of the very finest varieties will not succeed at all when grown on their own roots. Preference is given to budded plants by all who have had experience with the different classes.

HOW TO GROW ROSES

Situation—Good roses may be grown in any open, sunny position, if sheltered from north winds, and clear of all roots of trees and shrubs.

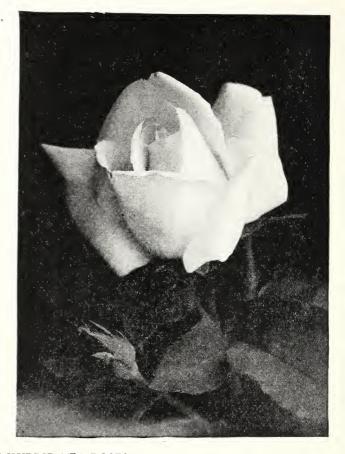

Planting—The soil should be rich, and carefully prepared to a depth of at least 18 inches. The most satisfactory fertilizer to use is well-rotted animal manure, of which a liberal quantity may be thoroughly mixed with the soil. Ground bone meal, at the rate of a trowelful for each plant, may also be added at the time of planting.

Plant Hybrid Tea Roses 18 to 24 inches apart and Hybrid Perpetuals $2\frac{1}{2}$ to 3 feet apart. All budded roses should be planted so that the crown from which the shoots arise is 1 inch beneath the surface of the bed.

Winter Protection—In this latitude we have found that the most satisfactory protection is to draw up a mound of soil from 8 to 10 inches high around the base of the plant, then covering the entire bed after the ground begins to freeze with any loose material, such as straw or peat moss.

Climbing or Trellis Roses—Planted around verandas or porches they are especially desirable. Other choice locations are for training over summer houses, pergolas, along fences and the rose walk. Climbing roses should be planted from 3 to 8 feet apart, depending upon how dense a covering is desired. Little, if any, prunings should be done. Branches that grow in long shoots, many times 15 to 20 feet or more, should be carefully trained and tied to trellis or support.

For complete description of Peat Moss, see page 78.

NEW HYBRID TEA ROSES

President Herbert Hoover (L. B. Coddington, 1930)—A cross of Sensation x Souvenir de Claudius Pernet. Large flowers of a very charming combination of cerise-pink, flame scarlet and yellow, with broad, thick petals retaining this characteristic for days after the flowers have fully opened; very fragrant. The clean, handsome foliage is an added attraction. Each. . \$2.6

Etoile de Hollande—One of the most reliable red bedding roses. A strong, clean, vigorous grower that produces its large, magnificent flowers throughout the season, these are moderately double and particularly attractive in the half-open state, in color a brilliant crimson red. Each.........\$1.00

Everest (W. Easlea & Sons, 1927)—Enormous flowers of crystalline white, delicately tinted with primrose. Of absolutely perfect form, with a high, conical center. Plants very vigorous; tree-flowering in June. Resembles the Hybrid Perpetuals in habit and may be grown as a pillar. Each..................................\$1.00

Lady Margaret Stewart (1927)—Another marvelous introduction of Alexander Dickson & Sons awarded the Gold

Medal of the National Rose Society of England at the 1926 Spring Show. A rose of unique and distinct color, the flowers in the young stage are a deep sunflower yellow heavily veined and splashed with orange-scarlet with the reverse of the petals deeply suffused with carmine, as the flowers develop these colors intermingle forming a most beautiful cadmium orange effect. The bud is long and pointed, opening to a full double flower, of most pleasing decorative form of delightfully sweet scent.

Rev. F. Page-Roberts (R. B. Cant & Sons, 1921)—Copper red buds of great length, opening to golden yellow blooms, stained outside with red, fully double, and very large; fragrant, strong, branching plant with healthy foliage. Each...90c

Talisman (Montgomery, 1929)—Awarded American Rose Society Gold Medal at Louisville, 1928; the President Coolidge Horticultural Gold Medal at New York, 1928; Gold Medals at Philadelphia and New York shows, 1928.

Talisman is the most vividly colored rose ever introduced and exceptionally easy to grow. It is a combination of yellow and copper suffused with pink in the bud. Its foliage is very fine and vigorous, untroubled by disease, and the plant grows rapidly and blooms with exceptional freedom. The flowers have much substance and never lose their striking color entirely, although they are lighter in unfavorable weather. Each......\$1.25

SHRUB ROSES

The roses listed in this group are of a valuable nature. They can be used in permanent plantings, such as hedges, in the shrubbery borders, or as a specimen shrub about the lawn or garden. They are very hardy and vigorous, needing but little care; simply thin out the old wood every three or four years.

Hugonis—A remarkable and very valuable briar rose brought in from China. Grows and spreads quickly to as much as 6 feet at maturity. Blooms extravagantly in May, full length of last year's shoots. Flowers single, ranging from deep gold to canary, with conspicuous stamen tutts. Dependably hardy and blooms best when planted in poor soil with a liberal quantity of coal ashes added. Each

SELECT HYBRID—TEA ROSES

Betty Uprichard—One of those delightfully contrastive types; the outside a blend of deep toned carmine with coppery orange; the interior a delicate salmon-pink. Strong garden variety, sweetly fragrant.

Briarcliff (Briarcliff Greenhouses, 1926)—An improved Columbia with large pointed buds, and double high-centered blooms of brilliant rose-pink, fragrant, and long-lasting. Stems stiff and long; foliage resistant to disease. Free-flowering.

Dame Edith Helen (A. Dickson & Sons, 1926)—One of the largest and most perfectly shaped pink roses known. It is shy in bloom in midsummer, but in the spring and fall produces on long strong stems blooms that will last a long time when cut. The color is a brilliant, yet soft pink, and is delightfully and strongly sweet scented. Foliage very good.

Duchess of Wellington-A vigorous grower with long, saffron-yellow buds opening to very large, light yellow flowers.

Los Angeles-Luminous flame-pink, toned coral, shaded translucent gold at base of petals.

Margaret McGredy (S. McGredy & Son, 1927)—Large ovoid buds and double cupped flowers of solid orange-vermilion. Foliage light green, resistant to black-spot and mildew; very prolific. Seldom out of bloom.

Mme. Alexandre Dreux (Soupert & Notting, 1921)— Intensely yellow bud, opening to a medium sized high-centered flower with petals of deep yellow splashed with orange. Plant is moderately vigorous, very free flowering.

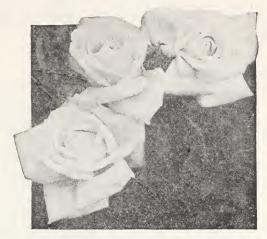

Mme. Butterfly-Brilliant pink, suffused apricot and gold.

Mme. Jules Bouche—Superb white flowers, shaded light blush at the center; fragrant. Plant exceptionally strong, healthy and very free-flowering.

Mrs. Erskine Pembroke Thom (Howard & Smith, 1926)—This is one of the best yellow garden varieties yet ntroduced. It is of clean, vigorous, healthy, bushy habit of growth, with dark bronzy-green disease-resisting foliage. Slender yellow buds and large well-shaped blooms of bright canary yellow, deepest in center. The plant is of exceptional vigor and blooms very freely, particularly good in the fall. Each75c

Mrs. Henry Morse—A bright flower of two tones of pink, with an underlying yellow glow; flowers large, full and very high-centered, moderately fragrant.

Radiance-An ideal bedding rose of American origin that continues to produce its large flowers throughout the most unfavorable hot summer weather when frequently many other varieties fail; in color a brilliant carmine-pink, with salmon-pink and yellow shadings at the base of the petals; truly a rose for every garden.

Red Radiance—A counterpart of Radiance from which it "sport," possessing all the good traits of that valuable variety is a "sport," possessing all the good traits of that valuable variety but differing in color which is a bright cerise-red.

Sensation—Bud is large, long-pointed; the expanded flower very double. The finish suggests rich velvet, in color a scarlet-crimson deepened over all by glossy maroon. The foliage is dark, and the scented bloom profuse.

Souvenir de Claudius Pernet—Color, a most striking sunflower-yellow, deeper in the center without any color blending and which is retained without fading even in the warmest weather.

Souvenir de Georges Pernet—A strong, vigorous grower and bloomer. The flowers are large; globular in form; color, Orient free bloomer. The flowers are large; globular in form; color, Orient red shading to a cochineal-carmine at the end of the petals, the whole being suffused with a golden sheen.

Wilhelm Kordes (W. Kordes Söhne, 1922)—Long, pointed buds and double high-centered flowers of deep golden salmon overspread with a tint of copper, and veined with red, very fragrant of unusually free flowering vigorous compact growth.

Willowmere—A coral-red; suffused with carmine in the bud, and opens to a large, full flower of a rich shrimp-pink, shaded yellow. A very strong grower and a persistent bloomer.

PRICE—Any of the above, in strong two-year-old field-grown plants (except where noted). Each, 60c. Per dozen, \$6.50

HARDY CLIMBING ROSES

American Pillar (Dr. W. Van Fleet, 1902)-Fairly large, single flowers of brilliant crimson-pink, with large white centers and golden yellow stamens. Blooms profusely in tremendous clusters on plants of astonishing vigor. Late.

Bess Lovett-Clear bright red, long stems; fragrant.

Chaplin's Pink Climber (Chaplin Bros., 1928)-Substantial broad trusses of wide, flat flowers in a brilliant shade of clean, pure pink which is retained from bud to full-blown flower. The plant is vigorous and extremely free-flowering, covering itself completely with sheets of bloom. Each.....\$1.00

Climbing American Beauty-Brilliant carmine flowers; fragrant, blooms early.

Dorothy Perkins-Pure salmon-pink. Late.

Dr. Van Fleet-Rich flesh-pink; exquisitely shaped buds. Midseason.

Le Reve (Pernet-Ducher, 1923)-Golden yellow buds and bright yellow, semi-double flowers profusely produced early in the season. The plant is of moderate, vigorous growth with good

Mary Wallace-Rose-pink, salmon base. Early.

Paul's Scarlet Climber-Vivid scarlet. Early.

Primrose (Barbier & Co., 1929)—Large, double flowers of soft, rich primrose yellow, borne in clusters of 4 to 5 on an extremely vigorous and hardy plant, with marvelously beautiful. foliage, midseason. Each.....\$1.00

Silver Moon-Pure white, foliage perfect; midseason.

Mme. Gregoire Staechelin (Pedro Dot, Spain, 1927)-Buds long-pointed; very large, moderately fragrant flowers of delicate pink, with curled petals stained crimson outside, borne on long, strong stems. Foliage dark green, disease resistant. The plant is extremely vigorous, growing 13 to 14 feet in a scason; abundant bloomer.

Mme. Gregoire Staechelin has just been awarded the John Cook Medal for the most outstanding climber, also the French Bagatelle Medal (1927), the highest international recognition that a Rose can receive. Each.......\$1.50

PRICE (Except as noted). Each, 45c. Per dozen...\$5.00

POLYANTHA (Baby Rambler) ROSES

Ideal for bedding, edging of walks and bordering rose-beds. They form shapely, compact bushes 15 to 18 inches high and are in bloom constantly.

PRICE (Except as noted)—Each, 45c. Per dozen...\$5.00

HYBRID PERPETUAL ROSES

HYBRID PEKPETUAL KUSES

The Hybrid Perpetuals are receiving the attention of the best hybridizers of the world who are producing new varieties more refined than the older "June Roses", besides being fairly recurrent. This hardy class of roses is rapidly coming back into fashion.

Everest (W. Easlea & Sons, 1927)—Enormous flowers of crystalline white, delicately tinted with primrose. Of absolutely perfect form, with a high, conical center. Plants very vigorous; free flowering in June. Resembles the Hybrid Perpetuals in habit and may be grown as a pillar. Each...\$1.00

Frau Karl Druschki—Best white, blooms freely and continuously.

tinuously.

General Jacqueminot—Flowers bright crimson, deeply fragrant, if fertilized well will bloom the second time.

Mme. Albert Barbier—Large, beautifully formed flowers of soft fawn-yellow, paling to white, with pinkish shades in the center. Growth moderate, blooming steadily throughout the

Mrs. John Laing-Soft pink, very fragrant, blooms throughout the season.

PRICE (Except as noted)-Each, 45c. Per dozen...\$5.00

HARDY PERENNIAL AND ROCK PLANTS

Plant orders will be forwarded by express, purchaser paying charges. Small orders may be forwarded by parcel post, but if wanted sent this way, please add 10 per cent of the value of the plants to cover postage and packing. All our perennials are strong field-grown plants and can be shipped during late March, April and early May and again in September and October.

ALYSSUM

Saxatile Compactum (Basket of Gold)—Showy, bright yellow flowers, hardy perennials; excellent for rock work; 1 ft. Each, 25c. Per dozen.....\$2.50

ANEMONE (Wind Flower)

AQUILEGIA (Columbine)

This is one of the best perennials for borders or edges of shrubbery. They do best in partial shade.

Mrs. Scott Elliott's Long Spurred Hybrids—Each,
35c. Per dozen......\$3.50

ARABIS (Rock Cress)

Alpina—Low growing for the rockery, small white terminal racemes; 6 in. April, May. Each, 25c. Per dozen.....\$2.50

These are well-known biennials and perennials which are easily grown in any garden and give fine borders or beds. Colors pink, blue and white. Each, 25c. Per dozen....\$2.50

CERASTIUM (Snow-in-Summer)

.....\$2.50

CHRYSANTHEMUMS (Hardy)

Baby-Clear bright vellow. Bostom—Tall bronze.

Lillian Doty—Early pink.

Red Doty—Red-flowered, form of Lillian Doty.

White Doty—Pure white, globular flowers.

Each, 30c. Per dozen......

COREOPSIS LANCEOLATA

Bright golden-yellow, blooming in profusion all summer Each, 20c. Per dozen......\$2

DELPHINIUM (Larkspur)

These are deservedly one of the most popular subjects in the hardy border, bold, attractive and highly prepossessing plants of easiest culture; perfectly hardy. They will establish themselves in almost any garden soil, but respond quickly to liberal treatment.

Delphinium Belladonna—The freest and most continuous blooming of all. Clear turquoise-blue. Each, 25c.

DIGITALIS (Foxglove)

The strong flowerstalks—frequently 4 to 6 feet high—rising from rich and luxuriant masses of leaves, always give an appearance of strength to the hardy border, and during their period of flowering dominate the whole garden. Assorted. Each, 25c. Per dozen.....

FORGET-ME-NOT

Myosotis Palustris Semperflorens—A variety that is hardly ever out of flower; useful in a shady spot in the border and for forcing cut flowers in the winter. Each, 25c. Per

GAILLARDIA (Blanket Flower)

Grandiflora—One of the showiest hardy plants, growing about 2 feet high and succeeding in any soil in a sunny position. The center is dark-red brown, while the petals are marked with rings of brilliant crimson, orange and remillion. Each, 20c. Per dozen.....\$2.00

GYPSOPHILA (Baby's Breath)

Will thrive in any soil in a sunny position, and on account of their gracefully arranged large panicles of minute flowers should be in every garden.

Paniculata—A beautiful old-fashioned plant, possessing grace not found in any other perennial. Each, 25c. Per \$2.50 dozen....

HIBISCUS (Mallow)

Mallow Marvels—A robust type of upright habit, producing an abundance of flowers of enormous size in all the richest shades of crimson, pink and white; mixed colors.

Each, 20c. Per dozen.....\$2.00

HOLLYHOCKS

Growing 5 to 6 feet tall, these plants produce a pleasing effect planted either in rows on the lawn or among shrubbery. They require a deep rich soil and a sunny situation and will repay a little extra attention given them.

Double flowering in colors. Each, 20c. Per dozen...\$2.00

IBERIS (Hardy Candytuft)

A low evergreen, shrubby plant. Very valuable for dry, sunny places. Effective in clumps, drooping over rocks or edging the border. Hardy perennial.

Sempervirens—A profuse, white blooming, hardy perennial, coming in flower early in the spring. 1 ft. Each, 25c. Per dozen....

PHLOX (Hardy)

Phlox Decussata—This is one of the most useful flowers for summer decoration, the colors varying from pure white to deep crimson.

B'Compte-Reddish-purple. Beacon-Cherry red. Mrs. Chas. Dorr-Lavender. Miss Lingard—Pure white with pale pink center. Rheinlander—Salmon-pink. Each, 25c. Per dozen.....\$2.50

PHYSALIS (Chinese Lantern Plant)

Franchetti—An ornamental variety of the Winter Cherry, forming dense bushes about 2 feet high, producing freely its bright orange-scarlet lantern-like fruit which, when cut, will last all winter. Very attractive plant. Each, 25c.

PINKS (Hardy Garden)

Dianthus Plumarius—Hardy Garden or Pheasant Eye Pinks.) These "Clove Pinks," so much used for edgings of old-fashioned gardens, bloom most profusely during May and June. They grow about a foot high and bear double flowers resembling small carnations. We have white, pink and red. Each, 25c. Per dozen.....\$2

POPPY (Oriental)

Perennial poppies are of the easiest culture; almost any kind of soil suits them, but they do best in deep, rich loam; give them water occasionally during dry spells in the early part of the season. Each, 25c. Per dozen........\$2.50

SEDUM (Stone Crop)

Lydium—Bronzy-green foliage, pink flowers. A fine rock plant. 1-3 in. Each, 30c. Per dozen............\$3.00

Spectabilis—Erect growing; height, 18 inches with broad light-green foliage and immense heads of handsome, showy, rose-colored flowers. Each, 25c. Per dozen......\$2.50

SHASTA DAISY

Large, snowy-white flowers, in bloom continuously throughout the summer and fall. Each, 20c. Per dozen......\$2.00

SWEET WILLIAM

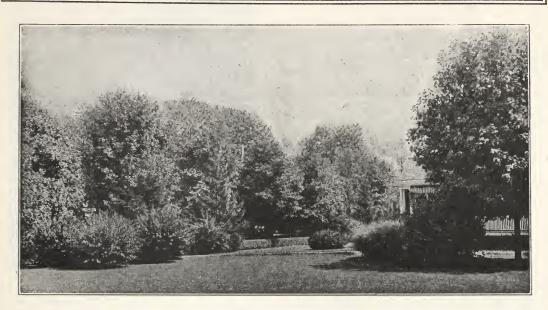

Dianthus Barbatus—These old-fashioned favorites are prized border plants. There is a great variety of rich colors, and the flowers are very fragrant. Each, 20c. Per dozen.\$2.00

TRITOMA

(Red Hot Poker, Flame Flower or Torch Lily)

WE DO NOT GUARANTEE OR REPLACE PLANTS, SHRUBS OR TREES AT PRICES QUOTED.

ORNAMENTAL FLOWERING SHRUBS

There is nothing that will add more beauty or lend more enchantment to grounds and lawns than well selected judiciously grouped shrubs, and considering their moderate cost, they should be used more largely.

SPECIAL

EIGHT POPULAR SHRUBS THAT BLOOM ALL SUMMER

Forsythia Fortunei 5 to 6 feet—April	Honeysuckle Red Tartarian . 5 to 6 feet—May-July.
Deutzia3 to 4 feet—May	Weigelia Rosea4 to 5 feet—June
Spirea Van Houttei4 to 5 feet—May-June	Spirea Anthony Waterer 2 to 3 feet—July-Aug.
Syringa Mock Orange6 to 7 feet—May-June	Hydrangea P. G 3 to 4 feet—AugOct.
AROVE COLLECTION OF EIGHT	FLOWERING SHRURS \$2.45

Althea (Rose of Sharon)—The Altheas are among the most valuable of our hardy Shrubs on account of their late season of blooming, which is from August to October, a period during which but few shrubs or trees are in flower. They are also extensively used as hedge plants, for which they are admirably adapted.

Althea Double Rose, Double White and Double Purple, Each, 50c. Per doz.......\$5.00

Buddleya (Butterfly Shrub or Summer Lilac)—Flowers continuously all season. The flowers are composed of many little blossoms in the shape and color of lilacs. Each, 35c. Per doz. . . . \$3.85

Deutzia Gracilis—A dwarf bush, covered with spikes of pure white flowers in early summer. Each, 50c. Per doz. \$5.50

Deutzia Lemoini—Flowers pure white. Habit dwarf and free flowering. Extra strong plants. Each, 50c. Per doz.\$5.50

Dogwood (White Flowering)—The flowers produced in spring before the leaves appear, are from 3 to 3½ inches in diameter, white and very showy. Foliage grayish green, glossy and handsome, and in the autumn turns to a deep red; one of the most showy flowering trees. Each, \$1.00. Per doz..\$10.00

Forsythia Fortunei (Golden Bell)—Of upright growth, deep green foliage and bright yellow flowers in April. Extra strong plants. Each, 25c. Per doz.......\$2.75

WE DO NOT GUARANTEE OR REPLACE PLANTS, SHRUBS OR TREES, AT PRICES QUOTED.

For planning the use of Shrubs, we recommend the book "Shrubs", described on page 95.

ORNAMENTAL FLOWERING SHRUBS-Cont'd

Hydrangea Paniculata Grandiflora—This is the finest shrub in cultivation, and endures heat and cold extremely well. The flowers, which are borne in dense pyramidal panicles in the greatest profusion, are white when they first open, but gradually change to rose and remain in good condition for weeks. Extra strong plants. 18 to 24 inches. Each, 50c. Per doz...\$5.50

HYDRANGEA PANICULATA GRANDIFLORA

Standard or Tree Shaped

These are fine specimen plants, four and five years old, trained to tree shape with about three feet of straight stem and nicely shaped heads, should bloom profusely the first year. Extra strong plants. Each.........\$1.25

HONEYSUCKLE, Upright

Valuable for handsome flowers and showy fruits. The following varieties are erect, upright growth. The climbing sorts will be found under the head of Climbing Plants.

Morrowi—A fine variety from Japan, valuable for its handsome fruit. 2 to 3 feet. Each, 50c. Per doz.......\$5.50

Red Tartarian—Pink flowers which contrast beautifully with the foliage. 2 to 3 feet. Each, 50c. Per doz......\$5.50

White Tartarian—Forms a high bush of creamy white fragrant flowers in May and June. 2 to 3 feet. Each, 50c. Per doz. \$5.50

KOLKWITZIA AMABILIS (Beautybush)

Kolkwitzia Amabilis (Beautybush)—A charming new shrub which increases our debt to China. Discovered among the high peaks of Hupeh's mountains, its progeny in America is proving likewise hardy in New England's severe climate. The attractively leaved bush attains about six feet, the center upright, the outer branches gracefully arching. Has a general resemblance to both Weigela and Honeysuckle, the beautiful trumpet shaped flowers appearing in great profusion during June, in pairs which cluster closely into cymes of about twenty-five. Flowers are bell-shaped and somewhat lipped, pale pink with orange veins in the throat, the buds being much darker. There are not many salable plants available, but we can supply a limited number. Each. \$2.00

LILAC

Lilac Common White (S. Vulgaris alba)—Flowers pure white; very fragrant. 2 feet. Each, 50c. Per doz......\$5.50

MOCK ORANGE

Mock Orange or Syringa—A well-known shrub, with pure white, highly scented flowers. One of the first to flower. Extra strong plants......\$5.56

JAPAN QUINCE

SNOWBALL, Viburnum

SNOWBERRY

SPIREA. Meadow Sweet

Elegant low shrubs of easiest culture, their blooming extends over a period of 3 months.

SPIREA-Continued

Billardi—A fine rose-colored sort, which blooms nearly all summer. 2 to 3 feet. Each, 60c. Per doz...........\$6.00

Thunbergi—Of dwarf habit, rounded, graceful form with slender branches, somewhat drooping. Flowers are small, white, appearing early in spring. Foliage narrow and yellowish green. One of the first Spireas to bloom, and much esteemed on account of its neat, graceful habit. 18 to 24 inches. Each, 35c. Per doz. \$3.8

Van Houttei—One of the very finest of all Spireas. At the flowering season, in May or early June, the plant is covered with a mass of large, white flowers presenting a beautiful appearance. It is a beautiful ornament for the lawn at any season. Perfectly hardy, an early bloomer and one of the finest shrubs in the catalogue. 2 to 3 feet. Each, 30c. Per doz. \$3.25

WEIGELIA

Eva Rathke—A charming variety, flowers brilliant crimson, a beautiful, distinct clear shade, strong plants. 2 to 3 feet. Each, 50c. Per doz..................\$5.50

Rosea Nana Variegata—Leaves beautiful, margined creamy white; flowers pink. It is a dwarf grower, and adapted to small lawns or gardens. 2 to 3 feet. Strong plants. Each, 50c. Per doz.\$5.50

HEDGE PLANTS

California Privet—A vigorous, hardy variety of fine habit and dark green foliage which is rarely attacked by insects and keeps its green color mostly unchanged until late fall. It succeeds well under adverse conditions and is ideal for planting as ornamental hedges.

Planting—Plant in double rows, the two rows being about 8 inches apart. The plants should be set 12 inches apart in the row, alternating the plants. In order to secure a dense hedge from the base up, the plants should be severely pruned the first two seasons.

 1½ to 2 feet.

٥	Mugho Pine	 		 		 		٠		٠.			6-

FOUNDATION COLLECTION-\$7.25

Mugho Pine

American Arborvitae

FRUIT TREES

Select thrifty trees in preference to old or very large ones; the roots are more tender and fibrous and they bear transplanting better and are more apt to thrive; they can also be more easily trimmed and shaped to any desired form, and in the course of a few years will usually outstrip the older ones in growth. If not

SENT BY EXPRESS OR FREIGHT AT EXPENSE OF PURCHASER.

APPLES

STANDARD

We can furnish all varieties usually catalogued, but the following list comprises the most desirable sorts:

5 to 7 feet, 75c each; \$7.50 per dozen.

SUMMER VARIETIES

Early Harvest-Pale yellow, fine flavor, August. Yellow Transparent-Pale yellow, good quality.

AUTUMN VARIETIES

Fall Pippin—Very large, yellow, rich, aromatic. Maiden's Blush—Large, beautiful, blush cheek.

WINTER VARIETIES

Baldwin-Large, dark red, productive.

Ben Davis—Large, handsome, striped; good quality.
Grimes Golden Pippin—Medium to large, skin golden yellow, flesh crisp, tender, juicy, long keeper.
Jonathan—Medium, red and yellow, flesh tender, juicy

and rich.

Rome Beauty—Large, yellow shaded red, tender. Wine Sap—Medium, deep red, rich, sub-acid.

CRAB APPLES

5 to 7 feet, 90c each; \$9.00 per dozen.

Hyslop-Deep crimson, very popular on account of its large size, beauty and hardiness.

PEARS

STANDARD AND DWARF

5 to 7 feet, 90c each; \$9.50 per dozen.

Bartlett-Large, clear, yellow, juicy, August. Kieffer's Hybrid—Large, rich color and good quality. Seckel-Small, yellowish brown, one of the best.

QUINCES

3 to 5 feet, \$1.00 each; \$9.50 per dozen.

Champion-Fruit bright yellow, flesh very fragrant and tender, October.

prepared to plant when your stock arrives, "heel in" by digging a trench deep enough to admit all the roots and setting the trees therein, carefully pack the earth about the roots, taking up when required. Never leave the roots exposed to the sun and air. We do not guarantee to replace plants or trees.

MULBERRIES

4 to 6 feet, \$1.00 each; \$9.50 per dozen.

Downing's Everbearing—One of the most prolific varieties, bearing an abundance of large, black, sub-acid fruits, hardy, fruits about three months.

PEACHES

4 to 5 feet, 60c each; \$6.00 per dozen.

Champion—Creamy white with red cheeks, freestone, excellent quality, early in August.

Crawford's Early—Large yellow, of good quality, freestone,

early in September.
Crawford's Late—Large, yellow with red cheek, freestone,

last of September.

Bast of September.
Elberta—Large, yellow with red cheek, flesh yellow, firm, juicy, of high quality, very prolific, September.

GRAPE VINES

ALL TWO-YEAR-OLD SELECTED STOCK

BLACK OR PURPLE GRAPES

Campbell's Early—Bunch and berry large, glossy, black, sweet and juicy; fine quality. Each, 20c. Per dozen.....\$2.00

Moore's Early—Ripens ten days earlier than Concord; bunch medium, berry large, round and black, vine exceedingly hardy. Each, 20c. Per dozen......\$2

Concord—Large, black grape, hardy and productive; juicy and sweet. Each, 15c. Per dozen..........\$1.50

Ives Seedling-Dark purple, sweet. Each, 20c. Per dozen...

RED GRAPES

25c each; \$2.50 per dozen.

Brighton-Bunch large, berries red, round, excellent flavor; one of the earliest.

"Catawba-Berries large, round, when ripe a dark copper color; sweet, rich, musky flavor.

Delaware-Small, light red, thin skin, very juicy, sweet, fine flavor.

WHITE OR YELLOW GRAPES

*Niagara—Vine remarkably hardy and strong grower; bunches very large and compact; berries large, greenish white, slightly ambered in the sun; skin thin but tough, and does not crack. Each, 20c. Per dozen......\$2

Pocklington—A seedling of the Concord, resembling that variety in leaf, vine, habit of growth, hardiness and productiveness. Bunch and berry very large; attractive golden yellow color. Each, 20c. Per dozen......\$2

"Varieties marked with a " are best for arbors.

BLACKBERRIES

60c per dozen; \$4.25 per 100.

Early Harvest-Very prolific, choice variety.

Blower-Large, luscious berries, rich in quality and quantity.

Eldorado-Large fruit, borne in clusters and ripen well together, fine quality, good keeper.

DEWBERRY

85c per dozen; \$6.00 per 100.

Lucretia—One of the low-growing, trailing blackberries. In earliness, size and quality it equals any of the tall-growing sorts. It has proven highly satisfactory wherever tried, and many say it is the best of the blackberry family.

*CURRANTS

30c each; \$3.00 per dozen.

Cherry-Fruit large, bunch small, deep red, acid,

Fay's Prolific-Extra large stems and berries, color rich red, fine quality, very productive.

Pomona-Bright red, extra fine quality and enormously productive; strong, vigorous grower.

*GOOSEBERRIES

25c each; \$2.50 per dozen.

Downings-Very large and fine quality,

Houghton-Medium size, very productive.

Smith's Improved-Large, thin skin, best for table use.

*Note—Due to Federal Quarantine No. 63, we do not accept orders for Currants or Gooseberries to be shipped or delivered out of the State of Ohio.

RASPBERRIES

50c per dozen; \$3.50 per 100.

St. Regis-Fruit commences to ripen with the earliest and continuing on young canes until October, many quarts often being picked after the first snowfall. Berries bright crimson, large size, rich, sugary, with full raspberry flavor. Flesh firm and meaty, a good shipper. Wonderfully prolific. Canes stocky, of strong growth, with abundance of dark green leathery foliage.

Cardinal—Produces a fine quality of dark red or almost purple berries through a long season.

Cumberland—The largest black cap; a healthy, vigorous grower; very productive and of finest quality.

Cuthbert-Large, firm, deep rich crimson, of excellent quality, tall, strong, vigorous, perfectly hardy and very productive Ripens medium to late.

SPRING STRAWBERRIES

25 plants 50 cents; 100 plants, \$1.25. 1000 plants of one variety, \$7.00.

Missionary (Per.)—An early variety, a vigorous grower, healthy and rust resistant, producing large quantities of good size, dark red berries of good flavor.

Senator Dunlap (Per.)—The demand for this variety has been increasing steadily, as it has an unusually long fruiting season. It bears immense quantities of large, handsome, rich, fine-flavored dark red berries.

Lady Corneille (Per.)—This wonderful strawberry has more good qualities than ever before combined in any one berry. It is the healthiest, thriftiest, best growing plant with clean foliage, absolutely free of rust or leaf spot; plants large, strong, with large roots that grow deep in the ground. Thrives in both clay and loamy soil. Ripens same time as Senator Dunlap. Berries large, rich, glossy red, slightly long and of the best quality. Gandy (Per.)—Another old favorite. Its popularity, instead of decreasing, is steadily increasing. The fruit is a dark red with dark red seeds. A very late berry that does best on a heavy clay soil.

Aroma (Per.)—One of the finest for long distance shipping. The large berries are bright red to the center. Of conical shape, with prominent yellow seeds that help to make them very attractive on market. The Aroma has three outstanding points: Its large size, its very bright color and the very fragrant aroma.

FALL OR EVERBEARING STRAWBERRIES

Progressive, 60c per dozen; \$2.50 per 100. Mastodon, 85c per dozen; \$3.75 per 100.

ASPARAGUS ROOTS

ASPARAGUS ROOTS

May be either planted in fall or spring. Dig up your ground deep, put plenty of well-rotted manure thoroughly mixed in the soil, throw out a bed about four to five inches deep, lay the plants in by spreading the roots out well and scatter the dirt over the plants about four inches, or the depth of the ground thrown out, firm the dirt well around the plants by patting it down with spade or shovel, then top dress the ground with about three inches of well-rotted manure, and scatter salt enough over the top of this to make the ground white enough to track a rabbit. The second year after planting you will be able to harvest enough asparagus for a good-sized family from a bed of about 200 plants. You should keep the crown of the asparagus cut regularly so it will produce from three and one-half to seven pounds of asparagus, and when planted in small beds, where it can be well mulched and cared for, will even do much better than this. It is necessary to start with good roots. It depends much more on the care taken of the plants and the plant food given them than it does the variety planted. Salt should be put on at the end of every season.

WATER-LILIES AND AQUATIC PLANTS

Place your order for these plants early and we will reserve them until the proper planting season.

You have never known all the delights of a garden, if you have never known the real pleasure that comes from a pool of waterlilies.

Hardy water-lilies thrive in pools and small ponds, no trouble to care for them. A box one foot square and one foot deep is as small as you can have for the plants to do well.

The soil for water-lilies is preferably a mixture of two-thirds rich garden soil and one-third well rotted cattle manure.

Most water-lilies thrive at any depth from 4 to 30 inches. PINK VARIETIES

CLIMBING AND TRAILING PLANTS

AMPELOPSIS

Veitchii—Japan Creeper. Boston Ivy. A rapid growing climber which clings to walls, fences, trees, stumps, etc., with great tenacity. The leaves overlap one another, forming a dense sheet of green in summer, which changes to crimson scarlet in autumn. Strong 2-year old. Each, 35c. Per doz. \$3.50

CLEMATIS

Among the most popular of hardy perennials and not exceeded in beauty and effectiveness by any other class of climbers. They are excellent as a screen for fences, pillars, or trailing on walls or arbors, or on verandas. Very effective in masses of rock work and some are valuable for cultivation in pots. Clematis does best in deep, rich, sandy, loamy soil, well mulched with manure and the finest results are obtained in partial shade, where there is a liberal supply of water given at the roots.

Named Sorts—These include Jacmanni (large violet purple), Henryii (large creamy white), Madam Edw. Andre (large bright velvety red). Strong plants. Each..........\$1.00

We send out strong, healthy roots of Clematis and cannot entertain any claims for non-success with these plants.

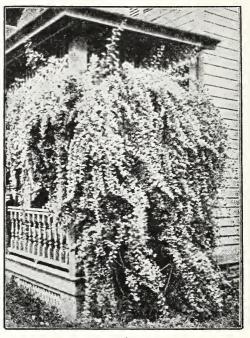

HONEYSUCKLE

Monthly Fragrant—Blooms all summer. Red and yellow, very fragrant flowers. Each, 50c. Per doz...........\$5.00

Hall's Japan (Halleana)—A strong, vigorous, almost evergreen sort. Pure white flowers changing to yellow, very fragrant. Blooms abundantly from July to December, holds its leaves until January. Each, 35c. Per doz\$3.50

KUDZU VINE—Pueraria Thunbergiana or Jack and the Bean Stalk Vine

IVY

Clematis Paniculata

WISTERIA

Chinese Purple (Sinensis)—An elegant and rapid growing climber, attaining a height of 20 feet in a season. Has hundreds of long, pendulous clusters of sweet scented pale blue flowers in May and June and in autumn. Each................50c

ORNAMENTAL GRASSES

Price, all Varieties. Each, 35c; per doz......\$3.50

Erlanthus Ravennae (Plume Grass)—Grows six to eight feet high and produces handsome plumes in fall.

Eulalia Gracillima (Japan Rush)—The most beautiful of all the Eulalias, with narrow, graceful foliage entirely green, except that the mid-rib is of a silver sheen. Perfectly hardy.

Eulalia Japonica Variegata—Leaves striped white and green longitudinally.

Eulalia Zebrina (Zebra Grass)—A peculiar variegated grass, growing six feet high. The variegation is unlike that of any other plant, being across the leaf in regular bands, dark green and light yellow alternating.

The dried blooms of all the Eulalia make beautiful winter ornaments.

INSECTICIDES AND FUNGICIDES

Insecticides prefixed by (a) cannot be sent by mail.

All prices subject to market changes.

*ACME ALL ROUND SPRAY-Flowers, vines, shrubs, roses, vegetables, need protection same as commercial crops. All Round Spray contains the three leading remedies used by all large growers, Arsenate of Lead, Nicotine Sulphate and Bordeaux Mixture.

Perfect protection for the small user is assured by complete directions in form of spraying guide attached to every package.

ACME GARDEN GUARD-No sprayers, no water, no mixing. Dust on plants from sifter top carton. Acme Garden Guard is the strongest garden insecticide of its type on the market-yet safe to use. For use on cabbage, cauliflower, tomato plants, melon vines, currant and gooseberry bushes and other vegetables, flowers and shrubs of many kinds. 1 lb., 25c.

*ACME 2-WAY SPRAY-An approved balanced Insecticide and Fungicide containing 14% Arsenate of Lead and 83% Bordeaux Mixture-2 results with one spray.

Controls Insects, combats Blight, stimulates Foliage.

Easy to apply-wet or dry-For dusting, apply lightly, as it comes in the package.

In spraying apples, grapes, muskmelons, potatoes, squash and tomatoes, use 91/2 level tablespoonfuls to 1 gallon of water.

On pears, sour cherries, egg plant and peppers, use 7 level tablespoonfuls to 1 gallon of water. 1 lb., 50c. 4 lbs....\$1.50

ANSECT (Rose Bug Destroyer)-Highly effective when used on Rose Bugs, many hard-bodied insects, Red Spider, Mealy Bug and other garden pests. Dilute with from 30 to 50 parts water. Thorough spraying is essential. 4-oz. cans, 30c. 1-pint cans.....\$1.00

By mail or express at customer's expense.

New Method "Gets" Them At Their Source-Safe, Permanent, Effective,

ANTROL-The Antrol system is adapted to any size house or garden and quickly destroys all species of sweet eating ants. It is composed of small glass containers and a special formula of syrup-The containers are partially filled with syrup and placed about the outside edges of the house or along ant "trails" in the garden. The ants smell the syrup, eat it and then transmit its mild poison to the queen in the nest. Soon the entire ant colony is destroyed!

The complete system should cover every 15 feet around the outside of the house or ant "trails" in the garden.

ARSENATE OF LEAD—One of the best and most effective of poisonous insecticides for leaf-eating insects, and more especially adapted to trees and shrubs, as it adheres to the foliage better. It is not so liable to be washed off by rains, and does not burn.

Dry-1/2-1b., 25c; 1 lb., 40c; 4 lbs., \$1.10. 12 lbs....\$3.00

BLACK LEAF 40 (40% Nicotine Sulphate)-Kills by contact and fumes. Highly recommended by Experiment Stations as a control for Aphis, Thrip, Leaf-hopper and other insects of like nature. Can also be used for delousing poultry by painting Black Leaf 40 (full strength) on the top-sides of the roosts before fowls perch for the night. 1-oz. bottle, 35c; ½-lb. bottle, \$1.25; 1-lb. bottle, \$2.50; 2-lb. tin, \$3.75; 5-lb. tin, \$7.00. 10-lb. tin. \$11 85

BORDEAUX MIXTURE-For blight. mildew and all fungous diseases. Can be used alone or in connection with Paris Green or Arsenate of Lead. For hardy foliage such as apple, pear, potato, tomato, egg plant, use 2 oz. to 3 quarts of water. For tender foliage such as peach, cherry and cucumber, dilute to one-half strength. 1/2-lb., 25c; 1 lb., 40c; 4 lbs., \$1.10. 12 lbs.....\$3.00

*CALCIUM CYANIDE (Cyanogas A)—Dust to kill Rats, Mice, Moles, Land Crabs, Wood Chucks, Ground Squirrels, etc. ½-1b., 45c; 1 lb., 75c. 5 lbs......\$3.00

(Cyanogas G)—For greenhouse fumigation. 5 lbs....\$3.00 CUTWORM KILLER-See "Snarol."

Effective against cucumber and melon beetles, cabbage worms, rose slugs, aphis, leaf-hoppers, and most other plant insects including cutworms and Mexican Bean Beetle.

Non-Poisonous-Evergreen is harmless to man, live stock, birds and pets. Kills only insects. Eliminates washing of fruits and vegetables before marketing.

Bulk prices on request order today

Non-Injurious-Spray freely on the tenderest plants. Won't injure the ground.

Easy to Use-Just mix with water and stir. No unpleasant odor

Won't Gum Sprayers-No bad effect on metal or rubber. Stays in solution and can't clog sprayers. 1-oz. bottle, 35c; 6-oz. bottle, \$1.00; 16-oz. bottle, \$2.00; 32-oz. bottle, \$3.50; 1-gal. bottle, \$13.00. 5 gal......\$50.00

FLIT-Destroys flies, mosquitoes, moths, ants, bed bugs, roaches, other insects and their eggs.

Clears the house in a few minutes of mosquitoes and disease bearing flies.

Flit spray penetrates cracks and crevices where bed bugs and roaches breed, destroying the insects, their eggs and larvae.

Flit, sprayed on garments, destroys moths, their eggs and the tiny worms that eat holes.

Spray Flit freely about the room, keeping doors and windows closed. After five to ten minutes flies will be found dead on the floor. All odor will disappear if room is freely aired.

Spray Flit liberally on standing water, drains, etc., to kill

FOR SPRAY CALENDAR, SEE PAGE 76. Insecticides prefixed by (*) cannot be mailed.

INSECTICIDES AND FUNGICIDES—Cont'd

FISH OIL SOAP-One of the best and safest remedies for sucking insects and plant lice on vegetables, shrubs and trees. Kills Aphis, Thrip, Melon-Lice and all insects sucking juices from trees. Is also effective for preventing and destroying borers in trees as a wash. 1 lb., 35c. 5 lbs......\$1.50

CONOUERS MILDEW AND BLACK SPOT

A highly concentrated fungicide invisible on the foliage or blooms. Fungtrogen is the most effective and scientific preventative and remedy for mildew, black spot and other fungoid diseases of roses and other plants.

It is equally valuable for rust on carnations grown under glass as well as snapdragons, etc., imparting a sturdy vigor hereto-fore considered impossible. Fungtrogen is a complete spray easily diluted in water, making 60 times its volume. Endorsed by leading

"NU-GREEN OR SEMESAN

1

For the successful prevention and control of Brown Patch

No longer is it necessary to fear the ravages of large and small Brown Patch with the coming of hot, humid weather.

In order to prevent the appearance of these diseases which so quickly damage your expensive greens, follow a systematic plan of treating with either Nu-Green or Semesan. Both fungicides come ready for use. Neither injure the grass. They are easily and quickly applied.

Semesan is the original brown patch fungicide. It has been used successfully by many clubs and found to give excellent control under the most severe brown patch conditions. It is very effective under all conditions but is recommended especially where the turf is in a good state of fertility.

Nu-Green contains the same effective ingredient as Semesan, but has the added property of quickly restoring the diseased grass to its normal healthy condition where soil fertility is not already suited to its rapid recovery.

To prevent Brown Patch from putting in an appearance, once each ten days or two weeks, beginning prior to the Brown Patch

season, apply a solution of one pound Nu-Green or Semesan to 50 gallons of water. Apply at the rate of 50 gallons of solution to 1,000 square feet of turf, including the approaches and borders by the sprinkling method and at the rate of 50 gallons to each 2500 to 3000 square feet with a power sprayer.

FERTILIZERS

SACCO is a COMPLETE BALANCED PLANT FOOD made specially for the development and care of

BEAUTIFUL LAWNS, GARDENS, SHRUBS, FLOWERS AND TREES

PRODUCES EXCEPTIONAL RESULTS

A single SACCO application can be depended upon to make grass and vegetables grow vije orously and to make flowers and shrubbery beautiful with bloom and foliage. This plant food gives quick results, is easy to apply and, because only a small quantity is required, it is very economical. The 85-cent size—10 lbs.—is sufficient to fertilize plot of lawn 20 x 25 feet. The \$1.75 size—25 lbs.—will cover plot 40 x 30 feet. See "Amount to apply" below.

RECOMMENDED BY BEST AUTHORITIES

SACCO has the approval of horticulturists and soil authorities everywhere. On the lawns and in the gardens of the finest private estates—in the nurseries of progressive florists and growers—SACCO has proved its unquestionable superiority.

SACCO is less expensive to use than ordinary manure or fertilizers. SACCO IS CLEAN, ODORLESS AND VERY EFFECTIVE.

For every one hundred square feet (10 x 10' area) use two to four pounds of SACCO for best results. Simple instructions for applying SACCO come in each package. PRICES—1-lb. can, 25c; 5-lb. bag, 50c; 10-lb. bag, 85c; 25-lb. bag, \$1.75; 50-lb. bag, \$3.00; 100-lb. bag, \$5.00.

A handy sifter cap in each package, affords an easy means of applying SACCO quickly and evenly.

Special Fertilizer for

Weed Control in Lawns

Feeds Grass—Fights Weeds

Here is a dual purpose fertilizer—made as a special feeding ration for lawns only, and to control weeds.

ENDORSED BY EXPERTS

Wedo contains the recommended amounts of Nitrogen (Ammonia), Phosphates and Potash as proven by soil authorities to be best adapted to lawn grasses. Greenskeepers and soil experts are using Wedo in their most difficult lawn work, because they have found Wedo to be their very best turf builder. Wedo is an ideal fertilizer for Creeping Bent lawns and putting greens.

VERY ECONOMICAL

Only $1\frac{1}{2}$ pounds are required for 100 square feet—about one half the amount required when ordinary plant foods are used.

																		\$2.00
50	lbs		i		į													\$3.75
100	lbs																	\$6.50

PULVERIZED SHEEP MANURE

This is a pure natural manurc and one of the most nutritious foods for plants. Its effect is immediate. It is very rich, safe and gives quick results. It will give excellent results on flower beds, lawns or in vegetable gardens, as it contains all the elements for promoting a quick, luxuriant growth, as well as adding body to the plant. Can be used either in dry form or dissolved to make a liquid manure. If applied dry, no raking off is required as it does not disfigure the grounds, nor does it contain seeds of foul weeds, nor offensive odor.

Directions—For lawns, apply broadcast at the rate of five to six hundred lbs. per acre in February, March or April in spring, or in September or October in the fall. For pot plants mix one quart of sheep manure to six parts of soil. For use in the vegetable garden apply either broadcast and rake in or in drills at the rate of fifteen hundred to two thousand pounds per acre and mix slightly with the soil. For liquid application use 1 lb. to 5 gallons of water.

CATTLE MANURE (Shredded)

A substitute for stable manure in gardens and greenhouses, as it supplies plant food, humus and organic matter; largely used for rose culture and for mulching. The quality we offer is selected manure taken from paved Stock Yards cattle pens dried and sterilized by a high temperature direct heat process which kills weed seeds, fungous and disease germs. 100-lb. bags only.

Per bag of 100 lbs.....\$2.75

PURE BONE MEAL

This pulverized ground bone is excellent for rose culture and lawns. It decomposes rapidly and is quickly effective. Should be applied at the rate of 10 lbs. per thousand square feet or 400 to 500 lbs. per acre. Analysis, ammonia, 2%; total phosphoric acid, 27%.

FERTILIZERS—Cont'd

Loma

Beautifies Lawns and Gardens

Loma is a complete plant food, scientifically compounded from both organic and inorganic materials. It is rich in nitrates, phosphates and potash, the food elements vital to the proper growth of your lawn and garden.

Loma is odorless, clean to handle, entirely free from weed seed, and contains no filler. One hundred pounds go practically as far as a ton of old-fashioned manure.

 $L\overline{o}ma$ is easy to apply. Simple directions are printed on each package. Sold only in original packages-never in bulk.

PULVERIZED LIMESTONE A Lawn and Garden Conditioner

The agricultural value of lime is well known and it is an economic neutralizer for soil acidity, also for binding sandy soils and loosening clay soils.

For renewing old lawns use at the rate of 100 pounds for each four hundred square feet.

For new lawns give a generous coating at the rate of 1,000 to 2,000 pounds per acre for clay soils.

acre for clay soils.

Lime will be found very beneficial in the growing of all garden crops, fruit trees and flowers, also for leguminous crops, such as Alfalfa, Sweet Clover, Red Clover, Soy Beans, Cow Peas, Vetches,

Per bag of 80 lbs., \$1.00; 5 bags, \$4.50; 10 bags.....\$7.75

AMERICAN PEAT SOIL SPONGE (The Water Reservoir)

Very often too much emphasis has been placed on the analysis

Very often too much emphasis has been placed on the analysis of the soil and too little on its moisture retaining qualities. This is a mistake, as moisture is 95% of plant growth and absorbent peat is the medium to supply this want.

Peat Moss is usually used straight. Soil Sponge should never be used straight, but always mixed with other soils. Soil Sponge is not a fertilizer, has a low analysis, but when mixed with soil, remarkable and lasting results are obtained, because Soil Sponge will absorb and retain large amounts of moisture, which is one essential to plant growth, because these purely organic fibers so essential to plant growth, because these purely organic fibers act as a breeding ground for the nitrogen fixing bacteria, and because Soil Sponge does not decompose for years. Soil Sponge will develop beautiful lawns, gardens, shrubs, flowers and trees. 5 lbs., 25c; 10lbs., 48c; 25 f lbs., 75c; 50 lbs., \$1.25; 100 lbs., \$1.75; 500 lbs., \$8.00; 1000 lbs., \$15.00; 2000 lbs....\$28.00

IMPORTED GRANULATED PEAT MOSS or BULB FIBRE

Ferns, palms and other potted foliage plants that are placed in jardiniers or window boxes, will keep wonderfully well, if the space between the pots is filled in with moistened Granulated Peat Moss to the height of the shoulder of the plant pots. Flower pots are porous, and the capillary attraction of the roots draws the moisture from the moss through the pots; furthermore the air is allowed free access and is always somewhat damp—a natural condition for most

access and is always somewhat damp—a natural condition for most pot plants.

This Granulated Peat Moss or Mull is especially selected for horticultural purposes. It is finely granulated, of little weight, and is entirely free from foreign matter. It is packed in compressed bales, burlaped on all sides, sticked and wire strapped. When loosened the contents will cover 240 sq. ft., 1 inch deep. It is not sold by weight, because the weight of the bale is dependent on its projective content which varies according to atmospheric conmoisture content, which varies according to atmospheric conditions.

A few of the many purposes for which it is used: Fertilizer Carrier, Mulching, Cold Frames, Lawns, Improving Soils, Propagating, Cuttings, Landscape Work, Benches (Greenhouse), Golf Courses, Packing, Storing Bulbs, Potting, Layering, Seed Beds, etc. Send for booklet giving detailed information.

Per ½-bushel, 50c; per bushel, 75c; large bale (13 cu. ft. and covers 240 sq. ft., one inch deep); \$4.00; 5 bales.....\$3.75 per bale.

FERTILIZERS—Cont'd

HUMUS

Exhaustive tests have proven that Humus makes a balanced feeding for plant life, a food that can not be supplied otherwise. Humus is not sold to eliminate the use of fertilizers but to release the natural fertilizers from the soil and make them available. The average soil contains enough potash, but due to improper cultivation or acidity only a small portion has ever become available. The Humus we offer is taken from a bog seventy-five feet in depth and has undoubtedly been in process of formation since the end of the glacial period. This Humus is then passed through processes which more thoroughly break up the fibres and destroy harmful bacteria and weed seeds.

Our Humus is odorless and contains no insects harmful to

Our Humus is odorless and contains no insects harmful to plant life.

For pot plants, the garden or greenhouse it is advisable to use at the time of planting, application being made to the seed row or to roots of the plant.

Facts—Food put into the human body will not sustain life unless properly digested. Plant food (fertilizer) put into the soil will not benefit plant life until it is digested. Our Humus digests the fartilizers

the fertilizers.

DRIED BLOOD MEAL

A splendid fertilizer for Roses, Carnations, Chrysanthemums, as well as for pot plants. Can be mixed with the soil or applied in liquid form.

1 lb., 15c; 25 lbs., \$2.00; 50 lbs., \$3.75; 100 lbs......\$7.00

ADCO

For making Artificial Manure—Dry leaves, mixed with Adco and kept moist, turn into excellent manure. So do flower stalks, cuttings, pea vines, and almost any other kind of non-woody

vegetable waste.

Adco is a powder which, mixed with vegetable matter and kept moist, turns the latter into Real Manure, but without the odor, flies, etc. The process is perfectly simple and not at all laborious. The method is being generally adopted by gardeners, who know that manure is a necessity to the soil and can no longer be obtained from stables. Farmers can use straw, corn stalks, etc., and need from stables. Farmers can use straw, corn st no longer maintain live stock. Price, Adco, in 25-lb. bags, each \$2.00.

(Enough for about 12 wheelbarrow loads of garden waste, making one-half ton of

manure.)

manure.)

Adco, in 100-lb. bags (4—25's), each \$7.75. (Enough for a heap 8 ft. x 8 ft. x 6 ft., making about two tons of manure.)

Adco, in special 150-lb. bags, each \$10.50. (Enough for a heap 10 ft. x 10 ft. x 6 ft., making about three tons of manure.)

Each shipment is accompanied by simple directions, which

makes any mistake impossible.

PLANT MARVEL

Ensures bushy ferns and healthy flowers and plants. It is a pure, rich, quick-acting plant tonic and contains 61.30 per cent of plant food. Begins to feed instantly. Nourishes continuously and plentifully. Package, 25c; ½-lb. container, 60c; 1-lb. container, \$1.00 The \$1.00 size is the most economical.

STIM-U-PLANT

Growers of fine flowers, shrubs and vegetables for the best Growers of the howers, shrups and vegetables for the best markets and for exhibition, fertilize and stimulate them frequently, a little at a time. An excellent fertilize for this purpose is Stim-UplanT, an odorless, highly concentrated plant food, in tablet form, with guaranteed chemical analysis of 11 per cent nitrogen, 12 per cent phosphoric acid, 15 per cent potash. The proportions are accurate, there is no wasted filler, and in this form you apply plant food exactly when and where and as needed.

Easy to Use—Simply insert tablets in soil near plants or dissolve in water at the rate of four tablets to the gallon and apply as liquid manure. Complete directions with every package. Order Stim-U-planT tablets with your seed and plant order.

Price, 30 for 25c; 100 for 75c; 1,000 for \$3.50.

PLANTABBS

Plantabbs are small, white, odorless tablets, ideal for house plants where smelly fertilizer cannot be used but equally good for all garden planting.

Plantabbs are economical, there is no waste; they are clean, odorless, easy to apply, give uniform feeding and by dissolving quickly produce immediate fertilization.

3-Way Dayton Sprinkler—Entirely new. Three different sprinkling heads combined in one unit—

SPRAYERS AND DUSTERS

Compressed Air and Knapsack

HUDSON PERFECTION SPRAYER

For general high presseries purposes, the Perfection is the very best. Easily operated and economical to use for whitewashing, disinfecting, deodorizing, cold water painting, etc. Best materials, best construction and best quality throughout.

Capacity, 4 gallons. Pump is seamless brass tubing. Fastens to tank by heavy threaded malleable cap which screws onto brass tank collar.

Nozzle is designed for high pressure work. Handles any solution and works perfectly under all pressures.

Regularly equipped with 12-inch brass extension rod as shown. Permits the operator to quickly and easily reach low-lying plants under surfaces of leaves, all parts of trees, shrubs or vines, or the nooks and corners of the poultry house, dairy barn or hog pen, without tiresome bending or climbing. Fitted with standard ¼-inch iron pipe threads so that a longer rod can be used if desired.

No.	110-B—Brass tank.	Each	\$9.00
No.	110-G-Galvanized	tank. Each	6.50

HUDSON JUNIOR SPRAYER

The Junior Sprayer is made for the man who needs a medium size high pressure Compressed Air Sprayer. It is particularly adapted for the backyard garden, small truck farm or for disinfecting. It will do any work the larger models can, for it differs from them only in capacity. It is substantially made and will give entire satisfaction. Capacity, approximately 2½ gal.

"TIMESAVER PLANT SUPPORT"

DUNHAM WATER-WEIGHT LAWN ROLLERS

Dunham Water-Weight Rollers are electric welded -no rivets used — the drum cannot possibly

If you wish a fine lawn, you must use a Lawn Roller. In no other manner can a smooth, compact surface be maintained. It packs the soil, thus retaining the moisture throughout the season, enabling young and tender grass to secure the necessary nourishment.

The Dunham Water-Weight Roller can be made as heavy or as light as desired by simply putting in the right amount of water. For storing away or for moving, it can be emptied entirely and is light and easy to handle.

				Weight, Fille	d
No.	Dia.	Length	Weight, Empty	with Water	Price
2	14 in.	24 in.	68 lbs.	175 lbs.	\$10.00
4	18 in.	24 in.	82 lbs.	265 lbs.	12.00
7	24 in.	24 in.	110 lbs.	420 lbs.	18.00

The above rollers weigh 50% more when filled with sandwater is more convenient.

GROW BIGGER, BETTER, EARLIER CROPS WITH MULCH PAPER-

Do Away with Weeding and Cultivating

Mulch Paper prevents the growth of weeds, preserves soil moisture and increases soil fertility. All vegetation protected and stimulated by Mulch Paper, matures weeks earlier and yields larger.

Type A-Light Weight-For annual crops.

O. K. POULTRY LITTER

A great Labor Saver and does away with most of the unpleasant work of caring for poultry. Repels vermin and is so light and springy that heavy birds do not injure themselves when alighting on it, thereby preventing bumble foot and lameness. Keeps the birds clean as it prevents the droppings from sticking to them. It is very economical as it outlasts any other Litter two or three times. Prevents dampness and keeps the coops pure and sweet—there will be no unpleasant odors where it is used. Saves the cost of disinfectants. One bale will cover about 80 square feet, 3 inches deen. Per hale \$4.00:

inches deep. Per bale, \$4.00; 5 bales, \$3.75 per bale; 10 bales, \$3.50 per bale. Write for prices on larger quantities.

Lawn Park Brood Coops-Made from galvanized materials, will not rust, and is proof against all chick enemies.

Size, closed, 18 x 24 inches; extended, 18 x 48 inches. Height, 19½ inches...\$3.75

"STARTRITE" CHICK FOOD An Unequalled Food for Baby Chicks

Gives the young chicks all the food elements required by them to develop properly and in the correct proportions.

No guess work. Can be fed either wet or dry. Chicks will mature rapidly and in the best condition with no losses. 4 lbs., 30c; 10 lbs., 55c; 25 lbs., \$1.25; 50 lbs., \$2.30; 100 lbs.

DRY MASH HOPPERS

The improved curved bottom keeps the feed within easy reach of the birds and the taper shape of the hopper—larger at the bottom—prevents the feed from clogging and insures a gradual, automatic feed. The wire grid and the wires running from the flange through the wire grid prevent the fowls from throwing out or westing the feed. or wasting the feed.

The sloping top prevents them from roosting on the hopper

When both covers are closed it is rat, mouse and weather proof.

No. 35—8½ inches wide. Capacity, 10 quarts. \$1.50

No. 36—12 inches wide. Capacity, 14 quarts. 1.95

A Real 1931 Opportunity for Cincinnatians

THE TWELFTH NATIONAL FLOWER AND GARDEN SHOW

conducted by the Society of American Florists and Ornamental Horticulturists will be held in Music Hall in Cincinnati, March 7th to 15th, inclusive.

Whether you are a garden enthusiast or not, this is a real opportunity of visiting a display from which you will derive a good deal of joy and comfort. Being held, as it is, in the cold and windy month of March, you can imagine yourself leaving this atmosphere and entering one of the finest flower gardens as though it were a balmy day in June. Here you will see formal gardens, attractively outlined with shrubs of all kinds in full bloom, with grass paths leading among beautiful beds of blooming tulips; in fact, most every conceivable kind of flower and shrub will look its best.

In the north wing, space No. 6, The J. Chas. McCullough Seed Company will have its display, and we take this opportunity of inviting all visitors to this space, where we will endeavor to make your visit an enjoyable one.

After your visit to the National Flower and Garden Show, visit our store, not once but many times. Make it a point to come in whenever you have a moment to spare. From week to week, the marvelous procession of seasonable flowers, plants and other requisites makes it different every time you come in. When you receive our catalogue, you receive what to us is more than just a book of illustrations, descriptions and prices. We want it to be a friendly medium of contact and amicable business relations, and we have tried to make it more than just a price list. The descriptions are carefully written and the illustrations are made from actual photographs. You will be delighted with the new thrills in store for you this year. New varieties that have surpassed some of our fondest hopes. New and improved strains of the standard and most popular varieties, to make them more satisfactory than ever. Sensations in the flower world.

To our old customers, we wish to express our sincere appreciation of their past patronage, and to our new, we give the assurance that we will do all in our power to please them.

BUCKEYE INCUBATORS AND BROODERS

Buckeye Incubators are made and guaranteed by the biggest company of its kind in the world. A company unequaled in practical experience, engineering ability, and financial resources.

THE WORLD'S BEST INCUBATOR S

The new line of Buckeye Incubators affords a range of capacity from 75 to 576 eggs. This meets the demand expressed to-day by users of domestic incubators.

Cypress Cabinets—All of the machines are constructed of cypress—the best material ever found for incubators. It will not warp. It will not crack nor pull apart. It will not retain the odor of hatches.

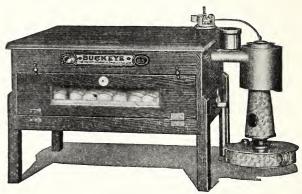

Beautiful Finish—Finished in natural grain with most durable of varnishes, Buckeye Incubators have the appearance of beautiful furniture.

Heavy Insulation—The four larger models have double walls with heavy insulating material between, assuring retention of heat with the utmost fuel economy. These models also have darkening doors to provide the dark egg chamber favorable to efficient incubation.

Patented Thermostat—The Buckeye Patented All-Metal Thermostat insures absolute regulation of temperature. It eliminates the possibility of breakdown which is likely to happen with wafer-type thermostats; for wafers may become dead through the evaporation of the liquid in them. This may occur in the midst of a hatch and ruin the whole setting of eggs. There is no such hazard with the Buckeye All-Metal Thermostat. It is absolutely reliable. No other thermostat can give Buckeye results, because the Buckeye Thermostat is patented.

Improved Heater—The Buckeye heating tank is built of heavy copper. An air vent is placed in the end of the tank farthest from the boiler. This eliminates air bubbles and insures perfect circulation of the water. In the new Buckeye Incubator there can be no trouble and loss from air pockets in the heater.

Underwriters' Label on all models, except No. 65, as a warranty against fire hazard.

Model No. 65 Buckeye Incubator Capacity, 75 Eggs

Model No. 67 Buckeye Incubator Capacity, 286 Eggs

Iron Legs are painted to match the incubator. The flare at bottom gives extreme rigidity and adds to the graceful appearance of the incubator.

No. 65.	75 Eggs	 	\$18.50
No. 66.	143 Eggs	 	39.50
No. 67.	286 Eggs	 	57.75
No. 68.	416 Eggs	 	76.50
No. 69.	576 Eggs	 	97.50

-GUARANTEE-

Every Buckeye Incubator is guaranteed to hatch more chicks and stronger chicks than any incubator of any other brand.

The perfect construction of all mechanical parts also guaranteed and any Buckeye Incubator or part thereof that does not fulfill our guarantee in every particular will be replaced without question any time within 40 days.

Signed: THE BUCKEYE INCUBATOR COMPANY.

NEW AUTOMATIC EGG TURNERS ARE STANDARD EQUIPMENT

To give each and every egg a complete half-turn, it is only necessary to push or pull the egg turner slide as far as it will go. The tray doesn't need to be removed from the incubator, and not a single egg has to be touched.

All Buckeye Incubators, except No. 65, are now equipped with Buckeye Automatic Egg Turners. Only a moment is required to turn all the eggs. This saves time and work. It prevents chilling, addling, and breaking the eggs. The tray is strongly and simply constructed and there's nothing to get out of order. Egg Tester and Thermometer furnished FREE with each Buckeye Incubator. Both of these articles are designed for the utmost convenience of operators.

OUALITY BABY CHICKS

Beginning about February 15, we have on sale, day old baby chicks of all breeds. They are pure bred from flocks that have been culled closely and every possible precaution taken to insure healthy chicks. We pay parcel post charges on 50 or more and guarantee 100% live arrival. When better chicks are hatched, we will sell them.

"STARTRITE" CHICK FOOD

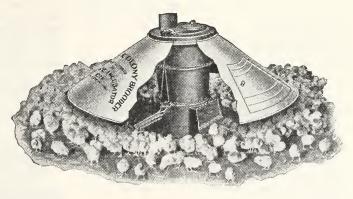

An Unequaled Food for Baby Chicks.

Gives the young chicks all the food elements required by them to develop properly and in the correct proportions. No guess work. Can be fed either wet or dry. Chicks will mature rapidly and in the best condition with no losses. 4 lbs., 35c; 10 lbs., 60c; 25 lbs., \$1.35; 50 lbs., \$2.50; 100 lbs., \$4.90.

BUCKEYE COAL-BURNING COLONY BROODERS

Buckeye is the pioneer colony brooder. It saves millions of chicks every year. It is saving chicks for half a million poultry raisers. It has the capacity to supply abundant heat under extreme weather conditions. The stove is larger. It holds more coal. It burns longer with one fueling. It burns hard coal or soft coal. It has the famous Non-Clogging Rocker Grate. The grate is bigger—makes possible a bigger fire body. It doesn't

let the fire get choked or smothered. Buckeye has a Double Check Draft, thermostatically controlled. This Double Check Draft and the Thermostat Heat Regulator insure a continuous fire. The fire won't go out. It won't overheat. The wonderful Buckeye revolving hover saves work. It radiates the heat scientifically to all the chicks. The greatest value ever offered in coal-burning brooders.

BUCKEYE "RITE-HEAT" OIL-BURNING BROODERS

Newly designed and perfected, large capacity, oil-burning brooders. The improved stove has two baffle plates, greatly increasing heating efficiency. The newly designed burner has an exclusive new flame spreader that throws the flame down and out to the sides of the stove. And the perfected "Rite-Heat" has a special double pre-heating chamber, thoroughly heating the air before it reaches the burner—an improvement that enables the flame to burn continuously even at a very low rate. The flame won't flare up. It won't go out. The new smoke pipe cap and a back draught check damper prevent back draughts from reaching the flame.

The new "Rite-Heat" burner bowl has an overflow pipe for any excess oil that may be supplied to the burner.

The improved thermostatically controlled Heat Regulator insures ideal temperature under the hover. It has a new sight feed showing at a glance how much

oil is being delivered to the burner. The Revolving Hover is a remarkable labor-saver and a marvelous heat deflector.

"Rite-Heat" saves chicks where other oil-burning brooders fail. Safe; dependable; durable; economical.

BUCKEYE "ELECTRIC" COLONY BROODER

The Buckeye Electric Brooder gives a maximum of brooding efficiency without the disadvantages common to other brooders of this type. Generates a remarkable amount of heat with comparatively small current consumption. The heating coils are a special grade resistance wire. Designed for 100 to 125 volts A. C. It has the exclusive Buckeye Double "Diafram" Heat Diffuser; assures a more uniform distribution of heat under the hover. The control switch is thermostatically operated. Contact points won't stick. They won't burn out. Buckeye assures perfect ventilation that prevents concentration of moisture under hover. That's important.

Ideal for poultry raisers who want to brood comparatively small flocks of chicks in warm brooder houses.

BUCKEYE BLUE FLAME COLONY BROODER

GUARANTEE-

Buckeye Brooders are guaranteed to be exactly as represented and to do everything we claim for them. They are guaranteed to do anything that any other Brooder will do—and do it better. That's a pretty broad guarantee, but we mean every word of it. Buckeye Brooders are the greatest brooding devices ever invented and we are ready to prove it by permitting you to write your own money-back guarantee. We will permit you to try any Buckeye Brooder for 30 days under any kind of guarantee you care to write, and return your money without argument if you are not entirely satisfied.

THE J. CHAS. McCULLOUGH SEED CO.

Ideal Power Lawn Mowers are built in various sizes and capacities for practically all requirements.

Above is illustrated the roller type Ideal that is made in both 22' and 30' sizes. These machines are noted for their simplicity and absolute reliability. They are labor-savers and lawn builders.

Used extensively by home owners, park departments, schools, colleges, cemeteries, ball parks, and in fact every place where there are large lawns to care for.

We will gladly arrange for a demonstration of any Ideal equipment at any time. Special literature upon request.

ideal Wheel Type Mowers are built in two sizes—20-inch cut and 25-inch cut. Recommended for cemeteries and on lawns having steep grades to climb.

The Ideal Golf Dump Cart is a handy tool for any park department, golf club, nureey-man, or florist. Strongly made. Wide crown wheels. Capacity, 1 ½ yards.
